## **1. INTRODUCTION**

The production of the Annual Performance Plan (APP) for each financial year, is a legal requirement in terms of the National Health Act (NHA) of 2003. Section 25 (3) of the NHA of 2003 requires the Head of the Provincial Department of Health to “prepare health plans annually and submit to the Director General for approval”. Also, Section 25 (4) of the NHA of 2003 stipulates that “provincial health plans must conform with national health policy”.

In the light of the above, the strategic direction for the Mpumalanga Department of Health for 2014/15 derives from the following:

- National Development Plan, Vision 2030
- Medium Term Strategic Framework (MTSF), 2014 – 2019
- State of the Nation Address and State of the Province Address
- Health Sector Negotiated Service Delivery Agreement
- Strategic Plan for Mpumalanga Department of Health, 2014/15 – 2019/20

## **2. BACKGROUND TO THE ANNUAL PERFORMANCE PLANS (APPs) OF PROVINCIAL DEPARTMENTS OF HEALTH**

This Format for Annual Performance Plans (APPs) of Provincial Departments of Health (DoHs) is adapted from the generic format developed by National Treasury in 2010. The APP is divided into three parts. Part A aims to provide a strategic overview of the provincial health sector. Part B allows for the detailed planning of individual budget programmes and sub-programmes and is the core of the Strategic and Annual Performance Plan. Part C provides for linkages with other long-term and conditional grant plans of the health sector.

The APP format is structured to promote improved delivery of provincial health services and to account for the use of public funds. Most importantly, the APP Format provides for linkages between Outcome 2 priorities of Medium Term Strategic Framework (MTSF) 2014-2019 and Provincial objectives for the MTEF period.

Treasury Guidelines require that the technical definitions of each indicator used in the APP should be provided and posted on the Department's Website together with the APP.

### **3. FORMAT FOR PROVINCIAL APPs-**

#### **3.1. FOREWORD BY THE MEC FOR HEALTH**

This second Draft APP 2019/20 is in preparation for the last cycle of the current administration (MTSF 2014 – 2019). It would also form the basis for the projection of the new administrative cycle horizon.

The Mpumalanga Department has indeed turned the corner in delivering better health services to the people. All health officials have been on their toes to ensure that the Department is performing according to its strategic objectives. One of the biggest challenges the Department grappled with was the shortage of managers and health professionals. The Department has indeed met its plans of filling most vacant posts although there is still a lot to be done.

The Department has appointed the following three keys positions to strengthen top management structure: Deputy Director General, Finance; Deputy Director General Clinical Health Services and Chief Director Hospital Services. The Department has advertised the post for Director: Emergency Services, Chief Director: Primary Health Care, Director: Quality assurance, Director: HIV & AIDS, STI and TB, Director: Engineering and Technical Services and Clinical posts. The Department should be on the right course to alleviate shortage of staff at both Provincial Office and Institutions. There might be a setback due to a recent budget of R173, 890 m during the budget adjustment.

The Department has reduced qualifications from seven (7) qualifications in 2015/16 and three (3) qualifications in 2016/17 to one (1) qualification in 2017/18. The Department was this time around qualified on contingent liabilities. For the first time the Department was able to get its movable asset correct. The Department will continue to strengthen its assets verification project. The Department has established committee to monitor the investigation of Unauthorised, Irregular and Fruitless and Wasteful expenditure on a monthly basis.

More work to ensure that the Department is moving towards the right direction will be done so that the people of Mpumalanga and South Africa benefit on a well implemented health system.

### **3.2. STATEMENT BY THE HEAD OF DEPARTMENT (HOD)**

The Mpumalanga province's population has significantly grown. According to Census 2016 survey, the population in the province has grown by 7.3%. The increase in the population warrants more resources for attainment of health outcomes.

The Department has taken note of these needs hence the infrastructure programme works around the clock to ensure that all health facilities are functional. This is a programme that builds, upgrades, renovates, rehabilitates and maintains health facilities. Despite the financial challenges the country is experiencing, more work has been carried out including upgrading of hospitals and primary health care facilities. This is to ensure that the public continues to have better health facilities.

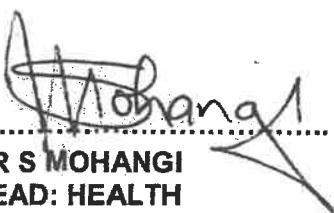

The Ideal Clinic Realisation and Maintenance, is being implemented according to the guidelines to benefit all health care users at all levels of service. The Department is on course to ensure that more primary health facilities reach the Ideal Status by 2019. This will contribute immensely to the Sub-Outcomes 1, 2 and 3 which are:

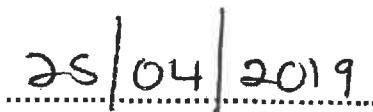

- *Sub-Outcome 1 – Universal Health coverage progressively achieved through implementation of National Health Insurance (NDoH)*
- *Sub-Outcome 2 – Improved quality of health care*
- *Sub-Outcome 3 – Implement the re-engineering of Primary Health Care*

For these three Sub-Outcomes and Ideal Clinic Initiative to succeed, the Department has to ensure that there is a link between all the ten (10) Sub-Outcomes.

The province like the rest of the country faces a quadruple burden of diseases. HIV and AIDS, Tuberculosis, high Maternal and Child Mortality and Non-Communicable Diseases. The Department has already distributed millions of males and females condoms, put many patients on ART and increased the pace of curing TB. The Department has also partnered with NGO stakeholders and the population groups in order to fight the pandemic.

The Department will continue to manage its finances better to ensure that there is no more qualified reports and irregular expenditures. Systems have also been put in place to manage movable and immovable assets. All these to ensure that better health services are offered to the people of the province of the Rising Sun.

### **3.3. OFFICIAL SIGN OFF OF THE PROVINCIAL APP BY THE CHIEF FINANCIAL OFFICER; HEAD OF STRATEGIC PLANNING; HOD AND MEC FOR HEALTH**

The 2010 Treasury Guidelines require the Chief Financial Officer (CFO) and the Head of Strategic Planning in each Province to also sign off the APPs, as shown below.

It is hereby certified that this Annual Performance Plan:

- Was developed by the Provincial Department of Health in Mpumalanga Province.
- Was prepared in line with the current Strategic Plan of the Department of Health of Mpumalanga Province under the guidance of the **Executive Authority for Health, Ms S Manzini**
- Accurately reflects the performance targets, which the Provincial Department of Health in Mpumalanga Province will endeavour to achieve given the resources made available in the budget for 2019/20.

## PART A -

### 4. STRATEGIC OVERVIEW

#### 4.1 VISION

*"A Healthy Developed Society".*

#### 4.2 MISSION

The Mpumalanga Department of Health is committed to improve the quality of health and well-being of all people of Mpumalanga by providing needs based, people centred, equitable health care delivery system through an integrated network of health care services provided by a cadre of dedicated and well skilled health workers.

#### 4.3 VALUES

- Commitment
- Appropriateness
- Timeousness
- Collectiveness
- Competency

#### 4.4 STRATEGIC GOALS

##### National Development Plan 2030

The National Development Plan (NDP) sets out nine (9) long-term health goals for South Africa. Five of these goals relate to improving the health and well-being of the population, and the other four deals with aspects of health systems strengthening.

By 2030, South Africa should have:

1. Raised the life expectancy of South Africans to at least 70 years;
2. Progressively improve TB prevention and cure
3. Reduce maternal, infant and child mortality
4. Significantly reduce prevalence of non-communicable diseases
5. Reduce injury, accidents and violence by 50 percent from 2010 levels
6. Complete Health system reforms
7. Primary healthcare teams provide care to families and communities
8. Universal health care coverage
9. Fill posts with skilled, committed and competent individuals

## Sustainable Development Goals 2030

The Sustainable Development Goals 2030 built on Millennium Development Goals 2015 were adopted as Global Goals by the world leaders on 25 September 2015. There are 17 Sustainable Development Goals (SDGs) to end poverty, fight inequality and tackle climate change by 2030.

There are 13 targets in Goal 3 "Ensure healthy lives and promote well-being for all at all ages". There are:

1. By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births.
2. By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births
3. By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases
4. By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being, strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol
5. By 2020, halve the number of global deaths and injuries from road traffic accidents
6. By 2030, ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes
7. Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all
8. By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination
9. Strengthen the implementation of the World Health Organization Framework Convention on Tobacco Control in all countries, as appropriate
10. Support the research and development of vaccines and medicines for the communicable and non-communicable diseases that primarily affect developing countries, provide access to affordable essential medicines and vaccines, in accordance with the Doha Declaration on the TRIPS Agreement and Public Health, which affirms the right of developing countries to use to the full the provisions in the Agreement on Trade

## ANNUAL PERFORMANCE PLAN 2019/20

Related Aspects of Intellectual Property Rights regarding flexibilities to protect public health, and, in particular, provide access to medicines for all

11. Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States
12. Strengthen the capacity of all countries, in particular developing countries, for early warning, risk reduction and management of national and global health risks

## 4.5 SITUATIONAL ANALYSIS

### 4.5 SITUATIONAL ANALYSIS

#### 4.5.1 Demographic Profile

Mpumalanga Province has an estimated total population of above 4.5 million people according to the Mid-Year Estimates conducted by Statistics South Africa (StatsSA 2018). It is estimated that the population growth rate has been 2% per annum since 2001. The province has a total surface area of 76 495 square kilometres, a second smallest province after Gauteng taking up 6.3% of South Africa's total land area, with a population density of 59 people per square kilometre. The Province contribute 7.8% of the total population in South Africa. The municipal area is predominantly rural in nature and the majority of the population reside in the rural areas. The province comprises of three districts municipalities, namely Ehlanzeni, Nkangala and Gert Sibande District, all sharing a total of 320 health facilities.

*Figure 1: Health facilities in Mpumalanga Province*

#### Geographic location

Mpumalanga Province is proximal to the international borders of Mozambique (located east of the province) and eSwatini (on the southeast of the province). Provincial borders include Limpopo Province to the north, KwaZulu-Natal to the south-east, Free State Province to the south-west and Gauteng Province to the west (see figure 2). The capital city of Mpumalanga Province is in Mbombela (Swati: A lot of people together in a small space), a town previously known as Nelspruit.

**Figure 2: Mpumalanga Provincial Map**

### Mpumalanga's economy

Mpumalanga's economy is dominated by mining, mostly coal for the Eskom power plants that are also located in the province. The province also has extensive heavy industry, which forms part of the long-standing Highveld complex, and a strong commercial agricultural sector. Furthermore, the province has always been one of South Africa's top tourist destination with its extraordinary attractiveness of the Lowveld and escarpment, and to the north of the Ehlanzeni District is the south-eastern section of the Sabie River in the Kruger National Park which attract a significant number of tourist to the province.

**Table 1: Main economic activities in Mpumalanga Province**

| Town       | Economic activities                                |
|------------|--|
| eMalahleni | Mining, steel manufacturing, industry, agriculture |
| Middelburg | Stainless steel production, agriculture            |
| Mashishing | Agriculture, fish farming, mining, tourism         |
| Secunda    | Power generation, coal processing                  |
| Barberton  | Mining town, correctional services, farming centre |
| Malelane   | Sugar production, agriculture                      |

## ANNUAL PERFORMANCE PLAN 2019/20

### Provincial population

The mid-year population estimates of 2018 by Statistics South Africa indicates that Mpumalanga population grew from 4,444,212 in 2017 to 4,523,874 in 2018 (StatsSA, 2018), an increase by 76,662 people. This reflect a growth of 1.8%, which could also be attributed to the inter-provincial as well as international migration patterns across these borders in pursuit of economic opportunities offered by the province.

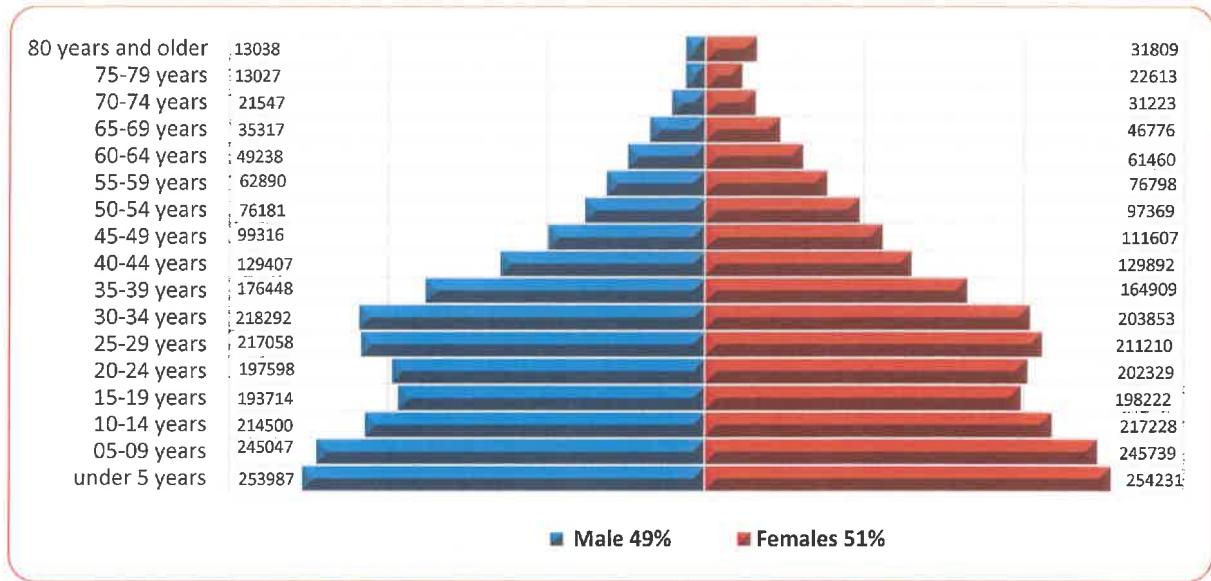

**Table 2: Population per province**

| Provinces         | Census 1996      | Census 2001      | Census 2011      | CS 2016          | Mid-year estimation 2017 | Mid-year estimation 2018 | % of total population |

(Source: Census 1996; Census 2001, Census 2011, CS 2016, Mid-year estimate (StatsSA, 2017,2018)

Forty-nine percent of South Africans are males with females having the slightest majority of 51%. Mpumalanga Province displays similar trends as the South African population with females dominating at 51%. According to StatsSA (2018), youth of the age group 15-34 years account for 36.0% of the population in the province.

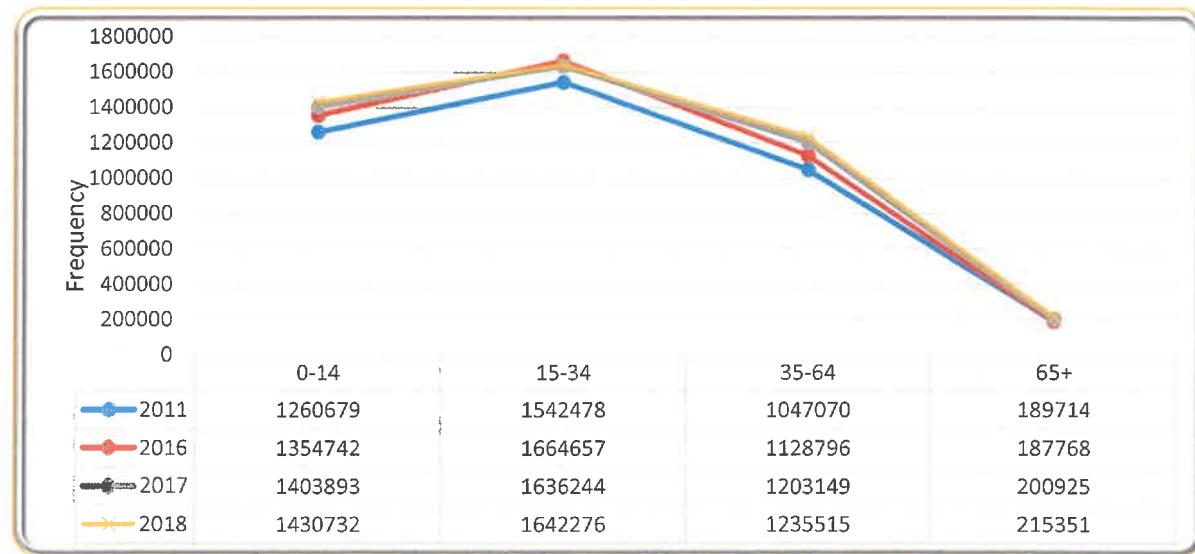

## ANNUAL PERFORMANCE PLAN 2019/20

**Figure 3: Mpumalanga Population Pyramid**

Source: Mid-Year Estimates 2018 (StatsSA)

The figure above shows the provincial pyramid as per the mid-year estimate of 2018 by StatsSA, indicating a tremendous growth of above 10% when compared to Census 2011. The pyramid shows that there is a large proportion of females in all the ages with the exception of the middle age of 25-39 years old, where the proportion of males is higher. The increase in population attest the need to procure more resources for attainment of health outcomes, with emphasis on mother and child programme. Further analysis should be done since this is a nationwide phenomenon.

**Figure 4: Mpumalanga Population Size**

Source: Mid-Year Estimates 2018 (StatsSA)

All age groups as indicated in the figure above showed an increase in population size in 2018 compared to 2017, although the population size of the age group 15-34 is still in 2018 compared to the population size in 2016 (see figure 4 above).

#### 4.5.1.1 Mpumalanga Health Districts

Mpumalanga Province consists of three districts, namely Ehlanzeni, Gert Sibande and Nkangala Districts, which all consisting of 17 sub-districts municipalities as from 2017. The sub-districts were reduced from 18 in 2016 as a result of the merger between Umjindi and Mbombela municipalities at Ehlanzeni District to form the City of Mbombela.

*Figure 5: District Municipalities in Mpumalanga Province*

##### i. Demographics in Ehlanzeni District

The Mid-Year estimates report for 2018 does not provide a breakdown in terms of the changes in population per districts, however, the Community Survey of 2016 indicated that the population at Ehlanzeni District represented 41% of the people in the province (CS 2016).

Forty one percent (41%) of the people in Mpumalanga Province reside in Ehlanzeni District as per the Community Survey of 2016 which is higher than of the other two districts. The district has the second highest total surface area of 27 896 square kilometres in the province, accommodating at least 63 people per square meter.

There are four sub-districts at Ehlanzeni District, which are Bushbuckridge, Mbombela, Nkomazi, and Thaba Chweu. Nkomazi is further divided into Nkomazi East and West, and incorporates a number of small towns including Louw's Creek; Kaapmuiden; Malelane, Hectorspruit, Marloth Park, Komatipoort, KaMhlushwa, Tonga and KaMaqhekeza. These areas are in close proximity with the province's international borders and therefore require a substantial investment in infrastructure and the general provision of healthcare services to these communities.

## ANNUAL PERFORMANCE PLAN 2019/20

Mbombela Municipality, which houses the capital city of Mpumalanga, is situated in the North Eastern part of South Africa within the Lowveld sub region of the Mpumalanga Province, and is divided into Mbombela South and North. Mbombela is one of the fastest growing cities in South Africa, and recently amalgamated with the former Umjindi Sub-district to form the City of Mbombela, which is home to approximately 16% of the total population in Mpumalanga Province.

Ehlanzeni District depict similar pattern as the provincial pyramid with large proportions of females in all age categories except from the age group under 5 to age 24, where the proportion of males is higher (Indicated in the figure below).

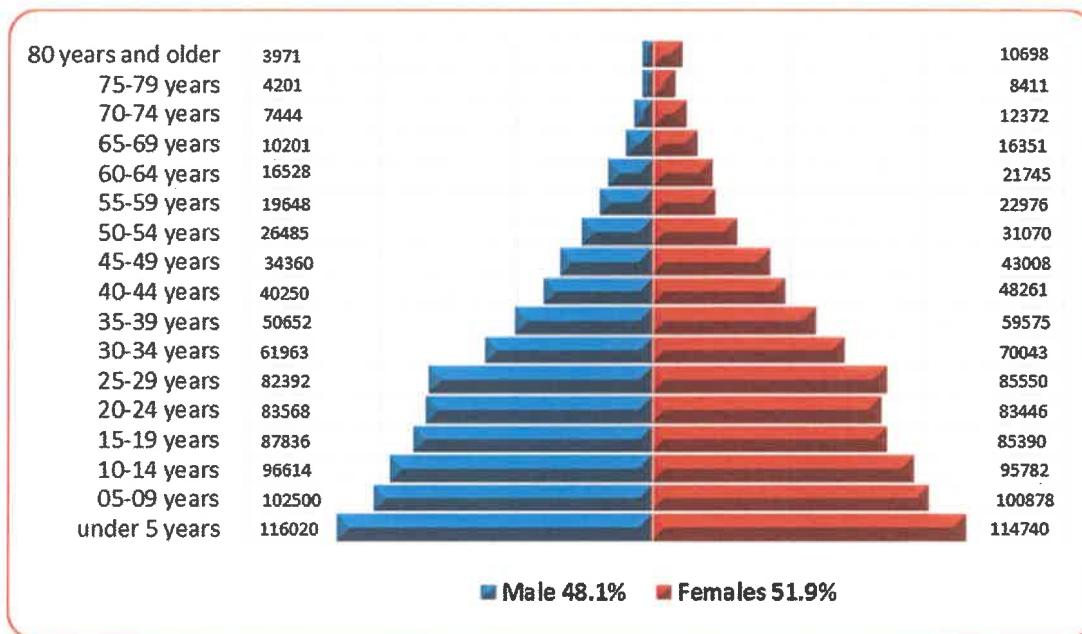

Figure 6: Ehlanzeni District: Source CS 2016

### ii. Demographics in Gert Sibande District

Only a total of 26% of the people in Mpumalanga Province reside in Gert Sibande District as per the Community Survey of 2016, which is less than the other two districts. In comparison with the other districts in Mpumalanga Province, Gert Sibande District is sparsely populated, and has a total surface area of 31 841 square kilometres, with at least 36 people per square meter.

There are seven sub-districts in Gert Sibande District, which are Albert Luthuli, Dipaliseng, Govan Mbeki, Lekwa, Mkhonto, Msukaligwa, and Pixley Ka Seme sub-districts municipalities. The district's headquarters are in Ermelo (Msukaligwa Sub-district Municipality). The eastern extent of the Gert Sibande District forms the anchor of the tourism corridor in the district, with its R23 and R541 routes connecting KZN to the Kruger National Park. Since 2008 to 2013, the district also had the highest HIV prevalence in the province.

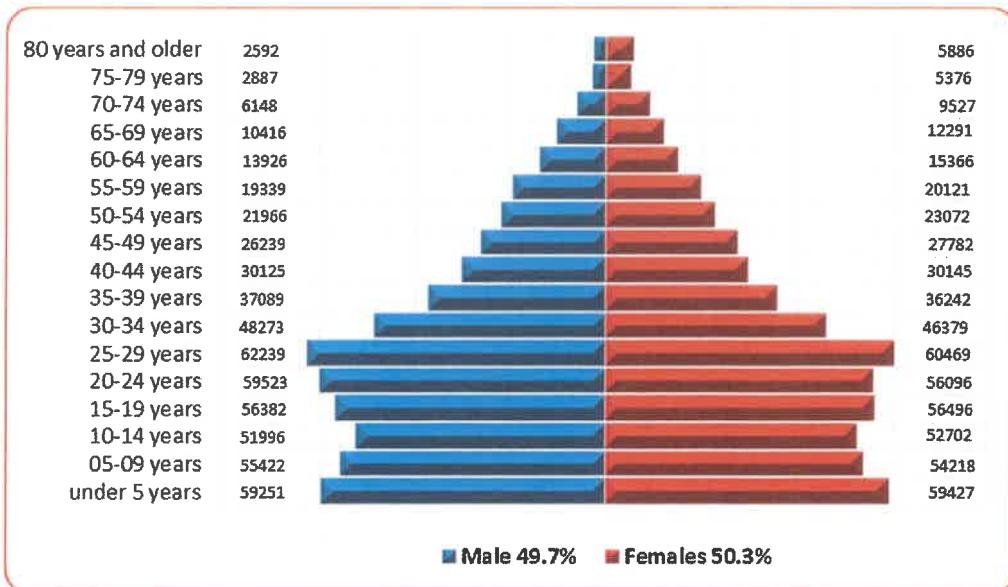

Figure 7: Gert Sibande District: Source CS 2016

With regard to gender distribution, Gert Sibande District Municipality almost shows an equal distribution of males and females, with males contributing 49.7%, while females at 50.3%, a 0.3% higher than males (see figure above). It can also be noted that the age group 25-29 contribute the highest proportion of both males and females.

### iii. Demographics in Nkangala District

Nkangala District makes up 33% of the population in Mpumalanga Province as per the Community Survey of 2016, and has the smallest surface area of 16758 square kilometres. The six sub-districts of Nkangala District, Dr JS Moroka, Thembisile, Emalahleni, Emakhazeni, Dr Victor Khanye and Steve Tshwete, are densely populated with 86 people per square meter as compared with the other two districts of Mpumalanga Province.

The district's headquarters are in Middelburg town, and connects the province to provinces like Limpopo, Gauteng and Northwest. The proximity to Gauteng has potential to create opportunities to a larger market, which is of benefit to the district's agricultural and manufacturing sectors.

As per the Community Survey of 2016, the proportion of males is slightly above that of females at Nkangala District Municipality. Males contribute 50.5% of the total population, while females at 49.5% (see figure 4 below). This is attributed to the number of mines located in the district which attracts a substantial number of male workers. This is in contrast to the provincial proportions, which depicts females slightly above the males.

## ANNUAL PERFORMANCE PLAN 2019/20

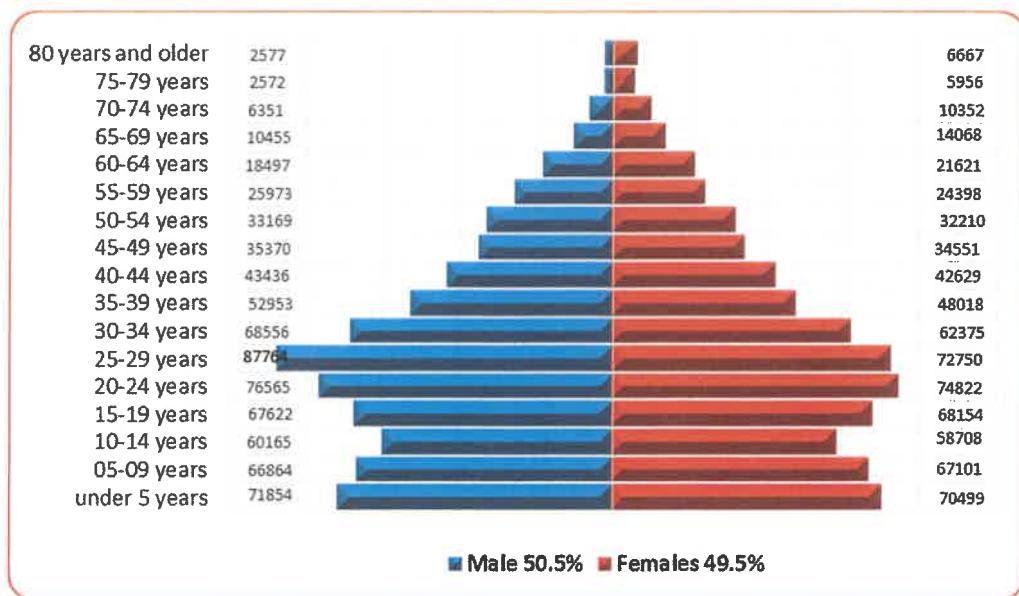

Figure 8: Nkangala District Municipality: Source CS 2016

### 4.5.1.2 Population by Geographic Distribution (Districts)

The table below shows that from 2001 to 2016, Mpumalanga Province recorded 28.8% of population growth. Nkangala District experience the highest population growth of 41.9%, which can be attributed to economic activities as discussed above. From 2016 to 2017, the province grew by 2.5%, whereas from 2017 to 2018, there was a 1.8 growth in the province. This illustrate that on average, a 2% growth should be expected annually in Mpumalanga Province.

(Source: Stats SA 2007: Census 2001, Community Survey 2007, and Census 2011-Midyear estimates 2017&18, CS 2016)

\* Mid-Year estimates only provide data at a provincial level

#### **4.5.1.3 Population by Geographic Distribution (Sub-Districts)**

The province comprises of 17 sub-districts municipalities as indicated in Table 4 below. From the year 2001 to 2016 (15 year period), Steve Tshwete Sub-district almost doubled the population size, with a percentage change of 95.2. This is as a result of a number of economic opportunities available at this sub-district. It is followed by Emalahleni Sub-District at a percentage change of 64.7 population growth from 2001 to 2016. Govan Mbeki and Victor Khanye Sub-Districts registered 53.4 and 49.7 respectively of population growth in a 15-year period, which affect access to health care services.

Only Chief Albert Luthuli Sub-District registered a negative population growth of -0.2. Dr JS Moroka and Pixley Ka Seme Sub-Districts grew by less than 10% for the period 2001 to 2016, as indicated in Table 4 below.

*Table 4: Population by Geographic Distribution (Sub-Districts) within the total population per municipality*

| Sub-District            | Population (Census 2001) | Population (Community Survey 2007) | Population (Census 2011) | Population (Community Survey 2016) | % Change from 2001-2016 |

#### **4.5.2 Socio-Economic Profile**

The Community Survey of 2016 (CS2016) depict Mpumalanga Province as the third most rural province in South Africa with 56% of its total population living in rural areas. The majority of the population resides in the former homelands of Kwa-Ndebele, Kwangwane and Lebowa, areas that have historically lagged behind in terms of development and delivery of basic services such as health and education.

Relative to other provinces, Mpumalanga's population base exhibits low economic activity and the poverty rate (with an index of 50.5%) is higher than the national average. It is estimated that approximately 23% of households in the province have no regular source of income, although the poverty headcount in Mpumalanga achieved a slight decrease from 7.9% in 2011 and 7.8% in 2016. A total of 273 886 of households in Mpumalanga reported that they had ran out of money in the last 12 months before the community survey of 2016 was conducted.

The table below indicates the urban and rural percentage of Mpumalanga Province versus that of South Africa. Whereas the majority of people in South Africa live in urban areas, most people in Mpumalanga Province reside in rural areas.

*Table 5: Rural vs. Urban Areas of Mpumalanga Province*

|             | 2016 Classification of Population |              |                |              |
|-------------|-----------------------------------|--------------|----------------|--------------|
|             | South Africa                      |              | Mpumalanga     |              |
|             | Frequency                         | Percentage   | Frequency      | Percentage   |
| Traditional | 18019427                          | 32.4         | 2127106        | 49.1         |

| Total       | <b>55653654</b>                   | <b>100.0</b> | <b>4335964</b> | <b>100.0</b> |

(Source: CS 2016)

Approximately 64% of people in South Africa live in urban areas, whereas only 44% of the people of Mpumalanga Province reside in urban areas. Of the 56% people living in rural areas, 88% live in traditional rural villages, while 12% live in farm areas. The impact of health services in these communities (rural and farm communities) needs to be investigated thoroughly to determine accessibility challenges, especially as this group constitute the majority in the province. Hence it is expected that the majority of these people in rural and farm communities rely on public healthcare facilities. At present, the Provincial Department of Health comprises of 33 hospitals and 279 Primary Health Care Facilities supplemented by the use of scheduled visits by mobile clinics (Annual Performance Plan, 2016/17).

## Climate change

Global climate change is arguably the greatest contemporary geographical challenge. Climate change, also called global warming, refers to the rise in average surface temperatures on Earth. It is a real threat to public health and to the advances made by South Africa in achieving the Millennium Development Goals (MDGs) as well as other key service delivery issues. Scientist believe that it will likely become more difficult in the future to address the potential serious health implications of climate change if efforts are not put into place currently to mitigate climate change, by reducing greenhouse gas emissions, as this has many health co-benefits and should be a top public health priority.

Climate change is currently affecting the health of populations and is projected to do so far into the future. Health effects of climate change include heat-related illness, pest- and waterborne diseases, air and water pollution and damage to crops and drinking water sources. Children, the poor, the elderly, and those with a weak or impaired immune system are especially vulnerable. For this reason, climate change needs to be considered a priority area when addressing health inequalities. This requires improving our public health infrastructure, disease surveillance, and emergency response capabilities.

## Access to basic services

The quality of life is a fundamental aspect of development and advancement of human societies, and often this quality of life is measured and expressed in terms of the availability of basic services in communities. Basic services such as electricity, water, sanitation, and refuse removal are critical services to improve the lives of people. Availability of these basic services greatly affects the supply of healthcare services to communities, and therefore needs to be considered when allocating healthcare resources. Five leading challenges facing the municipality presently as perceived by households by province, as percentage of all main challenges, CS 2016:

- 30.6% indicated lack of safe and reliable water supply;
- 13.2% indicated lack of / Inadequate employment opportunities;
- 11.4% indicated inadequate roads;
- 7.0% indicated cost of electricity;
- 6.8% indicated cost of water.

**Table 6: Percentage households with no access to improved sanitation**

| Main Type of Toilet Facility                                | Frequency | Percentage |
|---|-----------|------------|
| Flush toilet connected to a public sewerage system          | 1717273   | 39.6       |

**The tables above illustrates the severity of lack of basics services in the province.**

- One percent of the people in Mpumalanga Province still uses bucket toilets, while 5.8% either uses a different form of toilet system or do not have toilets;
- About 3.7% fetch water from river, dam, stream, well, spring or any other than the tap, which may expose people to a number of diseases;
- About 6.0% do not have refuse removal;
- About 6.8% have no access to electricity for lighting.

*Table 7: Percentage households with no access to electricity for lighting*

| Main Source of Water                        | Frequency      | Percentage   |

### **Reliance on Public Facilities**

As one of the rural province in South Africa with 56% residing in rural areas, the majority of the people rely on the provincial health facilities scattered throughout the province. The 2017 General Household Survey reveals that seven in every ten (71.2%) households in the country went to public clinics and hospitals as their first point of access when household members fell ill or got injured. More importantly was that the study found that 81.7% of households that attended public health-care facilities were either very satisfied or satisfied with the service they received compared to 97.3% of households that attended private health-care facilities. In addition to the health facilities as indicated on the table below, the province provide mobile health services to areas where there are no/fewer health facilities.

**Table 10: Public Health Facilities in Mpumalanga Province**

| District              | Hospitals                                    | Clinics            | Community Health Centres (CHCs) |

|                    |  | <b>287 PHC Facilities</b>    |                                 |
| <b>Grand Total</b> |  | <b>320 Health Facilities</b> |                                 |

The figure below shows the density of public health facilities in Mpumalanga Province, which comprises of a total of 320 health facilities, made up of 33 Hospitals and 287 PHC facilities. Ehlanzeni District where 41% of the people in Mpumalanga Province reside, has 42% of the PHC facilities, and 39% of Hospitals.

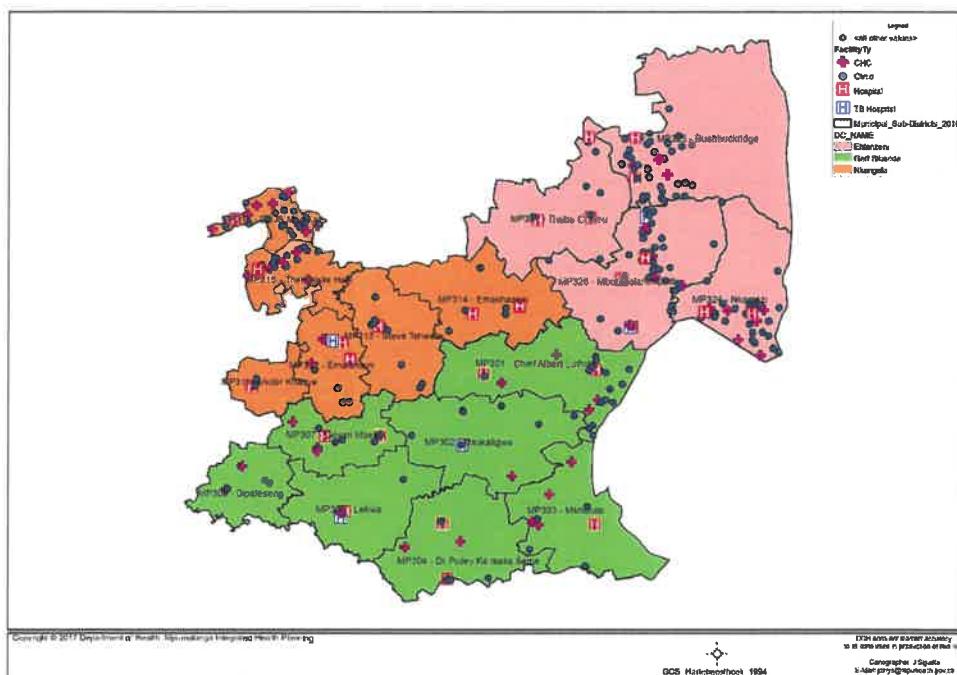

Figure 9: Mpumalanga Provincial Health Facilities

### Insured population and Unemployment Rate

The General Household Survey of 2017 by Statistics South Africa indicates that about seven in every ten households reported that they made use of public clinics, hospitals or other public institutions as their first point of access when household members fell ill or got injured. Approximately 16.9% of the people in South Africa belonged to a medical aid scheme in 2017. The leading barrier to private healthcare in South Africa continues to be the price. The millions of South Africans living without medical cover put increasing pressure on the public health system, and Mpumalanga Province is no exception.

## ANNUAL PERFORMANCE PLAN 2019/20

The Departmental Annual Patient Satisfaction Survey (APSS) of 2016/17 financial year shows that 84% of patients interviewed were without medical aid. Only 6% of the patients were users of medical aid (APSS 2016/17).

According to the Quarterly Labour Force Survey (Quarter 2: 2018 (Apr-Jun 2018), the official Unemployment rate for Mpumalanga Province stands at 33.2%, which represent a 0.9% increase from the same period last year. However, the expanded unemployment rate is at 41.7% which increased by 0.3% when compared with the same period last year. It is widely known that a higher unemployment rate represents a higher demand on public health care services. An increased unemployment rate translates directly into poverty. These poverty levels in the province, place a high demand on public health resources. As outlined in the World Health Organisation Commission on Social Determinants of Health, poor people and those from socially disadvantaged groups get sicker and die sooner than people in more privileged social positions. Income is a powerful predictor of health outcomes, but other social factors such as nutrition and diet, housing, education, working conditions, rural versus urban habitat and gender and ethnic discrimination determine people's chances to be healthy.

*Table 11: Unemployment Rate by Province*

|               | Official unemployment rate |              |                   |                   |                     | Expanded unemployment rate |              |              |                   |                     |

Source: StatsSA (Quarterly Labour Force Survey: Quarter: 2:2018)

\* According to the strict definition, only those people who take active steps to find employment, but fail to do so, are regarded as unemployed.\*\* The expanded definition, on the other hand, includes everyone who desires employment, irrespective of whether or not they actively tried to obtain a job.

### 4.5.3 Epidemiological Profile

Mpumalanga Province like the rest of the country faces a quadruple burden of diseases. HIV and AIDS, Tuberculosis, high Maternal and Child Mortality, Non-Communicable Diseases and Violence and Injuries continue to take a toll on the Province's citizens (StatsSA, 2018). Compounding on these unfavourable conditions, are adverse socio-economic determinants such as poverty and inadequate access to essential services such as electricity, proper sanitation and access to potable water.

This quadruple burden of diseases is occurring in the face of a reasonable amount of health expenditure as a proportion of the GDP (Gross Domestic Product). Available evidence indicates that South Africa spends 8.7% of its GDP on health which is significantly more than any other country on the African continent however, the health outcomes are much worse than those of countries spending much less than South Africa. Of the 8.7% of the GDP that is spent on health,

## ANNUAL PERFORMANCE PLAN 2019/20

4.5% is spent on 16% of the population, the well-to-do who have medical aid. The rest of the 84% of the population have to make do with the remaining 4.2% of the GDP. The South African health care system has been characterized as fragmented and inequitable due to the huge disparities that exist between the public- and private health sectors with regard to the availability of financial- and human resources, accessibility and delivery of health services.

There is still high inequity to provision of health care services where majority of the population relying on a public health care system, relative to the private sector serving approximately 16% of the population. The distribution of key health professionals between the two sectors is also skewed for example, the doctor patient ratio is as high as 1:4000 in the public sector while it is 1:250 in the private sector. The poor health outcomes can be attributed to a number of factors however, are evidenced through a decline in life expectancy in the country.

### LIFE EXPECTANCY

Though it was reported in the past that life expectancy in South Africa has been declining due to an increase in the number of HIV related deaths, Statistics South Africa indicates that life expectancy started to increase since 2005 for males and 2007 for females. For males, the life expectancy in South Africa was 61.4 in 2002 which increased to 64.5 in 2018. Whereas for females it increased from 68.3 in 2002 to 71.5 in 2018. The average life expectancy for South Africa in 2017 is 64.0 (Mid-Year Estimates, 2018). It is noted also that life expectancy has always remained high in females than males in all years by approximately 5.5 years in the last 5 years.

According to Statistics South Africa, the projected life expectancy for males in the province increased from 57.6 in the period 2011-2016, to 60.6 for the period 2016 to 2021. These projections show an improvement by 3.0 years for males. The projections for females show an improvement by 2.9 years, from 63.2 in the period 2011-2016 to 66.1 for the period 2016-2021. The average life expectancy for Mpumalanga Province increased from 60.4 in 2011-2016 period to 63.4 years for the period 2016-2021 (Mid-Year Estimates, 2018).

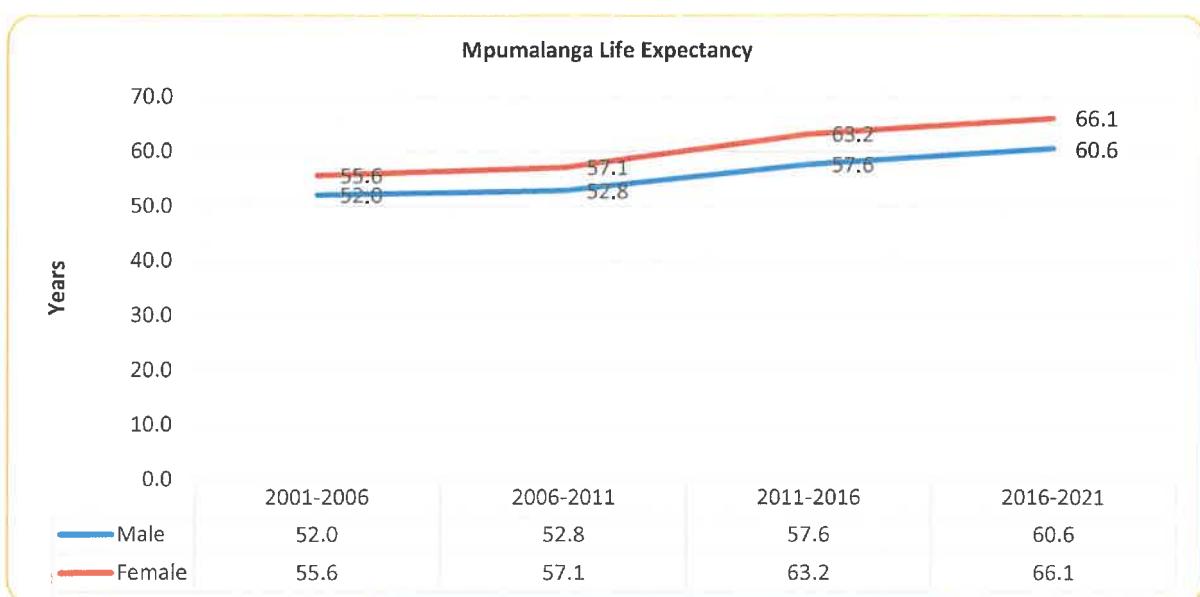

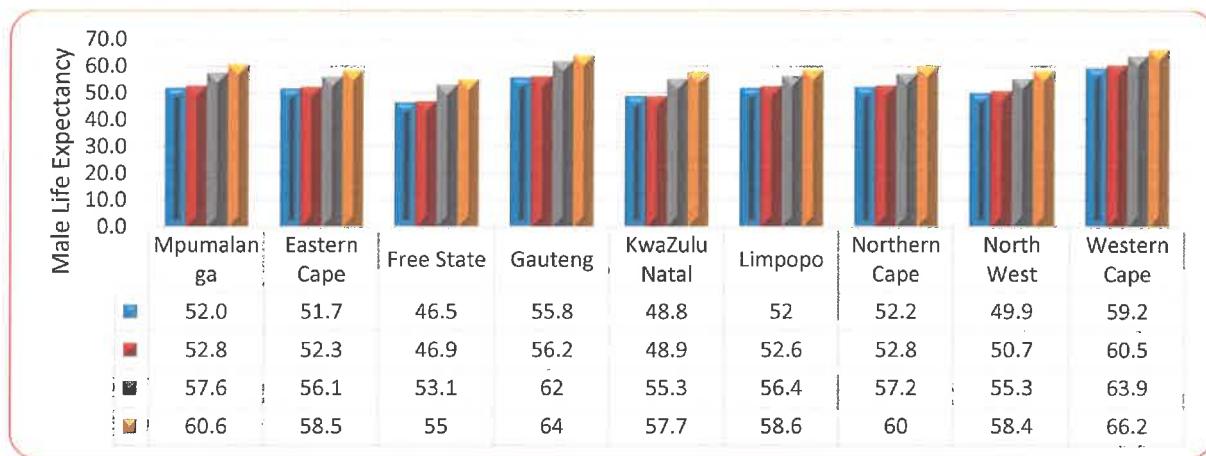

Figure 10: Illustrates life expectancy pattern since 2001 – 2021 (Source: Mid-year population estimates 2018 (StatsSA))

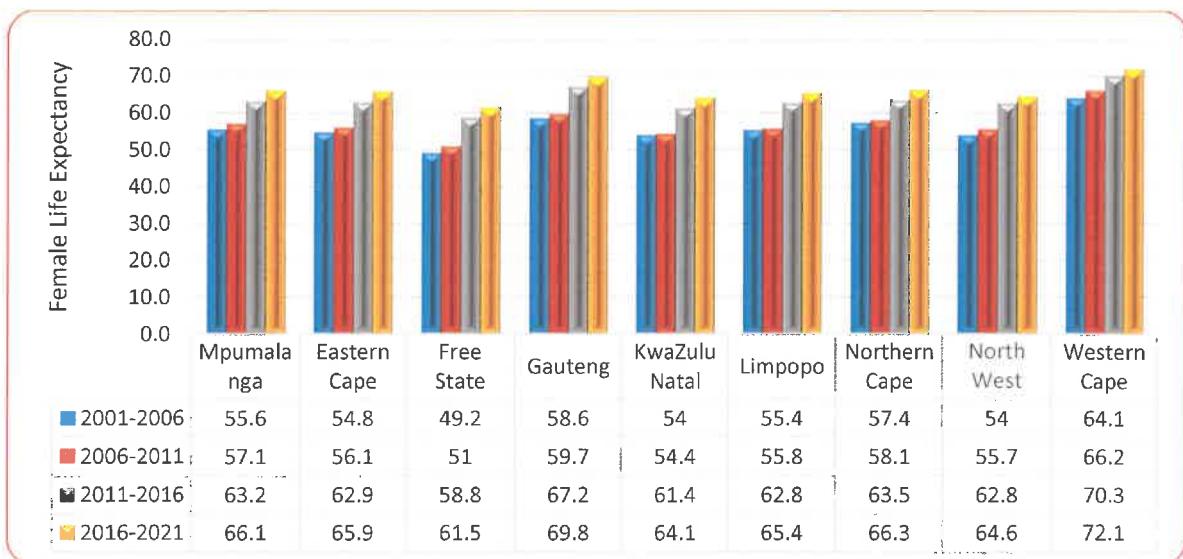

## ANNUAL PERFORMANCE PLAN 2019/20

With regard to life expectancy for males in South Africa, Mpumalanga has now the third highest life expectancy figure after Western Cape (66.2 years) and Gauteng (64.0 years), respectively. Free State province being the lowest on a life expectancy of 55.0 years, followed by KwaZulu Natal with 57.7 years. However, from the life expectancy period of 2011-2016 to 2016-2021, North West Province has the highest improvement figure of 3.1 years, followed by Mpumalanga with an improvement figure of 3.0 years.

**Figure 11: Males Life Expectancy**

The life expectancy for females figures place Mpumalanga as the fourth highest province where females live longer at an average of 66.1 years. Western Cape is the highest with an average of 72.1 years (2016-2021), followed by Gauteng (69.8 years) and Northern Cape (66.3 years) for the same period (Mid-Year Estimates, 2018). This shows that there has been an improvement as results of mainly ART rollout, Prevention of Mother-to-Child Transmission (PMTCT) programmes and other initiatives implemented by the department.

**Figure 12: Female Life Expectancy**

## Malaria High Risk Areas in South Africa

The Department resolution to fight malaria, is still on course. Malaria continues to contribute to the reduction in life expectancy and is associated with more than one million deaths per annum in Africa. High risk persons remain children under the age of five years, pregnant women & immune-compromised people (e.g. HIV, a person who has had a splenectomy, or who is on immunosuppressant medication). Most deaths occur in children under the age of five years. In South Africa, malaria control is exacerbated by management of the disease by our neighbouring countries.

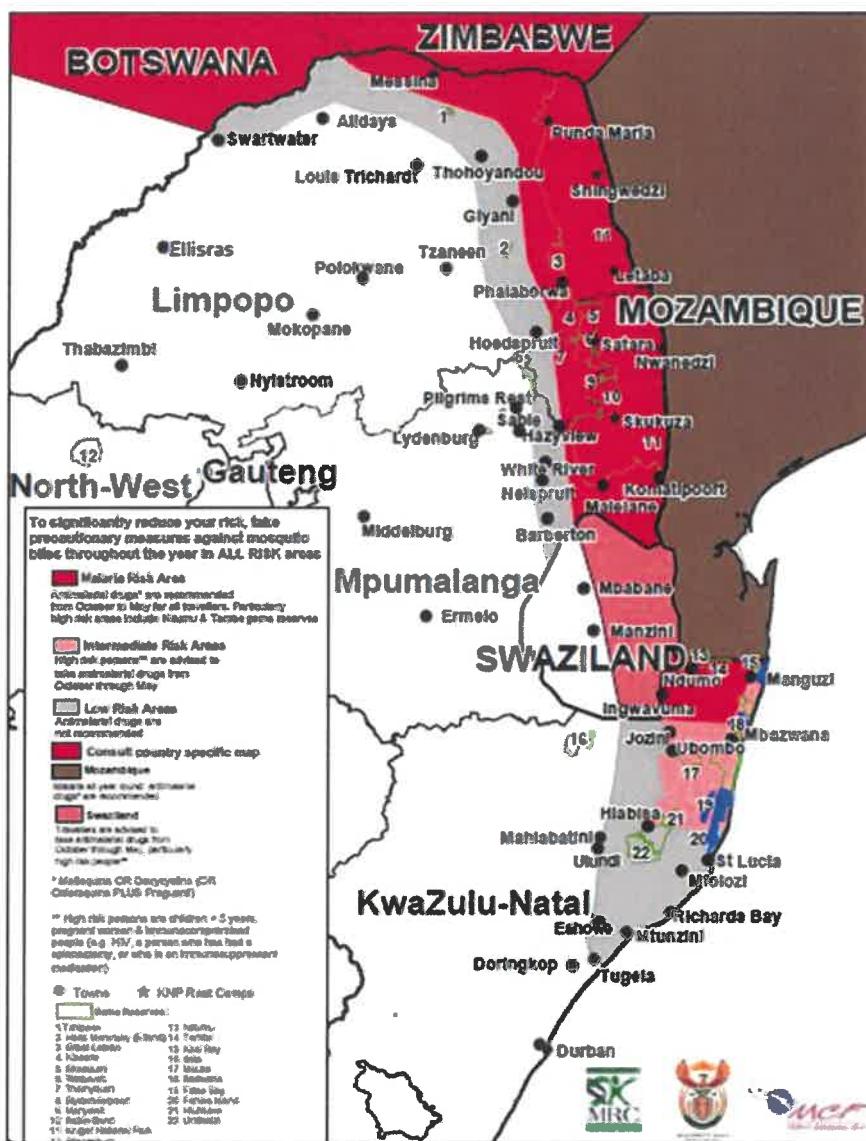

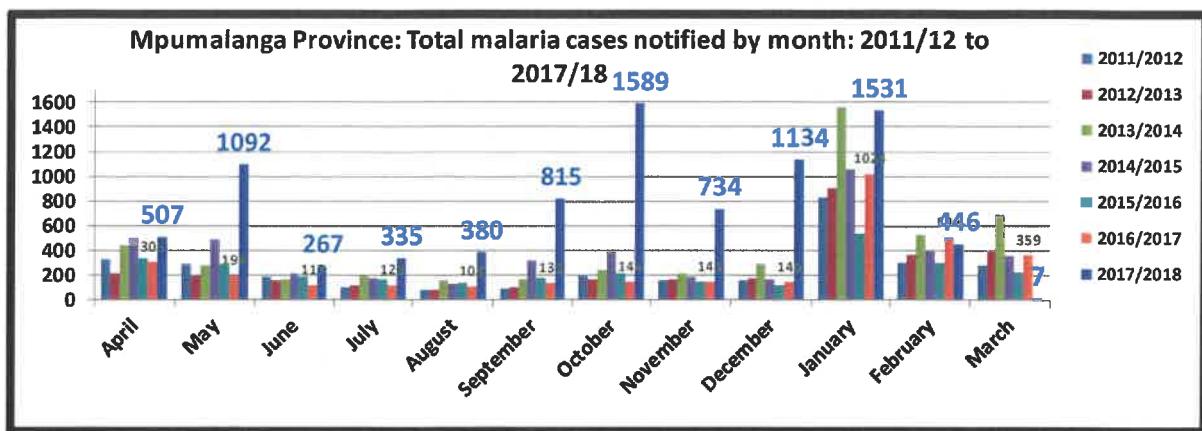

Figure 13: Malaria High Risk Areas in South Africa (Source: National Department of Health: 2018)

The figure above shows that Malaria in South Africa is present along the border with Zimbabwe and Mozambique. It is also found in Mopani, Vhembe, and Waterberg district municipalities of Limpopo Province; Ehlanzeni district municipality in Mpumalanga Province; and UMkhanyakude in KwaZulu-Natal Province. It is also present in the Kruger National Park. Although Mpumalanga is progressively doing well on the Management of Malaria, the 2017/18 financial year saw an increase in the number of malaria cases, majority of which emanated from neighbouring countries and the Limpopo Province. Malaria transmission normally occurs in October after the first rains with high peaks in January and February and waning towards May. An estimated 1,754,931 of the

## ANNUAL PERFORMANCE PLAN 2019/20

population is at risk of contracting the disease locally in Ehlanzeni District thus, affecting the five Ehlanzeni municipalities and Kruger National Park. Local malaria transmission is most intense in Kruger National Park areas, Nkomazi and Bushbuckridge Municipalities.

**Figure 14: Total malaria cases by month: 2011/12 to 2017/18 financial years (Source: MPDoH malaria statistics: 2018)**

## DIET-RELATED NON-COMMUNICABLE AILMENTS

Foods, diet and nutritional status can affect cardiovascular diseases, some types of cancer and diabetes. Scholars have demonstrated that diet-related non-communicable ailments such as obesity, diabetes and cardiovascular disease account for a large proportion of South Africa's disease burden, with approximately 2 out of 5 deaths in South Africa (RSA) attributable to non-communicable disease conditions (NCDs). Some 40% of NCD deaths among men and 29% among women are premature. One in four adults is obese and over half are overweight. Half of adults are physically inactive (WHO, 2016). Late detection of disease such as hypertension and diabetes results in increased costs, unnecessary suffering, and increased risk of death. In order to address this, the department will direct greater effort and resources towards prevention, screening and early detection as well as effective management to improve life expectancy and quality of life. Furthermore, researchers would be encouraged to proactively engage and monitor policy actions and conduct studies in order to build the evidence base, and communicate the full range of available evidence clearly and consistently to policymakers on diet-related non-communicable ailments.

## MATERNAL AND CHILD MORTALITY

Maternal mortality and morbidity in South Africa remains very high, and according to the 'Saving Mothers' report (2011 - 2013), about 26.7% of cases, the death was thought to have been *probably* avoidable and in a further 32.8%, the death was considered *possibly* avoidable. The South African National Strategic Plan for a Campaign on Accelerated Reduction of Maternal and Child Mortality in Africa (CARMMA) states that these deaths are related to community, administrative and clinical factors. The 'Saving Mothers Report' (2011-2013) further states that the "big 5" causes of maternal deaths were non-pregnancy related infections (NPRI) (34.7%, mainly deaths due to HIV infection complicated by tuberculosis (TB), Pneumocystis Pneumonia and pneumonia), obstetric haemorrhage (15.8%), complications of hypertension in pregnancy (14.8%), medical and surgical disorders (11.4%) and pregnancy related sepsis (9.5%, includes septic miscarriage and puerperal sepsis).

The data in the province shows a steady decline in the Maternal mortality ratio from 166.1 (2012) per 100 000 live births to 108 (2014) per 100 000 live births. The vision is to continue to reduce maternal mortality through the implementation of Provincial Strategy on Reduction of Maternal and Child Mortality (2013), to address clinical factors, and Re-engineer Primary Health Care to improve some of community and administration related factors and strengthen a functional referral system as responsive support system of hospitals. According to the Millennium Development Goals Report (2013) Child, under five mortality rates in sub-Saharan Africa were very high in 1990 due to the high rate of HIV/AIDS. However, in 2007, mortality rates in South Africa started to decline as a number of HIV prevention and treatment programmes were implemented. Owing to this decline in HIV infections and other factors, United Nations (UN) estimates show that under-5 mortality dropped between the years 2000 and 2011 from 74 to 47 per 1000 live births.

The trend in the province of the under-5 deaths has shown an upswing after years of steady downward trends. Child facility mortality rate increased from 5.5/1000 (2012/13) to 8.3 /1000 in 2014/15 Infant mortality also increased from 8.3/1000 (2012/13) to 12/1000. The Second Report of the Committee on Morbidity and Mortality in Children under 5 years (CoMMiC) (2014), reported that the cause of deaths of the under 5 had a quarter ( 25.3%) of the total reported deaths being due to neonatal causes, whilst gastroenteritis accounted for (15%) and acute respiratory infections (mostly pneumonia) (13%) Non-natural causes (6%), malnutrition (4%), congenital abnormalities (4%) and tuberculosis (2%).

The Department has identified six areas of priority to contribute to the reduction of child mortalities:

- The promotion of early and exclusive breastfeeding, including ensuring that breastfeeding was made as safe as possible for HIV-exposed infants;
- The resuscitation of new-borns;
- The care for small or ill new-borns according to standardised protocols;
- The provision of initiatives for Prevention of Mother to Child Transmission (PMTCT);
- Kangaroo Mother Care (KMC);
- Post-natal visits within six days of childbirth.

## **HIV PREVALENCE**

The Department conducted the 2014-15 and 2017 Antenatal HIV Survey, however the results of these survey are still embargoed (have not yet been signed-off by the Health Minister). As such the Department uses the 2013 Antenatal HIV Survey results for its planning purpose.

The HIV epidemic in the country has a profound impact on society, the economy as well as the health sector and contributes to a decline in life expectancy, increased infant and child mortality and maternal deaths as well as a negative impact on socio-economic development. The National Antenatal Sentinel HIV and Syphilis Prevalence Survey which is being conducted annually for the past 23 years, is being used as an instrument to monitor the HIV prevalence trends since 1990. Prevalence usually reflects the burden of HIV on the health care system and changes (increases) may be the cumulative effect of many factors that may work individually or collectively to drive the epidemic.

## ANNUAL PERFORMANCE PLAN 2019/20

In 2013, the provincial HIV prevalence amongst antenatal women was 37.3% a slight increase from 35.5% in 2012. This is the highest recorded figure so far in the province. The Mpumalanga HIV epidemic graph from 1990 to 2013 is shown in the figure below.

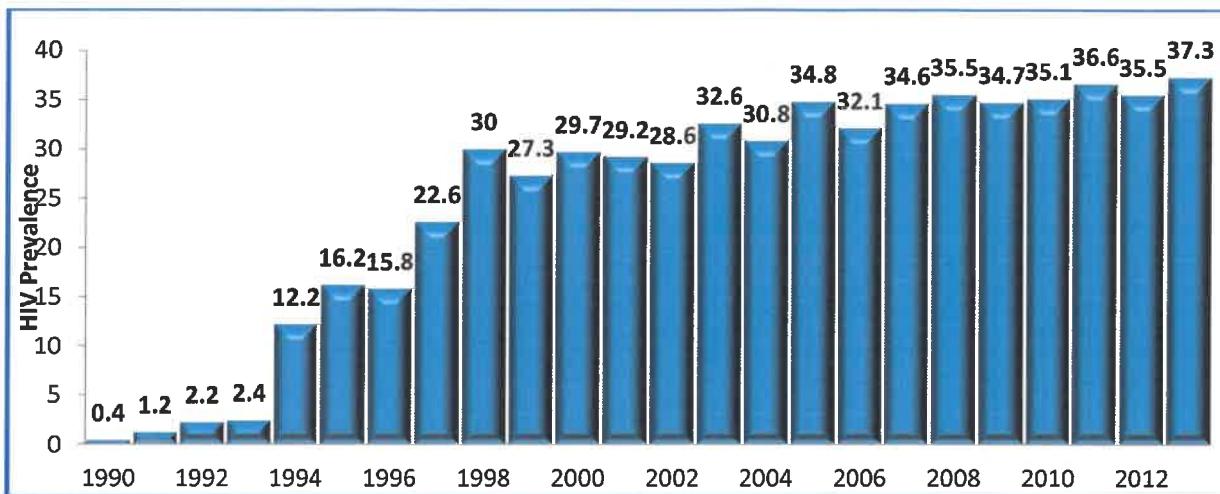

Figure 15: Mpumalanga HIV Epidemic Graph 1990 – 2013 (Source: Mpumalanga Antenatal Sentinel HIV and Syphilis Prevalence Survey in Mpumalanga, 2013)

All three districts in Mpumalanga Province have shown an increase in the HIV prevalence from 2012 to 2013. The highest HIV prevalence is located in the Gert Sibande District with prevalence of 40.5% an increase of 0.5%, followed by Ehlanzeni and Nkangala with a prevalence of 37.2% and 34.5% respectively.

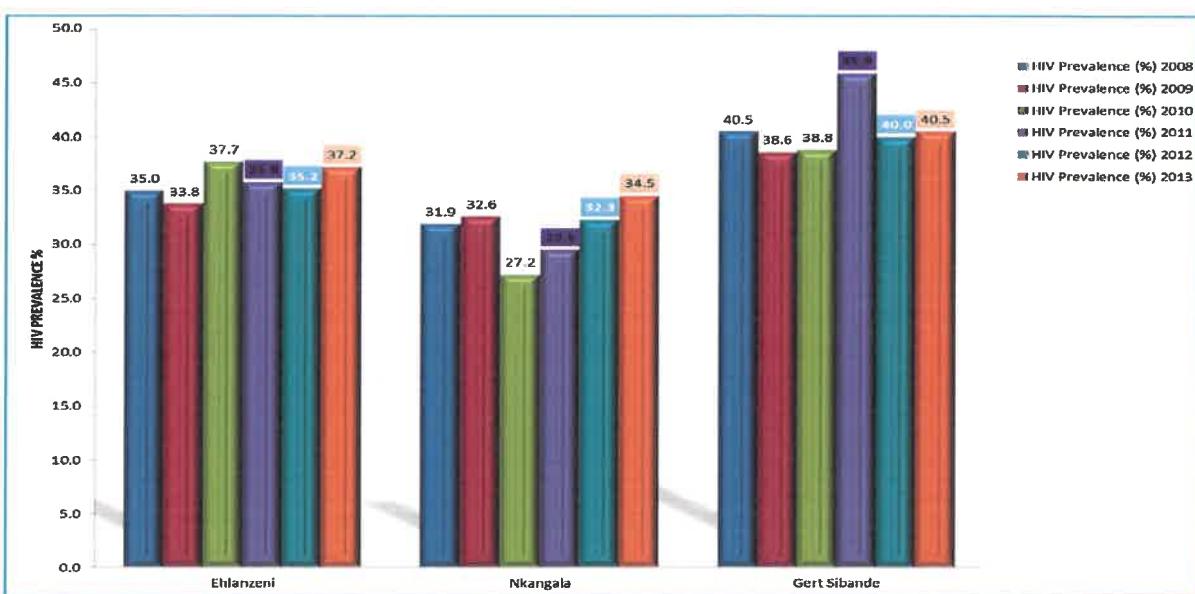

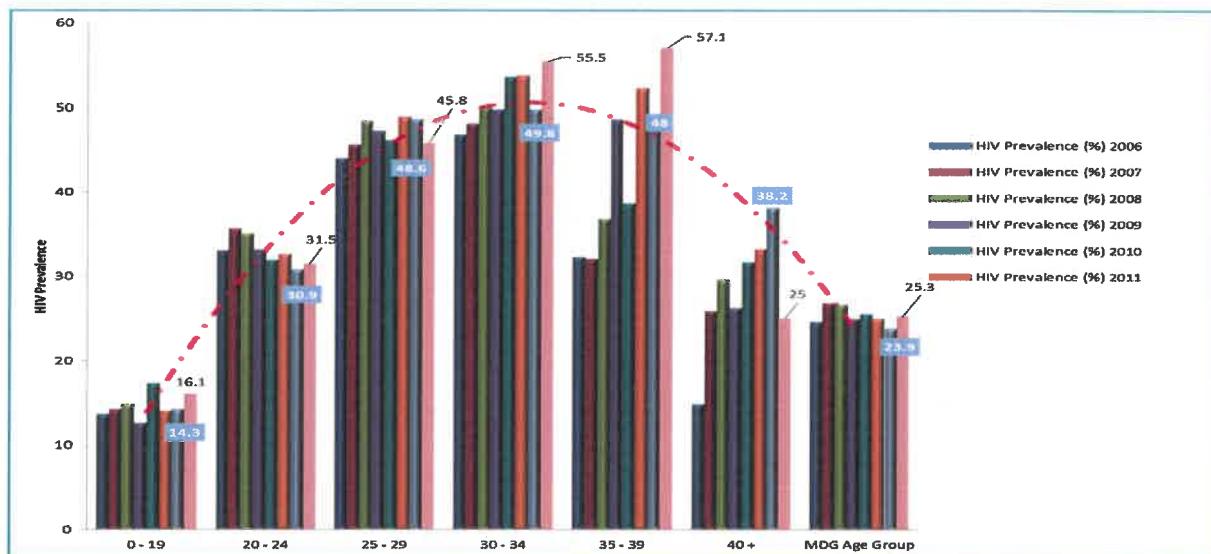

Figure 16: Mpumalanga HIV Epidemic Graph by District: 2008 – 2013 (Source: Mpumalanga Antenatal Sentinel HIV and Syphilis Prevalence Survey in Mpumalanga, 2013)

## ANNUAL PERFORMANCE PLAN 2019/20

In Mpumalanga, the age distribution of pregnant women who participated in the survey, ranged from 15 – 49 years old with some few outliers. The majority of the survey participants were teenagers and young women (15-24 year olds). In 2013, the HIV prevalence among 15-24 year olds (Millennium Development Goal 6, Target 7) is showing a slight increase from 23.9% in 2012 to 25.3% in 2013 (see figure below). HIV prevalence among the age group 15-19 also increased by 2% in 2013 from 14.3% in 2012 to 16.1% in 2013.

**Figure 17: Mpumalanga HIV Epidemic Graph by Age group: 2006 – 2013 (Source: National Antenatal Sentinel HIV and Syphilis Prevalence Survey in South Africa, 2010 – 13)**

Since the last Antenatal HIV Survey results of 2013, it was observed that the HIV prevalence has reached a plateau, with the prevalence expected to remain the same or begin to decline owing to the robust number of initiatives the department has embarked on, which include the campaign programs, distribution of condoms, and the availability of ARVs.

## TB MANAGEMENT

According to the World Health Organisation (WHO) 2016 report, South Africa is listed amongst the high burdened countries for TB, TB/HIV and MDR-TB as per the diagram below.

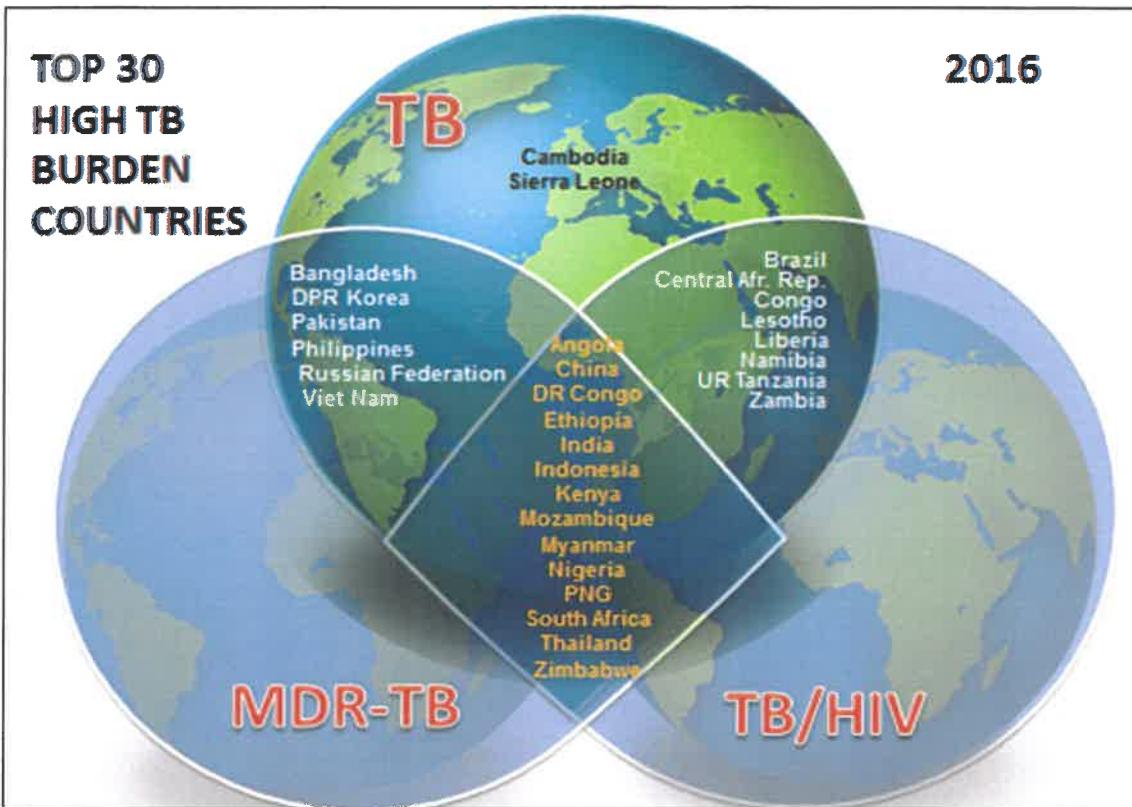

Figure 18: TB, MDR-TB and TB/HIV: Source: 2016 Global TB Report - TB, MDR-TB and TB/HIV.

Tuberculosis is a medical condition linked to social problem and poverty. Crowded informal settlements compounded by low-socio economic status provide fertile ground for breeding TB infection and disease.

TB (MDR and XDR) have increased significantly due to late detection or presentation, poor management and failure to retain TB patients on treatment. The combination of TB, HIV and DR TB has led to a situation where TB is the number one common cause of death among infected South Africans, this includes Mpumalanga Province.

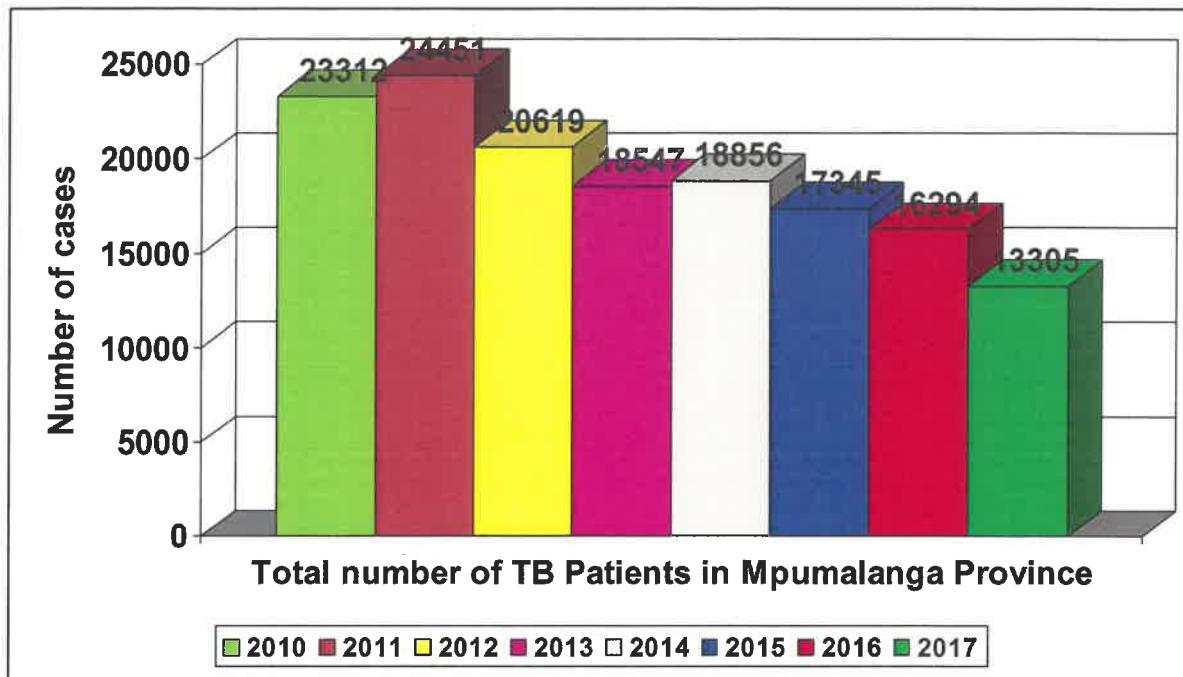

Figure 19: TB patients in Mpumalanga Province (Source: Mpumalanga TB Database (ETR.Net))

According to the graph above, Mpumalanga has a decline in TB case finding leading to fewer patients diagnosed and initiated on treatment. The highest TB patients were 24451 in 2011 which has declined to 13305 in 2017, and TB treatment success rate improved from 78.3% in 2010 to 87.1% in 2016.

This therefore requires the department to intensify TB screening and testing, diagnosis, treatment initiation and adherence counselling, efficient tracing of TB contacts and improved quality of recording and reporting.

### **Mpumalanga 10 Leading Underlying Natural Causes of Death**

In South Africa, tuberculosis remained the main leading cause of death in the three-year period, although the proportion of deaths due to TB declined in the three-year period from 8.3% in 2014 to 6.5% in 2016. Diabetes mellitus became second most common natural cause of death and maintained the same position in 2016, being responsible for 5.5% deaths. The top two were followed by other forms of heart disease, ranked 3 on 5.1%, then Cerebrovascular diseases moved to position four in 2016 and was responsible for 5.1% deaths while human immunodeficiency virus (HIV) disease which was the sixth leading cause of death in 2014, moved to the fifth position in 2015 and 2016 responsible for about 5% of all deaths in all the three years (StatsSA, 2018).

In Mpumalanga Province, the "Findings of the Mortality and Causes of Death in South Africa Report, 2016 released by Statistics South Africa depict tuberculosis as the most commonly mentioned cause of death on death notification forms accounting for 9.5% of death. It is followed by Influenza and pneumonia at 5.0%, other viral diseases at 4.7%, and HIV at 4.7%, with cerebrovascular diseases at 4.1%. This is represented in Table 11 below.

In the districts, tuberculosis is the leading cause of death at Ehlanzeni and Gert Sibande Districts, while it is important to take note of Diabetes mellitus as the fourth leading cause of death in all the districts of Mpumalanga Province. At Nkangala District, HIV was the ninth cause of deaths in 2016 (see table below).

## ANNUAL PERFORMANCE PLAN 2019/20

**Table 12: The ten leading underlying natural causes of death by district municipality of death occurrence, Mpumalanga, 2016\***

| Ehlanzeni  |      |               |              | Gert Sibande   |      |              |              | Nkangala   |      |               |              |
|--|------|---------------|--------------|--|------|--------------|--------------|--|------|---------------|--------------|

\*Excluding cases with unspecified district municipality.

\*\*Including deaths due to MDR-TB and XDR-TB

### Mpumalanga Leading Underlying Non-natural Causes of Death

The table below shows the underlying non-natural causes of death for 2009, 2010, 2014 and 2016 in Mpumalanga Province (StatsSA, 2018). It is observed that Mpumalanga had 11.5% of deaths due to non-natural causes in 2016, with the most common cause of non-natural deaths being other external causes of accidental injury, which accounted for 78.1% of all un-natural deaths in the province. Transport accidents came second at 12.9%, which is a slightest increase of 1.5% compared to 2014 underlying non-natural causes of death. These causes of un-natural deaths were followed by assaults which accounted for 5.2% of deaths, a percentage increase from the 2014 underlying non-natural causes of death.

## **DEPARTMENTAL RATING ON MANAGEMENT PERFORMANCE ASSESSMENT TOOL (MPAT)**

The Department was assessed on the following four key performance areas (KPAs):

- KPA 1: Strategic Management
- KPA 2 governance and Accountability
- KPA 3: Human Resource Management
- KPA 4: Financial Management

The Department has recently participated in the MPAT Version 1.8. The Department has identified the following gaps and is currently developing the action plan to address the identified gaps:

## ANNUAL PERFORMANCE PLAN 2019/20

| Standard Name  | Identified Gaps   | KPA 1: Strategic Management   | Interventions |
|--|---|---|---------------|
| 2018/19 Annual Performance Plan                                  | None  |   | None          |
| Integration of Performance Monitoring and Strategic Management   | None  |   | None          |
|  |   | <b>KPA 2: Governance and Accountability</b>   |               |
| Assessment of policies and systems to ensure professional ethics | None  |   | None          |
| Assessment of financial disclosures                              | Experienced challenges with network at some facilities and employees were unable access to the eDisclosure system | ICT at Provincial Office was notified and officials will be allocated as part of the team during visits to support officials. |               |
| Anti- corruption and ethics management                           | Lack of capacity to conduct ethics and corruption risk assessment   | Engage DPSA and OTP (PACCC) to provide guidance and support on conducting an ethics and corruption risk assessment.           |               |
| Assessment of risk management arrangements                       | None  | None  |               |
| Corporate governance of ICT                                      | None  |   | None          |
|  |   | <b>KPA 3: Human Resource Management</b>   |               |
| Human Resource Planning  | No co-ordination and linkage of the HR Plan, MTEF Budget and Strategic Plan of the Department.                    | Link the HR Planning to the MTEF budget   |               |
|  | Lack of support on the development of the HR Plan by Program Managers   | Source and encourage support of all stakeholders.   |               |
|  | Non-compliance to deadline on submission of the HR Plan and HR Plan Implementation Report to OTP and DPSA         | Adhere to deadlines for submission of reports.  |               |
| Organisational Design and Implementation                         | Outdated organizational Structure   | Fast-track the development of the Organizational Structure.   |               |
|  | Delays in the consultation process and submission of inputs by relevant stakeholders                              | Adherence and implementation of the resolutions.  |               |
|  | Lack of consistency of implementation of Resolution   |   |               |
| Application of recruitment and retention processes               | Outdated Recruitment and Retention Strategy   | Review the Recruitment and Retention Strategy.  |               |
|  | Non-compliance to conducting and analysis of the exit   | Establishment and appointment of the Exit   |               |

## ANNUAL PERFORMANCE PLAN 2019/20

| Standard Name  | Identified Gaps   | Interventions   |
|--|---|---|
|  | Questionnaires<br>Non-appointment of Exit Interview Committees  | Committee members.<br>Use of the standardized DPSA format for Exit Interview Questionnaires.  |
|  | Use of a non-standardised Climate (Staff Satisfaction) Survey Questionnaire   | Alignment of the Climate Survey Questionnaire to the DPSA questionnaire.  |
| Approved EA and HOD delegations  | Delays in the HR processes resulting from limited HR Delegations<br>Unavailability of EA to HOD HR Delegations  | Review the HR Delegations and conduct a workshop on thereof.  |
| Implementation of Level 1-12 Performance Management System                 | Lack of understanding of the implementation process   | Monitoring and evaluation of the implementation of the HR Delegations.  |
| Implementation of SMS Performance Management System                        | Lack of optimum compliance by all SMS   | Ongoing training on PMDS for supervisors and supervisees  |
| Implementation of Performance Management System for HOD                    | Delay in feedback from OTP  | Continuous training of the SMS with OTP   |
| Management of disciplinary cases   | Shortage of staff at Facility level<br>Delays in finalization of disciplinary case  | Request support from OTP  |
| Management of Performance Management System for HOD                        | Shortage and non-availability of presiding officers in the Department   | Prioritize the filling of posts<br>Appointment of personnel to fast track all cases<br>Conduct training of Investigating and Presiding Officers                                 |
| <b>KPA 4: Financial Management</b>   |   |   |
| Demand Management  | Lack of approved demand plan<br><br>Lack of commodity sourcing strategy   | Demand plans will be developed for implementation in 2019/20 financial year.<br><br>Commodity sourcing strategy will be developed for implementation in 2019/20 financial year. |
| Logistics management   | Unavailability of inventory analysis report..<br><br>Customer surveys on inventory are not conducted.   | Conduct quarterly inventory analysis.<br><br>Conduct bi-annual customer surveys.  |
| Movable Asset management   | Department does not have an Asset Management Plan linked to the MTEF budget.<br><br>Department does not periodically review the asset-management strategy\ policy | The Department will develop an asset management Plan for 2019/20 financial year<br><br>Asset Management policy will be reviewed.  |
| Payment of suppliers   | The Department does not implement an invoice tracking system  | The Department will track invoices on a monthly basis.  |
| Management of unauthorised, irregular, fruitless, and wasteful expenditure | The Department does not have evidence of disciplinary action taken against negligent officials or condonation   | The Department will improve record management on cases already dealt with and   |

## ANNUAL PERFORMANCE PLAN 2019/20

| <b>Standard Name</b>  | <b>Identified Gaps</b>  | <b>Interventions</b>   |
|-----------------------|---|--|
| Payroll certification | of unauthorised, irregular, fruitless and wasteful expenditure<br>Pay sheet certification process is in place | reports will be provided.<br>The Department will develop a SOP on payroll certification. |
|                       | Pay sheet certification process is fully implemented on a monthly basis                                       | The Department will implement a SOP on payroll certification.                            |

## 4.6 ORGANISATIONAL ENVIRONMENT

### 4.6.1 Organisational Structure and Human Resources

The Department is currently reviewing the approved organizational of 2010 in order to be aligned and respond to the current service delivery platform. The review and alignment of the organizational structure aimed at ensuring that the structure is aligned to policy changes new programmes introduced mandated by the NDOH. The Department is currently developing the interim normative guides for implementation by the hospitals while awaiting the finalization of staffing norms for district hospitals by the National Department of Health. The Organisational Structures for the PHC facilities will be aligned to the WISN results to determine the number of the required human resources.

The branch Financial Management was revised through the process of organizational redesign and development and was consulted with the Office of the Minister of Public Service and Administration. The Department currently prioritized the creation of Mental Health Unit in selected hospitals within the province.

The post provisioning of the newly established Primary Health Care facilities is aligned to the Workload Indicators of Staffing Need (WISN) normative guide which ensures that there is equitable distribution of human resource throughout the Department of such health facilities.

This re-alignment process is aimed at better positioning and strengthening the Human Resource Health capacity of the Department and to implement on its mandate as well as the National Development Plan 2030.

The implementation of these alignments will evolve throughout the MTEF period.

The department's strategic objectives are implemented by the following programmes

- 1) Programme 1: Administration
- 2) Programme 2: District Health Services
- 3) Programme 3: Emergency Medical Services
- 4) Programme 4: Provincial Hospital Services
- 5) Programme 5: Tertiary Hospital Services
- 6) Programme 6: Health Sciences and Training
- 7) Programme 7: Health Care Support Services
- 8) Programme 8: Health Facilities Management

Due to the fiscal constraints, the department's budget has been reduced over the 2016/18 MTEF period. As a result, the Department has introduced a number of cost containment measures to ensure that it remains within the allocated funds.

The Departmental Performance against the Provincial Human Resource Plan is outlined as follows:

- Current staff compliment (See Table A2 below)
- Accuracy of staff establishment at all level against service requirements. The Department has identified the inaccuracy in the staff establishment since the organisational structure is under review and there has been posts that were filled as a result of service delivery needs. The proposed organisational structure has taken consideration of new policy initiatives.
- Staff recruitment and retention systems and challenges

The Department is experiencing an acute shortage of Health Professionals. Recruitment of health professionals in rural areas remains a challenge.

## ANNUAL PERFORMANCE PLAN 2019/20

The Department has prioritised 558 and 333 critical posts to be filled during the 2018/19 financial year as a result of budgetary constraints. These include the posts that have been prioritised in the Annual Performance Plan. The Department will not be able to retain health professionals that are non-bursary holders on completion of the one year compulsory community service. The Department envisages to replace those employees that will be vacating posts with effect from 01 June 2018 since those posts are funded.

The following initiatives were introduced during 2015/16 financial year:-

- Training of twenty three (23) Registrars
- Post Basic training for 143 nurses
- Ten (10) medical students have been sent to study in Cuba.
- Fifty-three (53) medical students have been sent to Russia to train as doctors.

Placement of different categories of health professionals in community service posts is prioritised for the rural facilities on a yearly basis and most of them are bursary holders who are retained on completion of community service since they have contractual obligation.

- Absenteeism and staff turnovers

The Department will engage in the process of analysis of leave taken in order to be able to come up with the absenteeism rate.

Further, more the Department has taken an initiative to conduct an analysis on the exit questionnaire to determine the impact of increased staff turnover rate and come up with an appropriate recruitment and retention strategy.

## ANNUAL PERFORMANCE PLAN 2019/20

**TABLE A2: HEALTH PERSONNEL IN 2018/19**

| Occupational Class  | Number employed | % of total employed | Number per 100,000 people | Number per 100,000 uninsured people <sup>2</sup> | Vacancy rate <sup>5</sup> | % of total personnel budget | Annual cost per staff member |

## ORGANISATIONAL STRUCTURE

#### **4.6.2 Improve Financial Management**

The Department has received qualified audit opinion with improvement in terms of issues from previous financial years. The plans to improve the financial management emanates from the following challenges:

1. Non-compliance with laws and regulations
2. Weaknesses in control environment
3. Inadequate capacity building for the existing finance staff

Plan in addressing the above mentioned challenges are as follows:

1. Finance managers forum has been established and meeting will be held to share best practises
2. Trainings will be held to address other issues identified in SCM, Assets Management, Expenditure Management, etc.
3. Checklists will be reviewed within finance management to ensure compliance with latest laws and regulations
4. Internal Control unit will be assist to execute the monitoring the internal controls within the districts and hospitals

#### **4.6.3 Strengthen Information Management**

Health information management is one of the fundamental support functions to measure the delivery of health care services. It is key to decision making, monitoring & evaluation and reporting.

Auditing of Performance information against its Predetermined Objectives (AOPO) is one of the significant processes to test the usefulness and reliability of performance information effectiveness against monitoring & evaluation and reporting.

In the Financial year 2017/18, The AGSA findings for auditing of performance information outcomes revealed serious concerns on reliability of performance information arising from PHC facilities resulting in a "Disclaimer for Programme 2. There is significant improvement in Programme 4 with audit outcome at Unqualified Audit Opinion. The contributory factor on Programme 2 audit outcome is due to lack of Records Management System. There are many of Patient files which could not be submitted for audit resulting in Limitation of Scope. Some of the files in the PHC facilities are Patient held, compromising validity and completeness of performance information. As the Department, there is a need for alternatives to ensure that Patient files or source of data remain in the facility. The good practice method that the department needs to learn from all NHI facilities in Gert Sibande which performed well on Validity and Completeness of Performance Information.

The Department is implementing a National Health Patient Registration System and DHIS 2 web-based through the eHealth Strategy. This project was initiated in the NHI piloting district, Gert Sibande District to improve management of performance information and audit outcome. All PHC facilities in Gert Sibande are implementing eHealth Strategy (ePHC 700 project). The Department has rolled out these systems to Ehlanzeni and Nkangala Districts. The Department will also be implementing the Stock Visibility System (SVS) and RX Solution for drug management in PHC facilities and hospitals, respectively.

#### **4.6.4 Infrastructure Delivery**

The partnership between National and Mpumalanga Department of Health has yielded positive results in construction of 22 consultation rooms for doctors in the National Health Insurance pilot district. Furthermore this partnership has contributed to the renovations of Middelburg Hospital Nursing accommodation, Amajuba Hospital, Carolina Hospital, Evander Hospital, Elsie Ballot Hospital and Standerton Hospital which will be completed in the 2019/20 financial year. Over and above these projects, the Department together with National DOH is constructing the four (4) of the eight (8) PHC facilities which are, Nhlatzatse 6, Vukuzakhe, Oakley, and Pankop Clinics. The remaining four (4) facilities are planned to start with construction in 2019/20 financial year. These PHC facilities are KaNyamazane, Ehandukunya, Msukaligwa and Balfour CHCs

The Infrastructure Unit has improved in the planning and implementation together with the Implementing Agent, Department of Public Works, Roads and Transport. The Department is currently undertaking the following major infrastructure projects such as construction of Bethal, Mmametlhake, New Middelburg and New Mapulaneng Hospitals.

### **4.8 REVISIONS TO LEGISLATIVE AND OTHER MANDATES**

The National Department of Health has recently approved a new policy for youth health care services, National Adolescent and Youth Policy 2017 that aims at addressing the health challenges faced by youth in the country.

The National Health Council has approved the National Policy on Commuted Overtime for Medical Practitioners to ensure that there is uniformity in the application of commuted overtime by different provinces.

In South Africa, all people diagnosed HIV-positive are eligible to start ARV treatment regardless of their CD4 count levels. The country is among the first countries to formally adopt Universal Test and Treat initiative in accordance with the World Health Organization (WHO) new guidelines on HIV treatment. Universal Test and Treat (UTT) directly supports UNAIDS 90 90 90 targets of ensuring that 90% of all people living with HIV know their HIV status, 90% of people with diagnosed HIV infection receive sustained antiretroviral therapy and 90% of all people receiving antiretroviral therapy have viral suppression. South Africa embraces UTT to complement case finding and rolling out strategies that are reflected in the revised 2016 national HTS policy the 2016 HIV disclosure guidelines. Key to success of UTT is implementation of the national Adherence policy and service delivery guidelines interventions for linkage to care, adherence to treatment and retention in care.

### **4.9 OVERVIEW OF THE 2018/19 BUDGET AND MTEF ESTIMATES**

The Department shows a health growth on the service delivery programmes namely; District Health Services, Emergency Medical Services, Provincial Hospital Services and Central Hospital Services over the seven-year period. In 2017/18, a substantial increase is seen in Health Facility Management due to the resolution taken by the country to invest in infrastructure and the budget is responding it. The department has projected an overspending on all programmes due to pressure on current budget resulting from accruals carried over from 2017/18

*Programme 1: Administration* The high increase in 2017/18 due to once off projects funded during the budget adjustment that include litigations and back up for ICT as well as addressing pressure on audit cost, computer services-payment of Microsoft licence and legal cost. The negative growth

in 2018/19 due to non-maintenance litigation, legal cost baseline and reduction in non-essential items.

*Programme 2: District Health Services* shows an incline in 2017/18 due to appointments of the 551-priority post, rank translations, absorption of community services nurses and doctors and pressures on medicine especial ARV and laboratory. The health growth in 2018/19 caters for the carry-through effect of the above appointments, increase of the HIV/AIDS Grant allocation, funding ideal clinics, high growth on insecticides for Malaria and conversion of HPV (Human Papilloma Virus) into a direct Grant and

*Programme 3: Emergency Medical Services* in 2017/18 the increase is due to procurement of a high number of ambulances and planned patient motor vehicles to replace the old fleet backlog and appointment of staff. The growth in 2018/18 relates to planned patient take-over project that will decrease fuel and maintenance cost due to coordinated trips.

*Programme 4: The Provincial Hospital Services* the incline in 2017/18 relates to appointment staff on 551 Priority post rank translations, absorption of community services nurses and doctors and payment of exit costs. The growth in 2018/19 is to cater for the carry-through effect of the prior year's appointments and for growth in key accounts.

*Programme 5: Central Hospital Services* consists of Rob Ferreira Hospital and Witbank Hospital budget, and benefits from the National Tertiary Services grant. In 2017/18, the programme incurred an unauthorized expenditure on payments for overtime, renal dialysis and medical supplies. The health growth in 2018/19 addresses the pressures in key accounts and non-negotiables.

*Programme 6: Health Science & Training* will decrease in the 2017/18 financial year budget is due to the efficiency gains from change of funding methodology for the nursing college from paying a salary to a stipend and reprioritization on goods and services to key accounts on service delivery programmes. The growth in 2018/19 relates to the increased funding of HWSETA and catering for nursing students to cater for accruals as well as inflation.

*Programme 7: Health Care Support Services* the spike in 2017/18 is due to an increased allocation of centralized medical equipment in engineering in an attempt to address the dire need in hospitals and is maintained throughout the 2019/20 MTEF.

*Programme 8: Health Facilities Management* the high incline in 2017/18 relates to the construction of new hospitals Mapulaneng and Middelburg hospital, and upgrade of Bethal hospital and Mammetlake on equitable share. The rest of the building and other fixed structures projects are funded through Heath Facility Revitalisation grant. The projected overspending in 2017/18 revised estimate is relates to the pressure on capital project due to accruals from 2017/18.

## 4.9.2 RELATING EXPENDITURE TRENDS TO STRATEGIC GOALS

*Compensation of Employees* – shows an increase of 10 per cent due to the need to appoint additional personnel in 2019/20 FY. The Department has received a new grant, which is aimed at improving personnel level in various health facilities. A budget of R41 million was allocated in the 2019/20 FY for this purpose. The Department has further receive additional funding for the operationalization of Bethal and Mmametlhake hospital which were upgraded in the previous financial year. The Nursing College will appoint additional personnel for the insourcing of catering services for students.

The annual appointment of Bursary Holders also results in the increase in the annual Compensation of employee. The Department will be able to sustain the personnel number with the 10 per cent growth provided in the budget. Various cost efficiency projects will be implemented in order to reduce health costs.

*Goods and Services* – budget has not increased but shows a decline of 2 per cent. The decline is a result of recurring accruals and payables of the previous financial years. The Department will have difficulties to sustain payments until the end of the financial year as a result. Key Accounts and Non-negotiables could not be fully funded as result of a declining budget for operational activities. The Department will continue to intensify efficiency measures and internal controls to reduce health costs and provide sustainable health essential services to the community.

*Transfers and subsidies* - the budget decrease was due to inability to fund litigations and increase stipend for CHWs for the home base care Organizations. The Department will continue to implement the litigation strategy in order to reduce payment of high litigation, which may lead to bankruptcy of the Department.

*Payments of Capital Assets* –budget has decreased by 3 per cent due to a high investment made in 2018/19 FY on infrastructure and procurement essential equipment. The Department will continue to procure medical equipment and the replacement of EMS vehicles.

**TABLE A4: TRENDS IN PROVINCIAL PUBLIC HEALTH EXPENDITURE (R'000)**

| Expenditure                                  | Audited/ Actual |         |         | Estimate | Medium term projection |         |         |

|             |  |  |  |  |  |  |  |
|-------------|--|--|--|--|--|--|--|
| expenditure |  |  |  |  |  |  |  |
|-------------|--|--|--|--|--|--|--|

1. Current price projections for the MTEF period are not required as these figures will be the same as the Constant price projections for the same years
2. Including maintenance. Capital spending under the public works budget for health should be included. This should equal the amounts indicated in tables HFM 1 and 2 and should exclude non-HFM capital falling under the Treasury definition of Capex (i.e. more than R5, 000 and lasts more than a year).
3. The CPIX multipliers in Table A4 should be used to adjust expenditure in previous years to 2018/19 prices.
4. District health services; any change in content of the budget programme should be indicated.
5. Provincial hospital services or previous designation; any change in content of the budget programme should be indicated.
6. Central hospital services or previous designation; any change in content of the budget programme should be indicated.

## PART B - PROGRAMME AND SUB-PROGRAMME PLANS

### 1. BUDGET PROGRAMME 1: ADMINISTRATION

#### 1.1 PROGRAMME PURPOSE

The purpose of this programme is to provide the overall management of the Department, and provide strategic planning, legislative, communication services and centralised administrative support through the MEC's office and administration.

#### 1.2 PRIORITIES

The priorities for Programme 1 have been categorised as per following sections

##### 1. Supply Chain Management:

- 1.1.Training of bid committee members (Bid Specifications, Bid Evaluations, Bid Adjudication, Economizing Committee, District Acquisition Committees and Hospital Finance Committee)

##### 2. Financial Management:

Improve financial management through:

- 2.1.Asset management
- 2.2.Management of accruals
- 2.3.Management of irregular expenditure

##### 3. Human Resources:

- 3.1.Recruitment and selection of staff in critical posts
- 3.2.Achievement of Employment Equity Targets
- 3.3.Human resource development
- 3.4.Performance management
- 3.5.Employee Relations and People Management
- 3.6.Implementation of Employee Health and Wellness Programs

##### 4. ICT Services:

- 4.1.The focus will be on Systems, ICT Infrastructure and strengthening broadband connectivity in all facilities.
- 4.2.The main systems will be Patient and Administration System (PEIS) in Hospitals and Health Patient Registration System (HPRS) that will be implemented in all PHC facilities.
- 4.3.Parallel to Systems, ICT infrastructure will be strengthened to ensure that there is a stable backbone upon which systems will operate. The last key area in the 2019/20 period is to ensure that all the facilities have reliable, efficient broadband connectivity.

5. Legal Services:

- 5.1.Appointment of legal officers and supporting staff as required by the Legal Services Directorate organogram must be prioritized in 2019/20, as the number of medico cases is becoming disproportionate to the number of files which are received on daily basis.
- 5.2.Due to the high influx of medico cases health professionals staff need to be appropriately trained and managed to provide quality health care
- 5.3.Capacitating of legal officers should be prioritised as there is a need for the establishment of a special units dealing with medico claims.
- 5.4.The training of health professionals in high risk targeted areas for litigation should be adequately funded as the focus should be on monitoring and implementation of policies to avoid errors and curb claims.

### **1.3 PROVINCIAL STRATEGIC OBJECTIVES AND ANNUAL TARGETS FOR ADMINISTRATION**

| PROGRAMME PERFORMANCE INDICATOR   | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|---|--|----------------|
| 1. Improve Hospital Management by appointing Executive Management teams in all hospitals (Key Management Positions) | Annually   | No             |
| 2. Improve quality of care by developing and implementing Recruitment & Retention strategy                          | Annually   | No             |
| 3. Improve quality of information by appointing information officers in all sub-districts                           | Annual   | No             |
| 4. Audit opinion from Auditor-General   | Annual   | Categorical    |
| 5. Percentage of Hospitals with broadband access  | Quarterly  | %              |
| 6. Percentage of fixed PHC facilities with broadband access   | Quarterly  | %              |

**TABLE ADMIN 2: STRATEGIC OBJECTIVES AND ANNUAL TARGETS FOR ADMINISTRATION**

| Strategic objective statement  | Indicator   | Indicator Type | Audited/Actual performance |                         |                         | Estimated performance     | Medium term targets       |                           |                           |
|--|---|----------------|----------------------------|-------------------------|-------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
|  |   |                | 2015/16                    | 2016/17                 | 2017/18                 |                           | 2018/19                   | 2019/20                   | 2020/21                   |
| <b>Strategic Objective/Provincial Indicators</b>                       |   |                |                            |                         |                         |                           |                           |                           |                           |
| Re-alignment of human resource to Departmental needs                   | 1. Improve Hospital Management by appointing Executive Management in all hospitals (Key Management Positions) | Number         | 10/33                      | 18/33                   | 26/28                   | 28/28                     | 28/28                     | 28/28                     | 28/28                     |
| Improve quality of health care   | 2. Improve quality of care by developing and implementing Recruitment & Retention strategy                    | Number         | 1                          | 1                       | 1                       | 1                         | 1                         | 1                         | 1                         |
| Strengthening Health Systems Effectiveness                             | 3. Improve quality of information by appointing information officers in all sub-districts                     | Number         | 0                          | 7/18                    | 7/18                    | 18 maintained             | 18 maintained             | 18 maintained             | 18 maintained             |
| <b>Programme Performance/Customized Indicators (Sector Indicators)</b> |   |                |                            |                         |                         |                           |                           |                           |                           |
| Improve health care outcome  | 4. Audit opinion from Auditor-General   | Categorical    | Qualified                  | Qualified               | Qualified               | Unqualified               | Unqualified               | Unqualified               | Unqualified               |
| Strengthening Health Systems Effectiveness                             | 5. **1.8 PERFORMANCE AND EXPENDITURE TRENDS**

The budget increase of the programme is at minus 4 per cent due to inadequacy of the budget of the Department. The programme will prioritize payment of accruals and payables for ICT programme and various fixed accounts of the programme. The Programme provides leadership in the reduction of health costs across all programmes. An amount of R10 million was earmarked for the improvement of revenue collection by procuring computers, patients files and photocopier machines for hospitals

## 1.9 RISK MANAGEMENT

| RISK   | MITIGATING FACTORS  |
|--|---|
| 1. Inability to recruit and retain staff in scarce field | <ul style="list-style-type: none"> <li>a. Targeted recruitment and improvement of the retention strategy</li> <li>b. Improvement of the attraction strategy and Review the organizational structure and implementation of WISN in PHC facilities</li> <li>c. Develop interim normative guides for the hospitals, finalise the review of the organizational structure and implement the WISN in PHC facilities</li> <li>d. Implementation of HR delegations</li> <li>e. Adherence to the prescripts when advertising and filling of posts</li> <li>f. Development of an appropriate HR Plan and monitoring the implementation thereof</li> </ul> |
| 2. Poor asset management                                 | <ul style="list-style-type: none"> <li>a. Strengthen the asset verification process through monthly reporting</li> <li>b. Enhance the security system (electronic devices)</li> <li>c. Regular update of the asset register</li> <li>d. Enforce compliance with the asset management policy</li> <li>e. Intensive training of Asset Managers</li> <li>f. Appointment of Loss Control Officers</li> </ul>  |

## **2. BUDGET PROGRAMME 2: DISTRICT HEALTH SERVICES (DHS)**

### **2.1 PROGRAMME PURPOSE**

The purpose of the programme is to render comprehensive Primary Health Care Services to the community using the District Health System model.

### **2.2 PRIORITIES**

1. Universal Health coverage progressively achieved through implementation of National Health Insurance

Mpumalanga Department of Health is committed towards achieving Universal Healthcare Coverage (UHC) that will be attained through the implementation of National Health Insurance (NHI). The provincial coverage under NHI will ensure that all citizens of the province have access to comprehensive quality health care services. Hence, most of the initiatives that were piloted in Gert Sibande District that is a NHI pilot site are being rolled out in phases to the other two Districts namely Nkangala and Ehlanzeni respectively.

The Department acknowledges that implementation of the NHI demands a high level of commitment that must be coupled with consistent application of the World Health Organization's health system six building blocks which are:

- i. Leadership/governance
- ii. Health care financing
- iii. Health workforce
- iv. Medical products and technologies
- v. Information and research; and
- vi. Service delivery

The absence, weakness and/or inefficiency of any one of these six blocks will render any Health care system ineffective and adversely impact on its overall performance. The Department is ensuring that all the above building blocks are being strengthened so that the strategy of NHI can benefit all healthcare users

### **2. Implement the Re-engineering of PHC**

Strengthening primary health care through re-engineering of PHC services, is a provincial priority in order to improve quality of care, health outcomes, reduce inequity and to pave the way for National Health Insurance;

Primary Health Care re-engineering refers to implementation of various interventions that are aimed at promoting the Preventative and Promotive health care services at community-based level while ensuring improvement of quality of care in PHC facilities. The focus is more preventative than curative

Implementation of the five (5) streams of PHC reengineering will ensure improved access to quality health care.

The province has total number of 235 established teams that covers 402 electoral wards. These WBPHCOT reach out to the communities at household level. The plan for this financial year is to increase outreach and registration of households to 59% (5876/10000) and monitor and evaluate the functioning of these established teams.

Ehlanzeni District remains being the only district with fully-fledged District Clinical Specialist Teams (DCSTs). The team will extend its support to the other two districts to support the improvement of clinical governance on practices of Maternal and Child Health services.

Thirty-two (32) additional School Health Teams will be established to attend to the health needs of the school going children and assist in identifying and addressing the health barriers to learning. The province is aiming at increasing the number of PHC facilities that are meeting the standards of being an Ideal Clinic by ensuring that 100% (287) of PHC facilities have their Ideal clinic status determinations conducted by Perfect Permanent Team for Ideal Clinic Realization and Maintenance (PPTICRM).in this financial year

### 3. Improved quality of health care

The programme aims to deliver safe quality health care services that meets the needs and expectation of the patients and communities, hence the focus is on improving the systems and processes and use data to analyse service delivery and encourages a team approach to problem solving quality improvement. The progress made will be continuously measured through performance reviews and subjective evaluation. Quarterly reports will measure the outcomes and the impact of health care.

All health care facilities will ensure that patients are afforded an opportunity to express their views with regard to the quality of health care through a functional Complaints mechanism whereby complaint resolution will be within 25 days.

Client Satisfaction Surveys will be conducted annually in all health facilities to measure patient experience of care. Gaps identified through the Client Satisfaction survey will be addressed through monitored quality improvement plans. The quality of care will further be improved by increasing availability of medicines and surgical sundries at the Medical Depot.

### 4. Maternal, infant and child mortality reduced

Sustainable Development Goals is having the reduction of maternal, neonatal and child morbidity and mortality is a priority and a goal to be reached by 2030. Hence the department also prioritizing the services to women and children and planning to strengthen the provision sexual reproductive health care services by increasing the coverage of Couple Year Protection rate which is the first line of defense in the morbidity and mortality of children and women to be at 60% . Reducing the delivery rate of girls below the age of 19 to be below 11%.

Furthermore, the Department is planning to introduce a new strategy that is aimed at reducing the number of women dying from complications of birth by offering more Antenatal visits to the health facility and strengthen the close monitoring of pregnancies through the implementation of Basic Antenatal Health Care Plus (BANC- Plus) initiative. The plan is to roll out the new strategy to all health facilities before the end of the first quarter of the financial year.

To reduce the number of neonatal mortality the department will continue training health workers on management of small and sick neonates and the Help Baby Breath strategies. While at the same time the provision of prevention of mother to child transmission of HIV will be strengthened to reduce the transmission rates to Infant around 10 weeks to be below 1.5 %

Reducing the percentage of children who are dying from diarrhea to be below 3% and those dying from Pneumonia to be below 3.8% and from Severe Acute Malnutrition to be below 11% will go a long way in reducing the number of deaths of children below 5 years. To strengthen the health of the under 5 years the Department will be providing health services to the Early Childhood Development Centers in collaboration with the Department of Education and Social Development

## 5. Operation Vuka Sisebente (OVS)

The department will participate in Operation Vuka Sisebente initiative by ensuring that key activities outlined in the OVS plan are integrated into Ward Base Outreach Teams. This will guarantee that health care services are accessible to communities at municipal ward level. The key actions include amongst others:

- Make meaningful household interventions on poverty
- Behavioral change to address HIV and AIDS, crime, substance abuse, road accidents, gender-based violence, etc.
- Address the needs of the most vulnerable and deprived communities and households
- Make rural development and sustainable livelihood a realizable vision
- Create opportunities for skills development and employment
- Ensure cooperative governance for better & faster tracked service delivery

## 6. 90 90 90 Policy Strategy

- The 90-90-90 is a concept introduced by the United Nation's programme on HIV and AIDS (UNAIDS ) in 2013.
- The country adopted and started to implement the policy in 2015.
- The idea is that by 2020, 90% of people who are infected with HIV will know their HIV status.
- 90% of people who test HIV positive will be put on antiretroviral therapy.
- 90% of those who receive antiretroviral therapy will be virally suppressed.

### TB 90 90 90 targets

- 90% of vulnerable groups/key populations screened for TB
- PHC headcount; Inmates in correctional service facilities; Miners; People living in informal settlements/peri-mining communities screen contacts of index cases
- 90% of people with TB diagnosed & treated
- 90% treatment success

## 7. Universal Test and Treat Initiative

- In line with the National Development Plan (NDP) 2030, the United Nations Sustainable Development Goals and UNAIDS 90 90 90 targets of 2020, the Minister of Health announced during his budget speech on the 10th May 2016, that South Africa would scale-up NHI facility decongestion to reach 800, 000 patients in the 16/17 financial year. The country would implement the World Health Organization (WHO) evidence based guidelines of Universal Test and Treat (UTT) by 1st September 2016.

- Universal Test and Treat is a strategy in which all HIV infected individuals receive treatment whether in need or not. It is aimed at eliminating HIV as it reduces the rate of spreading the virus to other people. The Mpumalanga province is implementing the strategy.

#### 8. Voluntary Medical Male Circumcision (VMMC)

- Voluntary Medical Male Circumcision (VMMC) reduces female-to-male sexual transmission of HIV by 60%. The World Health Organization (WHO) and UNAIDS recommend the implementation of VMMC programmes in countries with a high HIV prevalence among the general population. VMMC is cost-effective and should be included alongside behavioural and structural strategies, as part of a comprehensive HIV prevention plan.
- Men who access the MMC programme need to be given a package of services in order to prevent new HIV infections. Modelling studies have shown that MMC is cost-effective. The latest Human Sciences Research Council (HSRC) study has acknowledged the good performance of the MMC programme and recommended that the MMC programme scale-up its performance with a focus on 15-34 age groups for immediacy and of impact on the HIV epidemic.

#### 9. SheConquers campaign: HIV Prevention in girls and young women in South Africa

- She Conquers is a three-year national campaign that aims to improve the lives of adolescent girls and young women in South Africa. The idea is that every adolescent girl and young woman in the country should be provided with resources that they need to lead a healthy and productive life. The Mpumalanga Department of Health is collaborating with NPOs that are funded to implement the programme.
- Responding to the heightened vulnerability of young women and adolescent girls to HIV, the Government of South Africa has launched a nationwide HIV prevention campaign. Entitled SheConquers, the three year, multimillion rand campaign was launched at a session hosted by the South African Ministry of Health during the 21st International AIDS Conference, that took place in Durban, South Africa. Across sub-Saharan Africa, HIV is a leading cause of deaths among adolescents aged 10-19, and two thirds of all new HIV infections among adolescents occur among adolescent girls. SheConquers is built around a five-point strategy that aims to decrease:
  - New HIV infections;
  - Teenage pregnancies;
  - Gender based violence among young women and adolescent girls;
  - Increase and retain young women and adolescent girls in school;
  - Increase economic opportunities for young people, particularly young women.

#### 10. HIV Testing Services

- The Department provides HIV testing services at health facilities and through community testing. The focus is on communities with very high HIV prevalence and clients are linked to care. Innovative strategies are being introduced so as to attract hard to reach groups such as men and key populations. The province has started with the implementation of HIV self-screening (HIVSS) which will improve HIV testing among

the historical HIV under-tested. Index testing modality has been introduced in the province, this will assist with tracking of partners of those that have tested positive to go for testing in order to get the high yield. The National Department of Health has introduced the National Wellness Campaign (Cheka Impilo). The campaign aims to ensure that an additional 14 million people in the country have are tested by 2019/20.

#### **11. The Surge Plan/ Acceleration Plan**

In 2017, the NDoH together with PEPFAR SA developed an HIV Treatment Surge plan to accelerate epidemic control in SA by putting a total of 6.1 million individuals on ART in the public health system by December 2020. The Treatment Surge will support interventions and direct service delivery in the 27 priority districts that account for 82% of the HIV burden in SA, and high-impact technical assistance and above-site interventions that support the national ART programme.

#### **12. Pre-Exposure Prophylaxis (PrEP) targeted at key population groups.**

In June 2016 the South African National Department of Health (NDoH) rolled out oral PrEP to select sex workers sites. At that time, the guidelines were specific for the sex worker rollout. These guidelines have now been updated to include additional target populations, including men who have sex with men, serodiscordant couples, and adolescent girls and young women. The inclusion of these additional target populations in the PrEP rollout will be at the direction of the NDoH, over time, targeting prioritized populations in phased approaches.

#### **13. ACSM Strategy**

##### **Purpose**

To market and promote HIV/AIDS, STIs and TB programmes and consequently create demand for increase uptake of Health Services. ACSM is one of the key intervening programmes that educates and advocate healthy lifestyles, promote and increase awareness among key populations such as youth, sex workers, inmates, farming and mining communities as well as business sector. The program makes accessible condoms as one of the many preventative strategies the department adopted to the general population. it does educate in many different platforms such as comprehensive health campaigns, radio and other forms of media. There is an adopted communication strategy by Management which helps direct all the activities of the directorate.

##### **ACSM Functions**

- Market and promote HIV/AIDS, STI s and TB Health services
- Compile Annual Integrated ACSM plan
- Spread critical messages on HAST programmes using Multi-level Communication Approach
- Create Demand on utilization of Health Services
- Coordinate campaigns and community dialogues at all levels (Provincial, District and Sub-Districts)

#### 2.2.4 EHLANZENI DISTRICT

##### Primary Health Care:

- (a) Ideal clinic status determinations conducted by Perfect Permanent Team for Ideal Clinic Realisation and Maintenance (PPTICRM) in all fixed clinic and CHC
- (b) Increase access to Community Based Health Services by increasing the coverage of Outreach House Hold registration visit
- (c) Increase the number of School Health Service Teams established
- (d) Curb the burden of HIV and TB by Increase number of patients initiated on ART , Increasing number of Male medical circumcision performed and increase TB success rate
- (e) Reduce child morbidity by increasing coverage of Immunisation for the under 1 year
- (f) Reduce maternal mortality by increasing Couple year protection rate reduce delivery rate in facility of the 10 to 19 years , Increase the rate of Antenatal 1st visit before 20 weeks

##### District Hospitals:

- (a) Increase the percentage of Hospital achieved 75% and more on National Core Standards self-assessment rate (District Hospitals)
- (b) Reduce the Average Length of Stay (District Hospitals)

#### 2.2.5 Gert Sibande District

##### Primary Health Care:

- (a) Ideal clinic status determinations conducted by Perfect Permanent Team for Ideal Clinic Realization and Maintenance (PPTICRM) in all fixed clinic and CHC
- (b) Increase access to Community Based Health Services by increasing the coverage of Outreach House Hold registration visit
- (c) Increase the number of School Health Service Teams established
- (d) Curb the burden of HIV and TB by Increase number of patients initiated on ART , and increase TB success rate
- (e) Reduce child morbidity by increasing coverage of Immunization for the under 1 year and reduce case fatality from Severe Acute Malnutrition
- (f) Reduce maternal mortality by increasing Couple year protection rate reduce delivery rate in facility of the 10 to 19 years , Increase the rate of Antenatal 1st visit before 20 weeks and increase the mother postnatal visit within six weeks

##### District Hospitals:

- (a) Increase the percentage of Hospital achieved 75% and more on National Core Standards self-assessment rate (District Hospitals)

## **2.2.6 Nkangala District**

### **Primary Health Care:**

- (a) Ideal clinic status determinations conducted by Perfect Permanent Team for Ideal Clinic Realization and Maintenance (PPTICRM) in all fixed clinic and CHC
- (b) Increase access to Community Based Health Services by increasing the coverage of Outreach House Hold registration visit
- (c) Increase the number of School Health Service Teams established
- (d) Curb the burden of HIV and TB by Increase number of patients initiated on ART , Increasing number of Male medical circumcision performed and increase TB success rate
- (e) Reduce child morbidity by increasing coverage of Immunization for the under 1 year and reduce case fatality from Severe Acute Malnutrition
- (f) Reduce maternal mortality by increasing Couple year protection rate reduce delivery rate in facility of the 10 to 19 years , Increase the rate of Antenatal 1st visit before 20 weeks and increase the mother postnatal visit within six weeks

### **District Hospitals:**

- (a) Increase the percentage of Hospital achieved 75% and more on National Core Standards self-assessment rate (District Hospitals)

Reduce the Average Length of Stay (District Hospitals)

**ANNUAL PERFORMANCE PLAN 2019/20**

## **2.1 SERVICE DELIVERY PLATFORM FOR DHS**

**TABLE DHS1: DISTRICT HEALTH SERVICE FACILITIES BY HEALTH DISTRICT IN 2017/18**

| Health district       | Facility type  | No. <sup>5</sup>  | Population                                | Population per facility <sup>3</sup> or per hospital bed | PHC Headcount Or Inpatient Separations <sup>3</sup> | Per capita utilisation <sup>3</sup> |

Source: Population : 2016 mid-year population estimates provided by StatsSA for 2018/19 year (Refer to Annexure A);

1. Non-fixed clinics should include mobile and satellite clinics (exclude visiting points).
2. Fixed clinics operated by Provincial Government must include gateway clinics.
3. PHC facility headcounts and hospital inpatient separations should be used for per capita utilisation.
4. Include state aided designated District hospitals (ie. that provide Level 1 care) - include facilities that may not be providing full package of Level 1 care. The Provincial Office may combine the rates, where the District Hospital is serving more than one District, with a foot note indicating the catchment.
5. Total Number of Facilities – DHIS 2017/18

## **2.2 SITUATIONAL ANALYSIS INDICATORS FOR DISTRICT HEALTH SERVICES**

**TABLE DHS 2: SITUATIONAL ANALYSIS INDICATORS FOR DISTRICT HEALTH SERVICES**

| Programme Performance Indicators                          | Indicator Type | Province wide value 2017/18 | Ehlanzeni 2017/18 | Gert Sibande 2017/18 | Nkangala 2017/18 |
|---|----------------|-----------------------------|-------------------|----------------------|------------------|
| 1. Ideal clinic status rate                               | %              | 30.3%<br>(87/287)           | 8.3%<br>(10/121)  | 72.3%<br>(55/76)     | 24.4%<br>(22/90) |
| 2. PHC utilisation rate - Total                           | No             | 2.1                         | 2.7               | 1.8                  | 1.6              |
| 3. Complaint resolution within 25 working days rate (PHC) | %              | 95%                         | 81.4%             | 96.0%                | 83.1%            |

## 2.4.1 STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR DHS

| PROGRAMME PERFORMANCE INDICATOR  | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|--|--|----------------|
| 1. Ideal clinic status determinations conducted by Perfect Permanent Team for Ideal Clinic Realisation and Maintenance (PPT/CRM) rate (fixed clinic/CHC/CDC) | Annual   | %              |
| 2. PHC utilisation rate - Total  | Quarterly  | No             |
| 3. Complaint resolution within 25 working days rate (PHC)  | Quarterly  | %              |

ANNUAL PERFORMANCE PLAN 2019/20

| 18. Vitamin A 12-59 months coverage (annualised)      | %                       | 58.3                           | 68.3                 | 46.8                    | 52.5                |
| 19. Maternal mortality in facility ratio (annualised) | per 100 000 Live Births | 120/100 000                    | 103.5/100 000        | 96.5/100 000            | 176.4/100 000       |
| 20. Inpatient early neonatal death rate               | per 1 000               | 9.7/1000                       | 9.2/1000             | 14.3/1000               | 10.4/1000           |

## 2.7.1 PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR MCWH&N

| PROGRAMME PERFORMANCE INDICATOR                           | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|---|--|----------------|
|   | Annual   | Number         |
| 1. Number of School Health Service Teams established      | Annual   | Number         |
| 2. Antenatal 1st visit before 20 weeks rate               | Quarterly  | %              |
| 3. Mother postnatal visit within 6 days rate              | Quarterly  | %              |
| 4. Antenatal client start on ART rate                     | Annual   | %              |
| 5. Infant 1st PCR test positive around 10 weeks rate      | Quarterly  | %              |
| 6. Immunisation under 1 year coverage                     | Quarterly  | %              |
| 7. Measles 2nd dose coverage                              | Quarterly  | %              |
| 8. Diarrhoea case fatality rate                           | Quarterly  | %              |
| 9. Pneumonia case fatality rate                           | Quarterly  | %              |
| 10. Severe acute malnutrition case fatality rate          | Quarterly  | %              |
| 11. School Grade 1 - learners screened                    | Quarterly  | No             |
| 12. School Grade 8 - learners screened                    | Quarterly  | No             |
| 13. Delivery in 10 to 19 years in facility rate           | Quarterly  | %              |
| 14. Couple year protection rate (Int)                     | Quarterly  | %              |
| 15. Cervical cancer screening coverage 30 years and older | Quarterly  | %              |
| 16. HPV 1st dose  | Annual   | No             |

## ANNUAL PERFORMANCE PLAN 2019/20

| PROGRAMME PERFORMANCE INDICATOR          | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type          |
|--|--|-------------------------|
| 17. HPV 2nd dose                         | Annual   | No                      |
| 18. Vitamin A 12-59 months coverage      | Quarterly  | %                       |
| 19. Maternal mortality in facility ratio | Annual   | per 100 000 Live Births |
| 20. Neonatal death in facility rate      | Annual   | per 1000                |

## 2.10 PERFORMANCE AND EXPENDITURE TRENDS

The significant allocation supports the policy of provision access to quality health care. The budget increase in 2019/20 FY is due to the significant increase in HIV grant funding to address the pressure in ART drugs. The Department has also budgeted for the ideal clinics and school health.

A budget of amounting to R15 million was allocated for the improvement of the IDEAL status for all Primary Health Facilities. An amount of R63 million was set aside to reduce the malaria fatality rate, which also include funding from the Comprehensive HIV/AIDS conditional grant. The Programme will receive R78 million additional budget on Compensation of Employees in order to improve staffing needs within the programme. Additional funding amounting to R9.5 million was allocated to procure the tools of trade for employees.

## 2.11 RISK MANAGEMENT

| RISK  | MITIGATING FACTORS   |
|---|--|
| 1. Inadequate skilled human resources to render health care service | <ul style="list-style-type: none"> <li>a. Contribute in the development and implement an HR strategy as per the prescripts of DPSA. This strategy will, inter alia, address the following:           <ul style="list-style-type: none"> <li>• Recruitment and retention</li> <li>• HR Delegation Framework</li> <li>• Determine a baseline for vacancies and an acceptable vacancy rate. This must be decreased by 20%</li> <li>• Use of WISN to fill in vacant posts especially at PHC level</li> </ul> </li> </ul> |
| 2. Inadequate Mental Health Care Services in the province           | <ul style="list-style-type: none"> <li>a. Appoint 3 Mental Health Care Review Board</li> <li>b. Increase from 9 to 18 Sub-district Mental Health Care Coordinators</li> <li>c. Upgrade and build infrastructure for psychiatric patients that is compliant with Infrastructure Unit Support System (IUSS) guidelines.</li> </ul>   |
| 3. Increasing rate of maternal and child mortality                  | <ul style="list-style-type: none"> <li>a. Appoint skilled health care workers to provide Maternal and Child healthcare services</li> <li>b. Conduct continuous training and orientation</li> <li>c. Conduct mentoring and onsite in-services training</li> <li>d. Conduct monitoring and evaluation of MCWYH services Continue training of Community Health Care workers on MCWH issues</li> </ul>   |
| 4. Increased incidence and mortalities from Malaria                 | <ul style="list-style-type: none"> <li>a. Appoint Temporal Sprayers</li> <li>b. Conduct indoor residual sprays</li> <li>c. Conduct surveillance on Malaria prone breeding areas Conduct community awareness campaigns</li> <li>d. Train Healthcare workers on diagnosing and management of malaria</li> </ul>  |
| 5. Inadequate management of health care waste                       | <ul style="list-style-type: none"> <li>a. Appoint/delegate responsible managers in the facilities</li> <li>b. Ensure substantive contract management of service provider</li> </ul>  |

**ANNUAL PERFORMANCE PLAN 2019/20**

| <b>RISK</b>  | <b>MITIGATING FACTORS</b>  |
|--|--|
| 6. Inadequate community awareness on HIV/Aids/Tuberculosis | <ul style="list-style-type: none"> <li>e. Develop an annual training plan for health care workers</li> <li>a. Implement ACSM strategy <ul style="list-style-type: none"> <li>• ACSM campaigns are conducted as per operational Plan 2019/20 and the schedule for the ACSM campaigns.</li> <li>• Integrate with other Partners in addressing poverty- PIP 2017-2022 is being implemented. In response to the NSP and PIP 2017 -2022 yearly DOH activity plans are developed for formal commitment to implementation of the PIP activities by each sector.</li> <li>• Contribute to the development of cross boarder MOU - The Department is part of the Ehlanzeni Migrant Health Forum which aims to ensure migrants have access to health services, particularly HIV.</li> </ul> </li> </ul> |
| 7. Inadequate information management                       | <ul style="list-style-type: none"> <li>a. Procure equipment and appoint Data management personnel</li> <li>b. Skills gap analysis and requisite training</li> <li>c. Adhere to the National Archives Act by securing adequate facilities for record storage.</li> <li>d. Contribute to the drafting and implementation of Record Management Policy</li> </ul>  |

### **3. BUDGET PROGRAMME 3: EMERGENCY MEDICAL SERVICES (EMS)**

#### **3.1 PROGRAMME PURPOSE**

The purpose of Emergency Medical Services is to provide pre-hospital medical services, inter-hospital transfers, Rescue and Planned Patient Transport to all inhabitants of Mpumalanga Province within the national norms of 15 minutes in urban and 40 minutes in rural areas.

#### **3.2 PRIORITIES**

- Reduction of maternal, infant and child mortality through provision of obstetric ambulance.
- Improvement of referrals through integration of PPTS into EMS.
- Improve response time

The Department will improve the services through the recruitment, appointment of emergency care practitioners and training to increasing the number of EMS bases and the number of rostered ambulances in the province.

**TABLE EMS 1: SITUATION ANALYSIS INDICATORS FOR EMS**

| Programme Performance Indicator                | Frequency of Reporting (Quarterly / Annual) | Indicator Type | Province wide value 2017/18 | Ehlanzeni 2017/18 | Gert Sibande 2017/18 | Nkangala 2017/18 |
|--|---|----------------|-----------------------------|-------------------|----------------------|------------------|
| 1. EMS P1 urban response under 15 minutes rate | Quarterly                                   | %              | 71%                         | 73                | N/A                  | 69%              |
| 2. EMS P1 rural response under 40 minutes rate | Quarterly                                   | %              | 68%                         | 71.5%             | 64.5%                | 69%              |
| 3. EMS inter-facility transfer rate            | Quarterly                                   | %              | 5%                          | 8%                | 4%                   | 3%               |

### **3.3.1 PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGET FOR EMS**

| PROGRAMME PERFORMANCE INDICATOR   | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|---|--|----------------|
| 1. Improve response time by increasing the number of Operational Ambulances   | Annual   | No             |
| 2. Improve the use of resources by integrating PPTS into EMS operations       | Quarterly  | %              |
| 3. Improve maternal outcomes by increasing the number of Obstetric ambulances | Annual   | No             |
| 4. EMS P1 urban response under 15 minutes rate                                | Quarterly  | %              |
| 5. EMS P1 rural response under 40 minutes rate                                | Quarterly  | %              |
| 6. EMS inter-facility transfer rate   | Quarterly  | %              |

**TABLE EMS 2: STRATEGIC OBJECTIVES AND ANNUAL TARGETS FOR EMERGENCY MEDICAL SERVICES**

<sup>1</sup>This economic classification table should be the same as the classification used by each Provincial Department in Budget Statement No. 2.

### **3.4 PERFORMANCE AND EXPENDITURE TRENDS**

Emergency Services provides for all emergency medical services including ambulance service, communication and air ambulance services. The increase in the 2019/19 FY relates to the integration of PPT into EMS. The Department has planned to implement the project at Gert Sibande, which is highest spender on fleet services account. A budget amounting to R35 million was set aside for the procurement of additional ambulances in order to reduce dissatisfaction by the Mpumalanga community. The Department will continue to invest in the fleet infrastructure of the programme in the MTEF period.

### **3.5 RISK MANAGEMENT**

| RISK   | MITIGATING FACTORS   |
|--|--|
| 1. EMS failure to take control of PPTS (Planned Patient Transport Services)                            | <ul style="list-style-type: none"> <li>a. Integration of PPTS into EMS</li> <li>b. Implement Operational PPTS plan</li> </ul>  |
| 2. Ineffective Emergency Communication Center (ECC)  | <ul style="list-style-type: none"> <li>a. Emergency Communication Center staff training.</li> <li>b. Multilingual Emergency Communication Center</li> <li>c. Appointment of shift leaders.</li> <li>d. Upgrading of the communication center system</li> </ul> |
| 3. Inadequate/ inappropriate emergency vehicles<br><br>Inadequate/ inappropriately qualified personnel | <ul style="list-style-type: none"> <li>a. Procure an additional EMS vehicles</li> <li>b. Appropriate skilled ALS practitioners</li> <li>c. Appointment of Emergency Care Technicians and ALS Practitioners</li> </ul>  |

## **4. BUDGET PROGRAMME 4: PROVINCIAL HOSPITAL SERVICES**

### **4.1 PROGRAMME PURPOSE**

The purpose of this programme is to render level 1 and 2 health services in regional hospitals and TB specialized hospital services.

### **4.2 PRIORITIES**

#### **Regional Hospitals**

1. Provision of eight core clinical domains for secondary services
  - Appointment of specialists in the eight core domains: Obstetrics & Gynaecology, Paediatrics, Orthopaedics, Internal Medicine, Radiology, Psychiatry, General Surgery, Anaesthesia
  - Appointment of Health Professionals to support the specialists.
2. Improve quality of care by ensuring that regional hospitals comply with the national core standards
  - Procurement and maintenance of medical equipment
  - Improve quality of care by ensuring that regional hospitals comply with the ideal hospital framework.
3. Improve the referral network within the district through quarterly cluster meeting
  - Conduct quarterly cluster meetings with feeder facilities

#### **Specialised TB**

1. Improve compliance with National Core Standards:
  - Improve quality of care by ensuring that TB specialized hospitals comply with the ideal hospital framework
  - Decentralization of DR TB treatment

## **STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR REGIONAL HOSPITALS**

| PROGRAMME PERFORMANCE INDICATOR  | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|--|--|----------------|
| 1. Functional Adverse Events Committees                                  | Quarterly  | No             |
| 2. Average Length of Stay (Regional Hospitals)                           | Quarterly  | No             |
| 3. Inpatient Bed Utilisation Rate (Regional Hospitals)                   | Quarterly  | %              |
| 4. Expenditure per PDE (Regional Hospitals)                              | Quarterly  | R              |
| 5. Complaint Resolution within 25 working days rate (Regional Hospitals) | Quarterly  | %              |

<sup>1</sup>This economic classification table should be the same as the classification used by each Provincial Department in Budget Statement No. 2

## 4.6 PERFORMANCE AND EXPENDITURE TRENDS

The growth in Programme 4 relates to the need to improve the budget allocation for the programme that was the most pressured in the 2018/19 FY. The additional budget allocation will fund NHLS, Medical waste and Medical Supplies. The Programme will also initiate efficiency projects, which will be aimed at making the programme more efficient and financially viable.

A budget amounting to R8 million was reprioritized from medicine due to funding of the new TB drugs in the Comprehensive HIV/ AIDS conditional grant. The TB programme will realize savings due to the decentralization of patient treatment and the introduction of the new drug.

## 4.7 RISK MANAGEMENT

| RISK   | MITIGATING FACTORS   |
|--|--|
| 1. Inadequate compliance with infection control guidelines           | <ul style="list-style-type: none"> <li>a. Motivate for infrastructure project for the construction of isolation wards</li> <li>b. Improve monitoring of compliance with policies and procedure</li> <li>c. Allocation of adequate resources and consumables</li> </ul>   |
| 2. Inadequate HIV/ AIDS and TB inpatient care                        | <ul style="list-style-type: none"> <li>a. Secure budget for multi-year programme for improvement for TB infrastructure</li> <li>b. Increase security measures for visitor control</li> <li>c. Awareness campaign on TB</li> <li>d. Enter into MOU with private sector laboratories</li> </ul>  |
| 3. Incomplete access of level 2 services                             | <ul style="list-style-type: none"> <li>a. Develop equipment procurement plan</li> <li>b. Regional hospitals to hold quarterly referral meetings with feeder facilities</li> <li>c. Monitor compliance to attendance registers by sessional doctors</li> <li>d. Implement recruitment and retention strategy for scarce skills</li> </ul> |
| 4. Non-compliance with professional clinical standards and protocols | <ul style="list-style-type: none"> <li>a. Conduct quarterly clinical audits</li> <li>b. Enforce compliance to policies and procedures</li> <li>c. Motivate for appointment of senior professional staff for supervision and mentoring purposes</li> <li>d. Staff debriefing, motivation and team-building</li> </ul>                     |
| 5. Inadequate medical and condemned pharmaceutical waste management  | <ul style="list-style-type: none"> <li>a. Appointment of dedicated Waste Manager</li> <li>b. Secure budget and approval for waste storage facilities</li> <li>c. Improve management of expired pharmaceutical stock and disposal processes</li> </ul>  |

## **5. BUDGET PROGRAMME 5: PROVINCIAL TERTIARY HOSPITAL SERVICES**

### **5.1 PROGRAMME PURPOSE**

The purpose of the programme is to render tertiary health care services and to provide a platform for training of health care workers and to conduct research.

### **5.2 SUB-PROGRAMME 5.2 – PROVINCIAL TERTIARY HOSPITAL SERVICES**

#### **5.2.1 PRIORITIES**

1. Improve quality of care by ensuring that tertiary hospitals comply with the national core standards
  - Procurement and maintenance of medical equipment
  - Improve quality of care by ensuring that tertiary hospitals comply with the ideal hospital framework.
2. Improve clinical governance at tertiary hospitals
  - Conduct the monthly Mortality and Morbidity reviews in all domains.
3. Establish oncology and cardiology services at Rob Ferreira hospital and nephrology services at Witbank hospital.

**PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR TERTIARY HOSPITALS**

| <b>PROGRAMME PERFORMANCE INDICATOR</b>                                   | <b>Frequency of Reporting<br/>(Quarterly, Bi-annual, Annual)</b> | <b>Indicator Type</b> |
|--|--|-----------------------|
| 1. Functional Adverse Events Committee                                   | Quarterly  | No                    |
| 2. Average Length of Stay (Tertiary Hospitals)                           | Quarterly  | No                    |
| 3. Inpatient Bed Utilisation Rate (Tertiary Hospitals)                   | Quarterly  | %                     |
| 4. Expenditure per PDE (Tertiary Hospitals)                              | Quarterly  | R                     |
| 5. Complaints resolution rate (Tertiary Hospitals)                       | Quarterly  | %                     |
| 6. Complaint Resolution within 25 working days rate (Tertiary Hospitals) | Quarterly  | %                     |

**TABLE C&THS 1: PROVINCIAL STRATEGIC OBJECTIVES AND ANNUAL TARGETS FOR TERTIARY HOSPITALS**

| Strategic objective statement  | Indicator | Indicator Type | Audited/Actual performance |          |          | Estimated performance | Medium term targets |

<sup>1</sup>This economic classification table should be the same as the classification used by each Provincial Department in Budget Statement No. 2

## 5.4 PERFORMANCE AND EXPENDITURE TRENDS

*Central Hospital Services* provides tertiary health services and includes the National Tertiary Services Grant provided to scale up tertiary services in the two tertiary facilities. The Programme is underfunded in the National Tertiary Services Grant of which the Department only receives 1 per cent of the provincial allocation. The Programme will receive 7 per cent growth in the compensation of employees and goods and services shows a decline of 15 per cent. The Department plans to implement stringent austerity measures in order to remain within the budget. The Department has planned to build a partnership with WITS which will improve a number of challenges faced at Rob Ferreira and Witbank Hospitals.

The budget for the Programme will be accelerated in the 2020 MTEF in order to improve services in these hospitals and reduce referrals of patients to Gauteng and Private sector. In addition, the Department plans to build partnerships with the private sector on the certain services needed by patients.

## 5.5 RISK MANAGEMENT

| RISK  | MITIGATING FACTORS  |
|---|---|
| 1. Incomplete package of level 3 services           | <ul style="list-style-type: none"> <li>a. Increase number of registrars</li> <li>b. Strengthen relationship with academic institutions</li> <li>c. Increase the number of clinical specialists domains</li> </ul>   |
| 2. Clinical adverse events                          | <ul style="list-style-type: none"> <li>a. Fill the critical vacant positions</li> <li>b. Develop implement and monitor clinical policies and procedures</li> <li>c. Procure the needed medical equipment and consumables</li> <li>d. Strengthen security measures in the units (in relation to record keeping)</li> <li>e. Conduct clinical audits and peer reviews per discipline</li> </ul> |
| 3. Poor patient care and long patient waiting times | <ul style="list-style-type: none"> <li>a. Train staff in customer care</li> <li>b. Re-launch Batho Pele Principles</li> <li>c. Tertiary hospitals to conduct quarterly referral meeting with feeder hospitals</li> <li>d. Strengthen outreach programmes to regional and district hospitals</li> </ul>  |

## **6. BUDGET PROGRAMME 6: HEALTH SCIENCES AND TRAINING (HST)**

### **6.1 PROGRAMME PURPOSE**

The purpose of the Health Sciences and Training programme is to ensure the provision of skills development programmes in support of the attainment of the identified strategic objectives of the Department.

### **6.2 PRIORITIES**

1. Development of the skills of health care professionals by implementing the workplace skills plan
2. Preparing for the accreditation of the EMS college
3. Capacity development by increasing number of Intake of first year nursing students

## **6.3 PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR HEALTH SCIENCES AND TRAINING**

| <b>PROGRAMME PERFORMANCE INDICATOR</b>   | <b>Frequency of Reporting<br/>(Quarterly, Bi-annual, Annual)</b> | <b>Indicator Type</b> |
|--|--|-----------------------|
| 1. Improve human resource efficiency by training health care professionals on critical clinical skills | Quarterly  | No                    |
| 2. Improve access to EMS training by increasing the number of accredited EMS colleges                  | Annual   | No                    |
| 3. Number of Bursaries awarded for first year medicine students  | Annual   | No                    |
| 4. Number of Bursaries awarded for first year nursing students   | Annual   | No                    |

## 6.6 PERFORMANCE AND EXPENDITURE TRENDS

The sub-programme: *Nursing Training College* provides for the development of professional nurses in the nursing college. The expenditure of the sub-programme includes payment of accommodation for students and providing of catering at the college. The Department plans to insource provision of catering services to student, which will realize over R2 million savings. The project is at advanced stage and will be implemented in the 2019/20 FY.

The Programme has reprioritized R11 million from transfers and subsidies in order to make provision for accommodation and transport for CUBA program students. The Programme will

## ANNUAL PERFORMANCE PLAN 2019/20

continue to implement the new curriculum and a special project was initiated to ensure success of the two campuses (Rob Ferreira and Nursing College).

### **6.7 RISK MANAGEMENT**

| RISK   | MITIGATING FACTORS                             |
|--|--|
| 1. Inadequate Management of the Bursary system.    | Monitor compliance through Persal              |
| 2. Inadequate implementation of the training cycle | Conduct needs analysis and training evaluation |
| 3. Ineffective management of performance           | Conduct training on PMDS                       |

## **7. BUDGET PROGRAMME 7: HEALTH CARE SUPPORT SERVICES (HCSS)**

### **7.1 PROGRAMME PURPOSE**

The Health Care Support Service programmes aim to improve the quality and access of health care provided through:

- The availability of pharmaceuticals and other ancillaries.
- Rendering of credible forensic health care which contributes meaningfully to the criminal justice system.
- The availability and maintenance of appropriate health technologies
- Improvement of quality of life by providing needed assistive devices.
- Coordination and stakeholder management involved in specialized care.
- Rendering in-house services within the health care value chain.

There are four directorates within programme 7 namely:

- **Pharmaceutical Services** (Pharmaceutical Depot, Policy Systems and Norms, Essential Medicine List (EML) and Programme Support and African Traditional Health Practices)
- **Forensic Health Services** (Forensic Pathology Services, Clinical Forensic Medicine and Medico-Legal Services)
- **Clinical Support Services** (Medical Orthotics and Prosthetics, Laboratory, Blood, Tissue and Organ (LBTO), Telemedicine)
- **Health Technology Services** (Clinical Engineering, Imaging Services)
- **Laundry Services**

### **7.2 PRIORITIES**

List in point form the key priorities of the Health Care Support Budget programme for the MTEF period

The strategic goal of this programme, is to improve quality of health care

The **strategic priority** of the programme is to overhaul the health care system by improving quality of care including implementation of the National Health Insurance.

- Improve availability of medicines
- Procurement of FPS vehicles and medical equipment to improve quality of medical investigations
- Support rational use of laboratory and blood services.
- Provision of imaging services compliant to Radiation Control prescripts;
- Procurement and maintenance of medical equipment;
- Provision of comprehensive medical orthotic and prosthetic care;
- Provision of quality healthcare through provision of Laundry Services

### 7.3 PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR HEALTH CARE SUPPORT SERVICES

| PROGRAMME PERFORMANCE INDICATOR  | Frequency of Reporting<br>(Quarterly, Bi-annual,<br>Annual) | Indicator Type |
|--|---|----------------|
| 1. Improve quality of care by increasing availability of medicines and surgical sundries at the Medical Depot.                   | Quarter   | %              |
| 2. Number of patients initiated on Central Chronic Medicine Dispensing and Distribution (CCMDD)                                  | Quarter   | No             |
| 3. Improve access to quality of care through compliance with Radiation Control prescripts by all facilities with X-Ray equipment | Quarter   | %              |
| 4. Number of hospitals providing laundry services  | Quarterly   | No             |
| 5. Number of Orthotic and Prosthetic devices issued  | Quarterly   | No             |
| 6. Number of hospitals with functional transfusion committees  | Quarterly   | No             |
| 7. Number of sites rendering Forensic Pathology Services (FPS)   | Quarterly   | No             |

**ANNUAL PERFORMANCE PLAN 2019/20**

**TABLE HCSS 1: PROVINCIAL STRATEGIC OBJECTIVES AND ANNUAL TARGETS FOR HEALTH CARE SUPPORT SERVICES**

| Strategic objective statement                    | Indicator  | Indicator Type | Audited/Actual performance |                   |                                      | Estimated performance | Medium term targets   |                       |                       |
|--|--|----------------|----------------------------|-------------------|--------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
|  |  |                | 2015/16                    | 2016/17           | 2017/18                              |                       | 2018/19               | 2019/20               | 2020/21               |
| <b>Strategic Objective/Provincial Indicators</b> |  |                |                            |                   |                                      |                       |                       |                       |                       |
| Improved quality of health care                  | 1. Improve quality of care by increasing availability of medicines and surgical sundries at the Medical Depot.                   | %              | 79%<br>(246/310)           | 92 %<br>(286/310) | 89%                                  | 95%<br>(295/310)      | 95%<br>(295/310)      | 95%<br>(295/310)      | 95%<br>(295/310)      |
|  | 2. ## 7.5 PERFORMANCE AND EXPENDITURE TRENDS

The Laundry Services sub-programme provides laundry services to Middelburg, Bethal, Tinswalo, Mmamethake, Themba, Mapulaneng and Barberton hospital. The growth for the sub-programme is at 8 per cent, which will improve the supply of clean linen at the right time. The Department still encounters a number of challenges in the laundry programme. These challenges will be identified and analyzed with an aim to develop an improvement plan. Mini laundry points will be established in the MTEF period in order to provide an efficient service.

The provision of maintenance services for medical and allied equipment have been centralized to Programme 7. This will improvement coordination of the services including the response time by service providers. Funds for the maintenance were also allocated in Programme 8. The programme has settled accruals and payables for previous financial years, which implies that the 2019/20 FY budget will be have less pressure.

## 7.6 RISK MANAGEMENT

| RISK   | MITIGATING FACTORS   |
|--|--|
| 1. Inadequate Forensic Pathology Services                    | <ul style="list-style-type: none"> <li>a. Submission of infrastructural needs to the Infrastructure Section</li> <li>b. Submission of prioritized posts to be advertised</li> <li>c. Provision of wellness programme to employees</li> <li>d. Monitor compliance by the Service Provider to the Service Level Agreement</li> </ul>   |
| 2. Shortage of pharmacy personnel                            | <ul style="list-style-type: none"> <li>a. Approved new organisational structure</li> <li>b. Employment of CSP and Pharmacists at facilities</li> <li>c. Adhere to recruitment and selection policy</li> </ul>  |
| 3. Shortage of Pharmaceuticals and Surgicals in the Province | <ul style="list-style-type: none"> <li>a. Install stock management system in all facilities</li> <li>b. Secure budget for warehouse facilities (infrastructure)</li> <li>c. Improve pharmaceutical warehouse management</li> </ul>   |
| 4. Inadequate maintenance of medical equipment               | <ul style="list-style-type: none"> <li>a. Fast track the filling of critical vacant posts.</li> <li>b. Review and implementation of medical equipment SLAs with Service providers. Development of maintenance plans for medical equipment for all hospitals.</li> <li>c. Develop an SOP on medical equipment maintenance.</li> <li>d. Replacement of old vehicles for the CE workshops.</li> </ul> |

## **8 BUDGET PROGRAMME 8: HEALTH FACILITIES MANAGEMENT (HFM)**

### **8.1 PROGRAMME PURPOSE**

The purpose of the programme is to build, upgrade, renovate, rehabilitate and maintain health facilities.

### **8.2 PRIORITIES**

The Programme will be prioritize the construction of the following health facilities for the MTEF period:

**(a) Hi-Tech Hospitals:**

1. New/replacement
  - Middleburg District Hospital
  - Mapulaneng Regional Hospital
2. Upgrade and additions
  - Mmametlhake District Hospital
  - Bethal District Hospital
  - KwaMhlanga District Hospital
  - Themba Regional Hospital and,
  - Rob Ferreira Tertiary Hospital

**(b) Ideal Clinics:**

- Vukuzakhe and Nhlazatshe 6 Clinics,
- Msukaligwa, Thandukukhanya and Balfour CHC's are implemented through Inkind Grant from National Department of Health.
- Oakley, Pankop Clinics and KaNyamazane CHC

## **PROVINCIAL STRATEGIC OBJECTIVES, INDICATORS AND ANNUAL TARGETS FOR HFM**

| PROGRAMME PERFORMANCE INDICATOR  | Frequency of Reporting<br>(Quarterly, Bi-annual, Annual) | Indicator Type |
|--|--|----------------|
| 1. Improve access to healthcare by increasing number of PHC facilities maintained  | Annual   | No             |
| 2. Number of PHC facilities constructed (new/replacement)  | Annual   | No             |
| 3. Number of Hospitals under maintenance   | Annual   | No             |
| 4. Enhance patient care & safety and improving medical care by constructing Modern hi-tech hospitals   | Annual   | No             |
| 5. Improve maintenance of health facilities by appointing cooperatives   | Annual   | No             |
| 6. Number of health facilities that have undergone major and minor refurbishment in NHI Pilot District   | Annual   | No             |
| 7. Number of health facilities that have undergone major and minor refurbishment outside NHI pilot District (excluding facilities in NHI Pilot District) | Annual   | No             |

<sup>1</sup>This economic classification table should be the same as the classification used by each Provincial Department in Budget Statement No. 2

## 8.6 PERFORMANCE AND EXPENDITURE TRENDS

The bulk of the budget pertains to the construction of new infrastructure, upgrades and additions, rehabilitation, renovations and refurbishments of the department's infrastructure, with the sub-programmes aligned to the main service delivery programmes. The most significant funding is against the Community Health Facilities sub-programme, which houses the new Mapulaneng, bethal, Middelburg and Mammetlake Hospital.

Buildings and other fixed structures is the main cost-driver in this programme, is largely linked to a drive to improve and maintain the infrastructure of the department, and is related to the Health Facility Revitalization grant, as well as the department's equitable share. The increase in 2018/19 is for funding of the Community Health facilities project infrastructure project listed above, which has resulted in no budget for maintenance and Coal. The decrease in 2017/18 was due to a

## ANNUAL PERFORMANCE PLAN 2019/20

reduction in the allocation for the Health Facility Revitalization grant over the MTEF period. The increase in 2019/20 and over the MTEF is also in line with various project requirements.

The increase in *Compensation of employees* in 2019/20 FY relates to the filling of the vacant funded posts as required by DORA, and in terms of the Health Facility Revitalization grant framework, including engineers, architects and quantity surveyors.

The day-to-day *maintenance* drive accounts for the trend against *Goods and services* over the entire period and is an effort to bring facilities up to standard. The Department has reprioritized funds from buildings and other fixed structure to provide for maintenance of health facilities including the provision of coal and diesel. A budget amounting to R156 million was set aside for maintenance and R58 million for the provision of coal and diesel.

Additional funding amounting to R37 million is allocated in the 2019/20 FY for the procurement of medical and allied equipment. The Department plans to allocate funding in the MTEF period for the procurement of Medical and Allied Equipment.

### 8.7 RISK MANAGEMENT

| RISK  | MITIGATING FACTORS   |
|---|--|
| 1. Poor maintenance of infrastructure and equipment | <ul style="list-style-type: none"><li>a. Include maintenance requirements in infrastructure planning (3 year maintenance plan)</li><li>b. Conclude service level agreements with the MRTT for placement of artisans</li><li>c. Secure adequate budget via Construction Procurement Standard for multi-year programme</li></ul> |
| 2. Cost over-runs on projects                       | <ul style="list-style-type: none"><li>a. Coordinate development of a business case and clinical briefs prior to design</li><li>b. Planning in accordance with the allocated budget</li><li>c. Continuous professional skills development</li><li>d. Establishment of individual project budget estimates</li></ul>             |
| 3. Inadequate budget for Programme 8                | <ul style="list-style-type: none"><li>a. Develop costed Provincial Maintenance Master Plan</li><li>b. Motivate for needs driven budget</li></ul>   |

## **11. CONCLUSIONS**

The Department has compiled this second draft Annual Performance Plan based on the Customised Sector Annual Performance Plan format. It has taken into consideration of Annual Report 2017/18 and First and Second Quarter Performance Reports 2018/19. The targets are set considering that the resource limitations coupled with accruals always have effect on the implementation of Annual Performance Plans. The Department has conducted strategic planning session on 8 and 9 November 2018 to review its Strategic Plan 2015 – 2020 and develop Annual Performance Plan 2019/20.

## ANNEXURE B: REVISED MEDIUM TERM STRATEGIC FRAMEWORK 2014-2019 (15 JULY 2016)

Revised: 15 July 2016

APPROVED BY CABINET: 19 OCTOBER 2017

### Outcome 2: A long and healthy life for all South Africans

#### 1. National Development Plan 2030 vision and trajectory

The National Development Plan (NDP) 2030 envisions a health system that works for everyone and produces positive health outcomes, and is accessible to all. By 2030, South Africa should have:

- (a) Raised the life expectancy of South Africans to at least 70 years;
- (b) Produced a generation of under-20s that is largely free of HIV;
- (c) Reduced the burden of disease;
- (d) Achieved an infant mortality rate of less than 20 deaths per thousand live births, including an under-5 Mortality rate of less than 30 per thousand;
- (e) Achieved a significant shift in equity, efficiency and quality of health service provision;
- (f) Achieved universal coverage;
- (g) Significantly reduced the social determinants of disease and adverse ecological factors.

The overarching outcome that the country seeks to achieve is *A Long and Healthy Life for All South Africans*. The NDP asserts that by 2030, it is possible to have raised the life expectancy of South Africans (both males and females) to at least 70 years. Over the next 5-years, the country will harness all its efforts - within and outside - the health sector, to achieve this outcome. Key interventions to improve life expectancy include addressing the social determinants of health; promoting health; as well as reducing the burden of disease from both Communicable Diseases and Non-Communicable Diseases as well as achieving meaningful progress towards universal health coverage through the phased implementation of National Health Insurance. An effective and responsive health system is an essential bedrock for attaining this.

Both the NDP 2030 and the World Health Organization (WHO) converge around the fact that a well-functioning and effective health system is an important bedrock for the attainment of the health outcomes envisaged in the NDP 2030. Equitable access to quality healthcare will be achieved through various interventions that are outlined in this strategic document and will be realisable through the phased implementation of National Health Insurance. The trajectory for the 2030 vision, therefore, commences with strengthening of the health system, to ensure that it is efficient and responsive, and offers financial risk protection. The critical focus areas proposed by the NDP 2030 are consistent with the WHO perspective.

The adoption of the Sustainable Development Goals (SDGs) in September 2015 also has significant implications for South Africa, as the country will have to ensure that its health strategies and programmes contribute to the attainment of the SDGs. The United Nations (UN) has emphasized that all 17

SDGs and their 169 associated targets are integrated and indivisible. They should not be conceived of or implemented parochially. Taking cognisance of this, the following SDGs are immediately pertinent to the work of the South African health sector:

- Goal 1. End poverty in all its forms everywhere
- Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture
- Goal 3. Ensure healthy lives and promote well-being for all at all ages
- Goal 5. Achieve gender equality and empower all women and girls
- Goal 10. Reduce inequality within and among countries

## **2. Constraints and Strategic Approach**

Following the advent of the democratic dispensation in 1994, progressive policies were introduced to transform the health system into an integrated, comprehensive national health system. Despite this, and significant investment and expenditure, the South African health sector has largely been beset by key challenges inclusive of:

- (a) a complex, quadruple burden of diseases;
- (b) serious concerns about the quality of public health care;
- (c) an ineffective and inefficient health system;
- (d) ineffective operational management at the coalface; and
- (e) spiralling private health care costs.

As a result, quality health care has mostly been accessible to those who can afford and access it, and not those who need it. Until recently, South Africa's performance against key health indicators has consistently compared poorly with other countries with similar or less levels of investment and expenditure. Between 2009-2014 the Ministry of Health implemented massive reforms focusing on strengthening health system effectiveness by addressing health management and personnel challenges, financing challenges, and quality of care concerns. Major milestones have been achieved, including improvements in health outcomes such as the Infant Mortality Ratio; Under-5 mortality Ratio; and to some extent the Maternal Mortality Ratio (MMR). The current phase of implementation focuses on the 2014-2019 period.

### **2.1. The gains made**

Empirical evidence highlights several gains made by the democratic government towards improving the health status of all South Africans. These include the following:

- (a) An increase in overall life expectancy from 57.1 years in 2009 to 62.9 years in 2014<sup>5</sup>.
- (b) An increase in female life expectancy from 59.7 years in 2009 to 65.8 years in 2014<sup>5</sup>.
- (c) An increase in male life expectancy from 54.6 years in 2009 to 60.0 years in 2014<sup>5</sup>.
- (d) A decrease in the Under-5 mortality rate (U5MR) from 56 deaths per 1 000 live births in 2009, to 39 deaths per 1 000 live births in 2014.

- (e) A decrease in the Infant Mortality Rate (IMR) from 39 deaths per 1 000 live births in 2009, to 28 deaths per 1 000 live births in 2014.
- (f) A decrease in mother-to-child transmission (MTCT) of HIV from 8.5% in 2008, to 3.5% in 2010 and to 2.7% in 2011.
- (g) An increase in the number of people initiated on antiretroviral therapy from 47 000 in 2004<sup>6</sup> to 3.2million in 2014<sup>7</sup>.
- (h) A decrease in the total number of people dying from AIDS from 300 000 in 2010 to 270 000 in 2011.
- (i) A 50% decline in the number of aged 0-4 years who acquired HIV between 2006 and 2011.
- (j) A 50% decrease in the number of people acquiring HIV infection, from 700 000 in the 1990's to 350 000 in 2011.
- (k) A 25% decrease in the annual number of infants and children younger than 5 years dying in the past two years.

Empirical evidence reflects that the estimated overall prevalence of HIV in South Africa increased from 10.6% in the 2008 to 12.2% in 2012, a trend attributed to the combined effects of a successfully expanded antiretroviral treatment (ART) programme and new infections<sup>8</sup>. This evidence also confirms that the availability and use of ART has increased survival among HIV-infected individuals. Furthermore, HIV prevalence among youth aged 15-24 years has declined from 8.7% in 2008 to 7.3% in 2012. The country's successful PMTCT programme has also resulted in a further decrease in HIV infection levels amongst infants 12 months and younger, from 2.0% in 2008 to 1.3% in 2012<sup>8</sup>. All these gains must be protected and consolidated during the 2014-2019 planning and implementation cycle.

### 3. NDP priorities to achieve the Vision

The NDP sets out nine long-term health goals for South Africa. Five of these goals relate to improving the health and well-being of the population, and the other four deal with aspects of health systems strengthening. These are as follows:

- (a) Average male and female life expectancy at birth increased to 70 years;
- (b) Tuberculosis (TB) prevention and cure progressively improved;
- (c) Maternal, infant and child mortality reduced;
- (d) Prevalence of Non-Communicable Diseases reduced by 28%;
- (e) Injury, accidents and violence reduced by 50% from 2010 levels;
- (f) Health systems reforms completed;
- (g) Primary health Care (PHC) teams deployed to provide care to families and communities;
- (h) Universal Health Coverage (UHC) achieved; and
- (i) Posts filled with skilled, committed and competent individuals.

---

<sup>6</sup> Johnson, LF (2012): "Access to Antiretroviral Treatment In South Africa 2004 – 2011", the Southern African Journal of HIV Medicine, Vol 13, No 1, 2012

<sup>7</sup> National DoH (2015): Annual Report 2014/15, Pretoria

<sup>8</sup> Shisana, O, Rehle, T, Simbayi LC, Zuma, K, Jooste, S, Zungu N, Labadarios, D, Onyona, D et al. (2014) South African National HIV Prevalence, Incidence and Behaviour Survey, 2012. Cape Town, HSRC Press.

The NDP 2030 states explicitly that there are no quick fixes for achieving the nine goals outlined above. The NDP also identifies a set of nine priorities that highlight the key interventions required to achieve a more effective health system, which will contribute to the achievement of the desired outcomes. These priorities include: addressing the social determinants that affect health and diseases; strengthening the health system; improving health information systems; preventing and reducing the disease burden and promoting health; achieving universal healthcare coverage through the implementation of NHI; improving human resources in the health sector; reviewing management positions and appointments and strengthening accountability mechanisms; improving quality by using evidence and creating meaningful public-private partnerships.

#### **4. Management of implementation**

The implementation of the strategic priorities for steering the health sector towards Vision 2030 should continue to be managed by the Implementation Forum for Outcome 2: “*A long and healthy life for all South Africans*”, which is the National Health Council (NHC). This Implementation Forum consists of the Minister of Health and the 9 Provincial Members of the Executive Council (MECs) for Health. The Technical Advisory Committee of the NHC (Tech NHC) functions as the Technical Implementation Forum. The Tech NHC consists of the Director-General of the National Department of Health (DoH) and the Provincial Heads of Department (HoDs) of Health in the 9 Provinces. Both the Implementation Forum and the Technical Implementation Forum should enhance the participation of government departments responsible for line functions that are social determinants of health, such as: clean water and proper sanitation, appropriate housing; quality education and decent employment, which alleviates poverty levels.

#### **5. MTSF sub-outcomes and component actions, responsible Ministry, indicators and targets**

##### **5.1. Sub-outcome 1: Universal Health coverage progressively achieved through implementation of National Health Insurance**

The NDP 2030 explores diverse financing mechanisms for UHC including: general tax income; private health insurance; social health insurance; payroll taxes; and user fees. The NDP 2030 proposes that NHI should be implemented in a phased manner in South Africa, focusing on: improving quality of care in public facilities; reducing the relative cost of private medical care; increasing the number of medical professionals and introducing a patient record system and supporting information technology.

The NDP 2030 views general taxation as the most progressive form of raising revenue for NHI, though personal income tax, as the level of income will determine the amount of contributions, with the poor not being taxed. Social health insurance is viewed as more progressive than private health insurance in that its contributions are typically mandatory, income linked and not risk rated. One limitation of social health insurance is that it typically provides a limited set of benefits. Private health insurance is not an effective financing mechanism, due to the fact that it is voluntary, uses risk rating and may exclude many people from access, and contributions required are not linked to income. Payroll taxes, which are used in some countries to fund NHI, have diminishing advantages as coverage becomes universal. The NDP 2030 views user fees or out-of-pocket payments (OOPs) as a regressive form of health financing, which can retract from access to health services. Table 1 below reflects the specific actions required from the health sector and other relevant sectors during the MTSF cycle 2014-2019. The NDP 2030 emphasizes that meaningful public-private partnerships in the health sector are important, particularly for NHI.

Government has set itself the target of establishing a publicly funded and publicly administered National Health Insurance (NHI) Fund through legislation, to drive the roll-out of the NHI programme. The country's NHI funding model will give effect to the three key principles of the NHI: universal provision of quality health care; social solidarity through cross-subsidisation; and equity, which delivers free health care at the point of service. A solid foundation is being laid for the introduction of NHI. The White Paper on NHI was approved by Cabinet and released for public comment in December 2015. A dedicated NHI technical support unit will be established within the National Department of Health to steer the implementation of NHI.

Table 1: Activities, indicators and targets for the implementation of NHI

| Actions   | Minister Responsible | Indicators   | Baselines <sup>9</sup> | Targets   |
|---|----------------------|--|------------------------|---|
| 1 Phased implementation of the building blocks of NHI   | Minister of Health   | National Health Insurance (NHI) Act Promulgated  | None                   | Draft National Health Insurance Bill gazetted for public consultation by 2017/18<br>National Health Insurance Act promulgated by 2019   |
| 2 Reform of Central Hospitals and increase their capacity for local decision making and accountability to facilitate semi-autonomy. | Minister of Health   | No. of central hospitals with standardised organisational structures and appropriate delegations | None                   | Funding Modality for the budget allocation to the public primary health care (PHC) facilities in the District Health System developed by 2017/18<br>NHI Fund purchasing services on behalf of the population from accredited and contracted health care providers by 2019<br>All 10 Central Hospitals having revised normative and approved organisational structures and appropriate delegations by 2019 |

<sup>9</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

| Actions | Minister Responsible | Indicators | Baselines <sup>9</sup> | Targets |
|---------|----------------------|------------|------------------------|---------|
|         |                      |            |                        |         |
|         |                      |            |                        |         |
|         |                      |            |                        |         |

### 5.2. Sub-outcome 2: Improved quality of health care

Improved quality of care is an important goal of the health sector and an essential building block for NHI. During 2012/13, an audit of all 3,880 public health facilities was completed by an independent organisation. The National Health Amendment Bill, which provides the important legal framework for the establishment of an independent Office of Health Standards Compliance, was assented to by the President in September 2013. The OHSC is mandated to monitor and enforce compliance by health establishments with norms and standards prescribed by the Minister, covering both public and private sector facilities. A key focus during the 2014-2019 MTSF will be devoted to accelerating the establishment and operationalisation of the Office of Health Standards Compliance. Table 2 below reflects the key actions required from the health sector to achieve this.

Table 2: Key actions, indicators and targets for enhancing Quality of Care

| Actions  | Minister responsible | Indicators   | Baselines <sup>10</sup>   | Targets  |
|--|----------------------|--|---|--|
| 1 Complete the regulatory framework for the Office of Health Standards Compliance (OHSC) | Minister of Health – | Regulations for the functioning of the OHSC promulgated and implemented  | OHSC Board established in January 2014 and OHSC Operational                   | Finalise regulations for the functioning of the OHSC by March 2017   |
| 2 Appointment of the Ombudsman and establishment of a functional office.                 | Minister of Health   | Functional Ombuds Person Office established  | Board of the OHSC established in January 2014                                 | Functional Ombuds Person office established by March 2017  |
| 3 Improve compliance with National Core Standards  | Minister of Health   | Number of Regional, Specialised, Tertiary and Central Hospitals that achieved an overall performance of ≥75% compliance with the national core standards for health facilities | Non-compliance with extreme and vital measures of the National Core Standards | ≥ 75% compliance with National Core Standards in 5 Central Hospitals by 2016/17<br>≥ 75% compliance with National Core Standards in 10 Central, 17 Tertiary, 30 Regional and 15 Specialised Hospitals by 2019 <sup>9</sup> |
| 4 Improve quality of District Hospitals  |                      | Status determination elements for Ideal District Hospitals   | None  | Ideal District Hospital status determination elements developed by 2018<br>25% of District Hospital conducting status determinations by 2019   |

<sup>10</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

## ANNUAL PERFORMANCE PLAN 2019/20

| Actions  | Minister responsible | Indicators  | Baselines <sup>10</sup> | Targets   |
|--|----------------------|---|-------------------------|---|
| 5 Ensure quality primary health care services with functional clinics by developing all clinics into Ideal Clinics           | Minister of Health   | Number of primary health care clinics in the 52 districts that qualify as Ideal Clinics | None                    | 2823 clinics in the 52 districts that qualify as Ideal Clinics by 2019            |
| 6 Improve the acceptability, quality and safety of health services by increasing user and community feedback and involvement | Minister of Health   | Patient experience of care (PEC) survey rate  | 65%                     | 75% of health facilities that conduct PEC surveys at least once a year by 2017/18 |

### 5.3. Sub-outcome 3. Implement the re-engineering of Primary Health Care

A strong PHC service delivery platform is the heartbeat for the implementation of NHI. The health sector has developed and begun implementing a re-engineered PHC model, which consists of three streams, namely: creation and deployment of ward-based PHC Outreach Teams; establishment of District Clinical Specialist Teams and strengthening of Integrated School Health Services. The health sector has begun establishing municipal Ward-based PHC Teams across all 9 Provinces. These teams are led by a professional nurse, and have 6 Community Health Care (CHWs) each. These teams are providing a range of community-based health promotion and disease prevention programmes including strengthening nutrition interventions. Their brief includes supporting and promoting health in households and community settings such as at crèches, Early Childhood Centres, and old age homes.

The establishment of District Clinical Specialist Teams has also commenced. These teams consist of: a Principal Obstetrician and Gynaecologist; Principal Paediatrician; an Anaesthetist; Principal Family Physician; Principal Midwife; Advanced Paediatric nurse and Principal PHC nurse. A national school health policy was developed, in a partnership programme between the National DoH, the Department of Basic Education (DBE) and the Department of Social Development. The NDP 2030 is supportive of health sector's model of PHC re-engineering. Table 3 below reflects the key actions

required from the health sector for accelerating the re-engineering of PHC. Table 3 below reflects the specific actions required from the health sector and other relevant sectors during the MTSF cycle 2014-2019.

Another major social and public health problem facing South Africa is the high burden of disease from violence and injuries. The country has an injury death rate of 158 per 100 000, which is twice the global average of 86,9 per 100 000 population and higher than the African average of 139,5 per 100 000<sup>11</sup>. Key drivers of the injury death rates are intentional injuries due to interpersonal violence (46% of all injury deaths) and road traffic injuries (26%), followed by suicide (9%), fires (7%), drowning (2%) and poisoning (1%). It also stretches state resources in other sectors, such as the South African Police, the Criminal Justice System and the Welfare Sector. A need exists to implement a comprehensive and intersectoral response to combat violence and injury, and significantly reduce the country's injury death rate. This should be led by the Ministers of Police; Justice and Correctional Services; and Transport, with the Minister of Health playing a supporting role. The root causes of violence and injuries fall outside of the health system. However, these social ills place a huge strain on the limited resources of the health system.

Social determinants of health are defined as the economic and social conditions that influence the health of people and communities, and include employment, education, housing, water and sanitation, and the environment. The priority interventions recommended by the NDP 2030 to address the social determinants of health require the health sector and its implementation partners to:

- (a) Implement a comprehensive approach to early life, which includes strengthening of existing child survival programmes;
- (b) ensure collaboration across sectors; and
- (c) promote healthy diets and physical activity.

The prevalence of Non-Communicable Diseases (NCD), such as cardiovascular diseases, diabetes, chronic respiratory conditions, cancer, kidney disease and muscular-skeletal conditions, has increased globally, and in South Africa. Modifiable risk factors for NCDs, which are also emphasized in the NDP 2030 and the National Strategic Plan for NCDs 2013-2017, produced by the health sector in 2012, include the following:

- (a) tobacco use;
- (b) physical inactivity;
- (c) unhealthy diets; and
- (d) harmful use of alcohol.

The National Strategic Plan for NCDs 2013-2017 reflects 10 goals and associated targets that must be achieved by 2020. Combating NCDs requires behaviour change and lifestyle change, which are extremely difficult to implement. Full participation of all government departments is required to meet the set targets. A need exists for the health sector to establish the National Health Commission (NHC) which will be an intersectoral platform to promote healthy lifestyles, encourage prevention of diseases and promote health care; and which will also enforce health regulations.

Table 3 below reflects the specific and concrete actions required from the health sector and its implementation partners to strengthen primary health care services, to address the social determinants of health and other interventions that have an impact on NCDs, during the MTSF cycle 2014-2019.

<sup>11</sup> National DoH and Health Policy Initiative (2012); Integrated Strategic Framework for the Prevention of Injury and Violence in South Africa, Pretoria.

Table 3: Key actions, indicators and targets for Re-engineering PHC (Including Non-Communicable Diseases and Mental Health)

| Actions   | Minister Responsible                              | Indicators   | Baselines                | Targets  |

|  |  | Number of people <sup>13</sup> counselled and screened for blood glucose levels | None (New Indicator) | 5 million people <sup>13</sup> counselled and screened annually for blood glucose levels by 2019 |

<sup>13</sup> People refers to those attending public health facilities

**ANNUAL PERFORMANCE PLAN 2019/20**

| Actions  | Minister Responsible | Indicators  | Baselines                        | Targets  |
|--|----------------------|---|----------------------------------|--|
| 5 Expand provision of rehabilitation services, and accessibility of Primary Health Services to people with physical disabilities | Minister of Health   | Proportion of health facilities accessible to people with physical disabilities   | 39% (1384 PHC health facilities) | 70% (of 2823) of PHC health facilities are accessible to people with physical disabilities and are meeting the 4 compulsory criteria (ramp, compacted access from gate to entrance, Toilets, signage) of accessibility by 2019 |
| 6 Screening the users of public primary health care (PHC) services for mental health disorders                                   | Minister of Health   | Number of Districts with a multi-disciplinary rehabilitation team (physiotherapist, optometrist, speech and hearing/audiologist, occupational therapist, medical orthotist/prosthetist) | Unknown                          | Survey conducted on number of Districts with a multi-disciplinary rehabilitation team and Baseline Established by March 2017<br><br>10 percentage points increase (on the baseline) by 2019                                    |
| 7 Contribute to a comprehensive and intersectoral response by government to violence and injury, and to ensure action            | Minister of Health   | Number of people using public PHC services screened for mental health disorders annually  | 1.8m                             | 2.2m people that use public PHC services screened for mental health disorders annually by 2019   |

| Actions | Minister Responsible                         | Indicators   | Baselines | Targets  |
|---------|--|--|-----------|--|
|         | Minister of Transport and Minister of Health | Roadside testing programme implemented to monitor driving under the influence of alcohol | None      | Mobile laboratories established and roadside testing programme implemented by March 2018 to significantly reduce the country's injury and death rate |

#### 5.4. Sub-outcome 4: Reduced health care costs

The NDP 2013 identifies a need for the development and implementation of mechanisms to improve the efficiency and control of health care costs in the private sector. These mechanisms include regulation of prices primary care gate-keeping; diagnostic and therapeutic protocols; preferred providers; alternate and reimbursement strategies (capitation or global budgets instead of fee-for-service). Mechanisms will be implemented to improve efficiencies and control the spiralling costs of health care. Reforms will also be implemented to reduce private health care costs.

Table 4: Key actions, indicators and targets to reduce health care costs

| Actions   | Minister Responsible | Indicators  | Baselines   | Target   |
|---|----------------------|---|---|--|
| 1 Regulation of the price on medicines through the transparent pricing system | Minister of Health   | Regulations relating to the single exit price increase, dispensing fees published | Transparent pricing regulations promulgated in 2004 | Regulations relating to the single exit price increase, dispensing fees published for public comment by 2018 |

|   |                    |   |                       |  |
|---|--------------------|---|-----------------------|--|
|   |                    |   |                       | published for implementation by 2019   |
| 2 Reform of the procurement system for medicines in the public sector | Minister of Health | Changes in tender price managed to not exceed inflation and currency variance | Previous tender price | Zero real price increase in tender prices for medicines by 2019<br><br>(net result of inflation and currency variance) |

### 5.5. Sub-outcome 5: Improved human resources for health

The NDP 2030 highlights the disparity in the distribution of health care providers between the public and private sectors in South Africa. The NDP emphasizes that the shortage of trained health workers and CHWs to provide health-promoting, disease preventing and curative services, is a major obstacle to service delivery. A new strategy for strengthening community-based services has been developed by the health sector, known as the re-engineering of Primary Health Care. The NDP accentuates the need to prioritise the training of more midwives, and distribute them to appropriate levels in the health system. This will contribute significantly to improving maternal, neonatal and child health.

The NDP articulates a concern about the training of specialists in South Africa, which encourages the continued production of system specialists, and which is not consistent with the needs of the country. A major change in the training and distribution of specialists is proposed. This should include speeding up the training of community specialists in five specialist areas namely: medicine; surgery including anaesthetics; obstetrics; paediatrics and psychiatry. Training of specialists should include compulsory placement in resource-scarce regions, under the supervision of Provincial specialists. Measures will be implemented to ensure adequate availability of well qualified, appropriately skilled and competent Human Resources for Health. The number of doctors trained locally and abroad will be doubled, at an average of 2,000 doctors a year. The Cuban Medical Training programme will be strengthened to ensure successful integration of medical students returning from Cuba to complete their training in South Africa. The revitalisation and resourcing of nursing colleges will be prioritised

The health sector's priority during 2009-2014 has been on professionalising nursing training and re-introducing a caring ethos in nursing through a greater focus on bedside nurse training provided through colleges and public sector hospitals. The key objectives were to develop a new nursing curriculum and enable 5 public nursing colleges to offer this new curriculum by the end of 2014/15. Protracted negotiations between the health sector and the Department of Higher Education and Training (DHET) constrained the achievement of this target.

Table 5: Key actions, indicators and targets for improving Human Resource production, development and management

| Actions  | Minister Responsible   | Indicators  | Baselines <sup>14</sup>   | Targets   |
|--|--|---|---|---|
| 1 Increase production of Human Resources for Health to strengthen capacity in the health system  | Minister of Health and Minister of Higher Education and Training | Percentage of Cuban trained doctors employed in the public sector | <p>2971 medical students enrolled into the RSA- Cuba programme</p> <p>Prep year: 419<br/>1<sup>st</sup> Year: 609<br/>2<sup>nd</sup> Year: 883<br/>3<sup>rd</sup> Year: 919<br/>4<sup>th</sup> Year: 73<br/>5<sup>th</sup> Year: 68</p> | <p>90% (951 /1060) of Cuban trained medical students that are in their 3<sup>rd</sup>, 4<sup>th</sup> and 5<sup>th</sup> years complete training by 2019.</p> <p>100% (951 of 951) of qualified Cuban trained medical doctors employed in the public sector by 2020</p> |
| 2 Develop a new nursing curricula to ensure a balance between bedside training and theoretical training at all public Nursing Collages in South Africa | Minister of Health and Minister of Higher Education              | Number of nursing colleges offering the new nursing curriculum    | None  | All 17 public nursing colleges offering the new nursing curriculum by 2019  |

## 5.6. Sub-outcome 6: Improved health management and leadership

The NDP 2030 identifies an important need to ensure that people who lead health institutions must have the required leadership capability and a high level of technical competence in a clinical discipline. Central hospitals are national assets and, as integral parts of universities, are primary training platforms for health professionals. The health sector will ensure that their governance, funding and management becomes a national public sector competency and that they play their role as part of a seamless referral system. Management and related capacity of central hospitals will be enhanced to enable them to deliver services efficiently and effectively.

<sup>14</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15.

A key important area that also requires strengthening is financial management in the health sector. At the end of 2013/14, four health departments, the National DoH, Limpopo; North West and the Western Cape received an unqualified audit opinion from the AGSA. **This reflects improvement from 2012/13, during which only 3/10 departments received unqualified audit opinions.** Concerted effort must be made to increase this figure to at least 7/9 by 2019. Key interventions include:

- (a) Improving financial management and audit outcomes in the health sector
- (b) Improve District Health governance and strengthen management and leadership of the district health system
- (c) Development of a training programme for Hospital CEOs and PHC Facility Managers

Table 6 below reflects other key specific actions required from the health sector and other relevant sectors during the MTSF cycle 2014-2019.

## ANNUAL PERFORMANCE PLAN 2019/20

**Table 6 : Key actions, indicators and targets for improving health management and leadership**

| Actions  | Minister Responsible | Indicators   | Baselines <sup>15</sup>   | Targets  |
|--|----------------------|--|---|--|
| 1 Improve financial management skills and audit outcomes for the health sector                                   | Minister of Health   | Number of Health Departments receiving unqualified audit reports from the Auditor-General of South Africa (AGSA) | 4 Health Departments in 2012/13 (National DoH; Limpopo North West and Western Cape) | 5 health departments (1 National and 4 Provincial DoHs) receiving unqualified audit reports from the Auditor-General of South Africa (AGSA) by 2017/18       |
| 2 Improve District Health governance and strengthen management and leadership of the District Health System      | Minister of Health   | Number of districts with normative management structures   | None  | Normative District management structure developed and approved by 2017<br>52 districts with normative management structures by 2019                          |
| 3 Ensure equitable access to specialised health care by increasing the training platform for medical specialists | Minister of Health   | Number of gazetted tertiary hospitals providing the full package of tertiary 1 services                          | None  | 17 gazetted tertiary hospitals providing the full package of Tertiary 1 services by 2019   |
| 4 Address skills gap at all levels of the health care system   | Minister of Health   | Training programme for Hospital CEOs and PHC Facility Managers   | The training platform (knowledge management hub) established                        | 90% of Hospitals CEOs, and PHC Facility Managers accessing the training programme platform for Hospital CEOs and PHC Facility Managers (knowledge management |

<sup>15</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

| Actions | Minister Responsible | Indicators | Baselines <sup>15</sup> | Targets       |
|---------|----------------------|------------|-------------------------|---------------|
|         |                      |            |                         | (hub) by 2019 |

### 5.7. Sub-outcome 7: Improved health facility planning and infrastructure delivery

Health Facilities and Infrastructure Management continue focuses on coordinating and funding health infrastructure to enable provinces to plan, manage, modernise, rationalise and transform infrastructure, health technology and hospital management, and improve the quality of care in line with national policy objectives. To improve health facility planning and infrastructure delivery a more systematic and professional approach to infrastructure delivery was introduced by the health sector, this entailed the establishment of a Project Office at macro level to deliver on the major infrastructure programs. The pace of infrastructure delivery will be accelerated using alternative methods of delivery where possible to accelerate progress. Teams for health facility planning and infrastructure delivery will be strengthened by restructuring of the current infrastructure establishment. For the MTSF 2014-2019 period, 106 new clinics and community health centres and 22 hospitals will be built and over 435 health facilities in all 9 provinces will undergo major and minor refurbishments.

Table 7: Key actions, indicators and targets for improved health facility planning and accelerated Infrastructure Delivery

| Key Action  | Minister Responsible | Indicator   | Baselines <sup>16</sup> | Targets  |
|---|----------------------|---|-------------------------|--|
| 1 Improve the quality of health infrastructure in South Africa by ensuring that all health facilities are compliant with facility norms and standards | Minister of Health   | Percentage of facilities that comply with gazetted infrastructure Norms & Standards | None                    | Health facility norms and standards developed and gazetted by March 2015<br>100% of new facilities comply with gazetted infrastructure Norms and Standards by 2019 |
| 2 Construction of new clinics, community health centres and hospital  | Minister of Health   | Number of additional clinics and community health centres constructed               | -                       | 106 clinics and community health centres constructed by 2019   |
| 3 Major and minor refurbishment of health facilities  | Minister of Health   | Number of additional hospitals constructed or revitalised                           | -                       | 22 hospitals constructed or revitalised hospitals by 2019  |
|   |                      | Number of health facilities that have undergone major and minor refurbishment       | 95 health facilities    | 435 health facilities undergone major and minor refurbishment by 2019  |

#### 5.8. Sub-outcome 8: HIV & AIDS and Tuberculosis prevented and successfully managed

Strategies and actions to combat the HIV&AIDS epidemic are outlined in the National Strategic Plan (NSP) on HIV, STIs and TB 2012-2016, which was produced by the South African National AIDS Council (SANAC), chaired by the Deputy President of South Africa. The NDP 2030 recognises the pivotal role of the NSP on HIV, STIs and TB 2012-2016 in harnessing the efforts of all sectors of society towards reducing the burden of disease from HIV and AIDS and Tuberculosis.

The NSP 2012-2016 has adopted as a 20-year vision, the four zeros advocated by the Joint United Nations Programme on HIV and AIDS (UNAIDS). It, therefore, entails the following targets for South Africa:

<sup>16</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

- zero new HIV and TB infections
- zero new infections due to vertical transmission
- zero preventable deaths associated with HIV and TB
- zero discrimination associated with HIV and TB.

With respect to achieving an “HIV-free” generation of under-20s, the NSP 2012-2016 has two pertinent objectives namely Strategic Objective 1 and Strategic Objective 2. Strategic Objective 1 (SO 1) of the NSP 2012-2016 focuses specifically on addressing the structural, social, economic and behavioural factors that drive the HIV and TB epidemics. Strategic Objective 2 (SO 2) is focused on primary strategies to prevent sexual and vertical transmission of HIV and STIs, and to prevent TB infection and disease, using a combination of prevention approaches. The NSP 2012-2016 defines combination prevention as a mix of biomedical, behavioural, social and structural interventions that will have the greatest impact on reducing transmission and mitigating susceptibility and vulnerability to HIV, STIs and TB. This implies that different combinations of interventions will be designed for the different key populations. The NSP 2012-2016 identifies a total of 7 sub-objectives for HIV, STI and TB prevention, which if effectively implemented will yield the desired effect of reducing new HIV and TB infections

Strategic Objective (SO) 3 of the NSP 2012-2016 outlines pertinent interventions to reduce morbidity and mortality from AIDS related causes and Tuberculosis. SO 3 focuses on sustaining health and wellness, and achieving a significant reduction in deaths and disability as a result of HIV and TB infection through universal access to accessible, affordable and good quality diagnosis, treatment and care.

The health sector will implement diverse interventions to deal with the burden of TB. Screening, treatment and prevention will be strengthened in the following vulnerable groups:

- (a) **Correctional Services** - 150 000 inmates in the 242 correctional services, and the families of those who test positive,
- (b) **Mineworkers** - A total of the 500 000 mineworkers and the families of those found positive
- (c) **Peri-mining communities** - 600 000 communities in the peri-mining communities
- (d) **Schools and households** - intensified screening of TB in schools and households using primary ward-based outreach teams

The public health sector will decentralise the management of MDR-TB. The decentralisation will enable the sector to implement an approach similar to that used to address the burden of diseases from HIV, for instance, the Nurse Initiated Management of Antiretroviral therapy (NIMART), which enables nurses to diagnose and manage accordingly. Multi-Drug Resistant (MDR) sites will expanded. Table 8 below reflects the specific actions required from the health sector and its implementation partners to reduce mortality from AIDS related causes and Tuberculosis (TB).

## ANNUAL PERFORMANCE PLAN 2019/20

**Table 8: Key actions, indicators and targets for the prevention and successful management of HIV&AIDS and Tuberculosis**

| Action  | Minister Responsible   | Indicator  | Baselines <sup>17</sup> <sup>18</sup>        | Target   |
|---|--|--|--|--|
| 1 Maximising opportunities for testing and screening to ensure that everyone in South Africa has an opportunity to test for HIV and to be screened for TB at least annually | Minister of Health   | Number of clients tested for HIV annually<br>Number of people screened for TB annually | 8.9 million (2012/13)<br>8 million (in 2011) | 10 million HIV tests administered annually by 2019<br>8 million TB screenings annually by 2019     |

### 5.9. Sub-outcome 9: Maternal, infant and child mortality reduced

South Africa's efforts to reduce maternal deaths date back to 1997, when the then Minister of Health established the National Committee of Confidential Enquiry into Maternal Deaths (NCCEMD), which was the first on the African continent. The NCCEMD has since released five triennial reports. A positive development is that South Africa's MMR, both population-based and institutional, reflect a downward trend. Data from the NCCEMD reflect that institutional MMR has decreased from 188.9 per 100 000 live births in 2009 to 141 per 100 000 live births in 2013. Estimates from the Rapid Mortality Surveillance (RMS) system of the Medical Research Council and the University of Cape Town reflects South Africa's MMR for 2013 at 155/100 000.

As is the case with MMR, Infant Mortality Rates (IMR) in South Africa reflect a decline. IMR in South Africa has decreased from 39 deaths per 1 000 live births in 2009, to 28 deaths per 1 000 live births in 2014. Similarly, the Under-5 mortality rate decreased from 56 deaths per 1 000 live births in 2009, to 39 deaths per 1 000 live births in 2014.

With respect to under-nutrition, the South African National Health and Nutrition Examination Survey, conducted by the Human Sciences Research Council found that found that young children youngest boys and girls (0–3 years of age) had the highest prevalence of stunting (26.9% in boys and 25.9% in girls), which was significantly different from the other age groups, with the lowest prevalence in the group aged 7–9 years (10.0% and 8.7% for boys and girls, respectively). It was also found that among boys, rural informal areas had significantly more stunting (23.2%) than urban formal areas (13.6%). Furthermore, girls living in urban informal areas had the highest prevalence of stunting (20.9%), and those in urban formal areas, the lowest (10.4%), the difference in prevalence being significant.

## ANNUAL PERFORMANCE PLAN 2019/20

Table 9 below shows the key actions, indicators and targets to reduce maternal, infant and child mortality.

| Actions   | Minister responsible | Indicators   | Baselines <sup>21</sup> | Target   |
|---|----------------------|--|-------------------------|--|
| 1. Improve the implementation of Basic Antenatal and Postnatal Care | Minister of Health   | Antenatal visits before 20 weeks rate  | 50.6%                   | 70% of pregnant women attending PHC facility for Antenatal care before they are 20 weeks pregnant by 2019                    |
|   |                      | Proportion of mothers visiting a PHC facility for postnatal care within 6 days of delivery of their babies | 74.8%                   | 80% of mothers visiting a PHC facility for postnatal care within 6 days of delivery of their babies by 2019                  |
| 2. Expand the PMTCT coverage to pregnant woman                      | Minister of Health   | Antenatal client initiated on ART rate   | 90%                     | 98% of HIV positive pregnant women initiated on ART by 2019  |
|   |                      | Infant 1st Polymerase Chain Reaction (PCR) test positive around 10 week rate                               | 2.5% <sup>22</sup>      | <1.5% of babies born to HIV positive mothers testing HIV positive at the age of 10 weeks by 2019                             |
| 3. Protection of children against vaccine preventable diseases      | Minister of Health   | Immunisation coverage under 1 year (annualised)  | 82.6% (2012/13)         | 95% infants fully immunised by 2019  |
|   |                      | DTaP-IPV-Hib3 -Measles 1st dose drop-out rate  | 8%                      | <5% of infants who dropped out of the immunisation schedule between DTaP-IPV-Hib3/ Hib 3rd dose and measles 1st dose by 2019 |

<sup>21</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

<sup>22</sup> Baseline provided for Infant 1st Polymerase Chain Reaction (PCR) test positive around 6 week rate. Baseline for PCt test positive at 10 weeks will be determined during 2016/17 financial year.

**ANNUAL PERFORMANCE PLAN 2019/20**

| Actions   | Minister responsible | Indicators   | Baselines <sup>21</sup>  | Target   |
|---|----------------------|--|--|--|
| 4 Reduce fatality caused by leading causes of death   |                      | Measles 2nd dose coverage  | 77% (2012/13)  | 85% of children receiving Measles 2 <sup>nd</sup> dose by 2019                         |
|   |                      | Confirmed measles case incidence per million total population    | <5 per 1,000,000   | <1 confirmed cases of Measles incidence per 1,000,000 population by 2019               |
|   |                      | Child under 5 years diarrhoea case fatality rate                 | 4.2%   | <2% of children under 5 years admitted with diarrhoea who died by 2019                 |
| 5 Improve nutrition levels among infants  |                      | Child under 5 years severe pneumonia case fatality rate          | 3.8%   | <2.5% of children under 5 years admitted with pneumonia who died by 2019               |
|   |                      | Child under 5 years severe acute malnutrition case fatality rate | 9%   | <5% of children under 5 years admitted with severe acute malnutrition who died by 2019 |
| 6. Expand access to sexual and reproductive health by expanding availability of contraceptives and access to cervical and HPV cancer screening services |                      | Minister of Health   | Infant exclusively breastfed at DTaP-IPV-Hib-HBV 3rd dose rate | 45% (2014/15)  |
|   |                      | Minister of Health   | Couple year protection rate                                    | 36%  |
|   |                      | Minister of Health   | Cervical cancer screening Coverage                             | 55%  |
|   |                      |  |  | 70% of women screening for cervical cancer at least once every 10 years by 2019        |

| Actions | Minister responsible | Indicators  | Baselines <sup>21</sup> | Target  |
|---------|----------------------|---|-------------------------|---|
|         | Minister of Health   | Human Papilloma Virus (HPV) Vaccine 1 <sup>st</sup> dose coverage - | None (new indicator)    | 90% of grade 4 girls that are 9 years and older receiving 1 <sup>st</sup> dose of HPV vaccine by 2019 |

**5.10. Sub-outcome 10: Efficient Health Management Information System developed and implemented for improved decision making**

The NDP 2030 emphasizes the widely accepted fact that credible data are necessary for decision-making and regular system-wide monitoring. The NDP 2030 accentuates the need to implement effective health information systems. Key interventions include: prioritizing the development and management of effective data systems; integrating the national health information system with the provincial, district, facility and community-based information systems; establishing national standards for integrating health information systems; undertaking regular data quality audits, developing human resources for health information; strengthening the use of information; focusing access on web based and mobile data entry and retrieval linked to the existing DHIS; and investing in improving data quality. Diverse health information systems exist in the public sector, which play a key role in tracking the performance of the health system. However, these systems have various limitations, including: lack of interoperability between different systems; inability to facilitate harmonious data exchange; prevalence of manual systems and lack of automation.

## ANNUAL PERFORMANCE PLAN 2019/20

**Table 10: Key actions, indicators and targets for the development of an integrated and well-functioning national patient-based information system**

| <b>Key Actions</b>  | <b>Minister Responsible</b>                              | <b>Indicators</b>  | <b>Baselines<sup>23</sup></b>   | <b>Targets</b>   |
|---|--|--|---|--|
| 1 Develop a complete System design for a National Integrated Patient based information system | Minister of Health<br>Minister of Science and Technology | System design for a National Integrated Patient based information system completed | Health Normative Standards Framework for eHealth produced and gazetted in terms of the National Health Act (61 of 2003) in 2014 | System design for a National Integrated Patient based information system completed by March 2019 |

---

<sup>23</sup> Estimated performance of the health sector for 2013/14, as reflected in the Annual Performance Plan of the National DoH for 2014/15

## 6. Impact (or outcome) Indicators

Table 11 below reflects the key impacts expected from the interventions of the health sector during 2014-2019.

| Impact Indicator                        | Minister responsible | Baseline <sup>24</sup> 2009 <sup>24</sup> | Baseline <sup>25</sup> 2014                               | 2019 targets   |
|---|----------------------|---|---|--|
| <b>Life expectancy at birth: Total</b>  | Minister of Health   | 57.1 years                                | 62.9 years<br>(Increase of 3,5years)                      | Life expectancy of at least 65 years by March 2019                                       |
| <b>Life expectancy at birth: Male</b>   | Minister of Health   | 54.6 years                                | 60.0 years  | Life expectancy of at least 61.5 years amongst Males by March 2019 (increase of 3 years) |
| <b>Life expectancy at birth: Female</b> | Minister of Health   | 59.7 years                                | 65.8 years  | Life expectancy of at least 67 years amongst females by March 2019 (increase of 3years)  |
| <b>Under-5 Mortality Rate (U5MR)</b>    | Minister of Health   | 56 per 1,000 live-births                  | 39 under 5 deaths per 1,000 live-births<br>(25% decrease) | 33 under 5 year deaths per 1,000 live-births by March 2019                               |
| <b>Neonatal Mortality Rate</b>          | Minister of Health   | -   | 14 neonatal deaths per 1000 live births                   | 8 neonate deaths per 1000 live births  |
| <b>Infant Mortality Rate (IMR)</b>      | Minister of Health   | 39 per 1,000 live-births                  | 28 infant deaths per 1,000 live-births<br>(25% decrease)  | 23 infant deaths per 1000 live births<br>(15% decrease)                                  |

<sup>25</sup> Dorrington RE, Bradshaw D, Laubscher R (2015): Rapid Mortality Surveillance Report 2014, Cape Town: South African Medical Research Council.

**ANNUAL PERFORMANCE PLAN 2019/20**

| <b>Impact Indicator</b>                        | <b>Minister responsible</b>   | <b>Baseline 2009<sup>24</sup></b>       | <b>Baseline<sup>25</sup> 2014</b>                       | <b>2019 targets</b>  |
|--|---|---|---|--|
| <b>Maternal Mortality Ratio (MMR)</b>          | Minister of Health  | 280 per 100,000 live-births (2008 data) | 269 maternal deaths per 100,000 live-births (2010 data) | <100 maternal deaths per 100,000 live-births by March 2019 |
| <b>Live Birth under 2500g in facility rate</b> | Minister of Health<br>Minister of Social Development<br>Minister of Agriculture<br>Minister of Economic Development | -                                       | 12.9%   | 11.6% (10 percentage point reduction)                      |

## ANNEXURE C: TECHNICAL INDICATOR DESCRIPTIONS OF CUSTOMIZED INDICATORS

### PROGRAMME 1: ADMINISTRATION

| Indicator name   | Short Definition   | Purpose /Importance   | Source  | Calculation Method  | Data Limitations                   | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance         | Responsibility              |
|--|--|---|---|---|------------------------------------|-------------------|------------------|-----------------|---------------|-----------------------------|-----------------------------|
| Improve Hospital Management by appointing Executive Management teams in all hospitals (Key Management Positions) | Is a count of vacant key Executive Management posts filled in hospitals inclusive of CEO, Corporate, Finance, Medical and Nursing Managers   | Strengthen leadership and governance in hospitals                           | Person Report   | Numerator:<br>Total number vacant funded posts for top five hospital executive management filled                          | Depends on accuracy of PERSAL data | Input             |                  | Annually        | Yes           | Increase in filling of post | Chief Director HRM & D      |
| Improve quality of care by developing and implementing Recruitment & Retention strategy                          | Documented and approved Recruitment & Retention strategy reviewed by continuous update of staff needs as determined in the Human Resource Plan and utilised/implemented by the department for retention of staff and recruitment as evident in the Human Resource Plan | To improve service delivery and responsive to needs of departmental clients | Recruitment and retention strategy v/s appointment as per human resource plan | Documented Recruitment &Retention strategy review and evidential staff appointment as per schedule of human resource plan | None                               | Input             |                  | Annually        | Yes           | Increase in filling of post | Chief Director HRM & D      |
| Audit opinion from Auditor General   | Audit opinion for Provincial   | To strengthen financial information   | Documented Evidence:  | N/A   | Outcome                            | N/A               |                  | Annually        | No            | Unqualified Audit Opinion   | Chief Financial Officers of |

## ANNUAL PERFORMANCE PLAN 2019/20

| Indicator name   | Short Definition  | Purpose /Importance  | Source  | Calculation Method  | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance   | Responsibility  |
|--|---|--|---|---|---|-------------------|------------------|-----------------|---------------|---|---|
| Departments of Health for financial performance          | Percentage of Hospitals with broadband access   | To track broadband access to hospitals   | Network reports that confirm availability of broadband; OR Network rollout report for sites that are not yet live | Numerator: Total Number of hospitals with minimum 2 Mbps connectivity<br>Denominator Total Number of Hospitals                      | NA  | Output            | Percentage       | Quarterly       | No            | Higher Proportion of broadband access is more favorable for connectivity to ensure that South African health system can implement the eHealth Programme | ICT Directorate / Chief Directorate of Provincial Departments of Health |
| Percentage of fixed PHC facilities with broadband access | Percentage of fixed PHC facilities with broadband access  | To ensure broadband access to PHC facilities   | Network reports that confirm availability of broadband; OR Network rollout report for sites that are not yet live | Numerator: Total Number of fixed PHC facilities with minimum 1Mbps connectivity<br>Denominator Total Number of fixed PHC Facilities | NA  | Output            | Percentage       | Quarterly       | No            | Higher Proportion of broadband access is more favorable for connectivity  | ICT Directorate / Chief Directorate of Provincial Departments of Health |
| Communication strategy developed                         | Development of a plan that express the goals and methods of an organisational outreach activities, including what the department wishes to share with public and stakeholders | To create awareness to patients and communities with the aim of improving service delivery and quality of care | Approved communication document   | Numerator: Number of communication strategies developed   | The strategy should inform/ incorporate policy directives of the department | Output            | Number           | Annually        | Yes           | Developed communication strategy  | Communication Section   |

**ANNUAL PERFORMANCE PLAN 2019/20**

**PROGRAMME 2: DISTRICT HEALTH SERVICES (DHS)**

| Indicator name                                   | Short Definition   | Purpose /Importance   | Source  | Calculation Method   | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility    |
|--|--|---|---|--|---|-------------------|------------------|-----------------|---------------|--|-------------------|
| Ideal clinic status rate                         | Fixed PHC health facilities that have obtained Ideal Clinic status (platinum, silver, gold) as a proportion of fixed PHC clinics and CHCs/CDCs | Monitors outcomes of Ideal Clinic PPTCRM assessments to ensure they are ready for inspections conducted by Office of Health Standards Compliance. | Ideal Clinic review tools   | Numerator: SUM(Fixed PHC health facilities that obtained Ideal clinic status ) Denominator: Fixed PHC clinics/fixed CHCs/CDCS  | None  | Process/A ctivity | Percentage       | Annual          | No            | Higher ideal clinic status rates ensures clinics will have positive outcomes and is ready for inspections conducted by Office of Health Standards Compliance.              | DHS Manager       |
| PHC utilisation rate - total                     | Average number of PHC visits per person per year in the population.  | Monitors PHC access and utilisation.  | Daily Reception Headcount register (or HPRS where available) and DHS Stats SA | Numerator: SUM ([PHC headcount under 5 years] + [PHC headcount 5-9 years] + [PHC headcount 10-19 years] + [PHC headcount 20 years and older]) Denominator: Sum([Population - Total]) | Dependant on the accuracy of estimated total population from StatsSA                  | Output            | Number           | Quarterly       | No            | Higher levels of uptake may indicate an increased burden of disease, or greater reliance on public health system. A lower uptake may indicate underutilization of facility | DHS Manager       |
| Complaint resolution within 25 working days rate | Complaints resolved within 25 working days (including public holidays) as a proportion of all complaints resolved                              | Monitors the time frame in which the public health system responds to complaints  | Complaints register   | Numerator: SUM([Complain t resolved within 25 working days]) Denominator: SUM([Complain t resolved])   | Accuracy of information is dependent on the accuracy of time stamp for each complaint | Quality           | Percentage       | Quarterly       | No            | Higher percentage suggest better management of complaints in PHC Facilities  | Quality Assurance |

**ANNUAL PERFORMANCE PLAN 2019/20**

**SUB – PROGRAMME: DISTRICT HOSPITALS**

| Indicator name  | Short Definition   | Purpose /Importance   | Source   | Calculation Method   | Data Limitations                                  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility            |
|---|--|---|--|--|---|-------------------|------------------|-----------------|---------------|--|---------------------------|
| Average Length of Stay (District Hospitals)                       | The average number of client days an admitted client spends in hospital before separation.<br>Inpatient separation is the total of day clients, Inpatient discharges, Inpatient deaths and Inpatient transfers out. Include all specialities | Monitors effectiveness and efficiency of Inpatient management.<br>Proxy indicator because ideally it should only include Inpatient days for those clients separated during the reporting month. Use in all hospitals and CHCs with Inpatient beds | DHIS, midnight census register   | <b>Numerator:</b> Sum ([Inpatient days total x 1]) + ([Day patient total x 0.5])<br><b>Denominator:</b> SUM([Inpatient deaths-total] + [Inpatient discharges-total] + [Inpatient transfers out-total]) | High levels of efficiency could hide poor quality | Efficiency        | Days (number)    | Quarterly       | No            | A low average length of stay reflects high levels of efficiency. But these high efficiency levels might also compromise quality of hospital care. High ALOS might reflect inefficient quality of care        | District Health Services  |
| Inpatient Bed Utilisation Rate (District Hospitals)               | Inpatient bed days used as proportion of maximum Inpatient bed days (Inpatient beds x days in period) available. Include all specialities  | Track the over/under utilisation of district hospital beds  | DHIS, midnight census  | <b>Numerator:</b> Sum ([Inpatient days total x 1]) + ([Day patient total x 0.5])<br><b>Denominator:</b> Inpatient bed days (Inpatient beds * 30.42) available  | Accurate reporting sum of daily usable beds       | Efficiency        | Percentage       | Quarterly       | No            | Higher bed utilisation indicates efficient use of bed utilisation and/or higher burden of disease and/or better service levels. Lower bed utilization rate indicates inefficient utilization of the facility | Hospital Services Manager |
| Expenditure per patient day equivalent (PDE) (District Hospitals) | Average cost per patient day equivalent (PDE). PDE is the Inpatient days total + Day Patients * 0.5 + (Emergency headcount + OPD   | Monitors effective and efficient management of inpatient facilities. Note that multiplied by 0.5 is the same as division by 2,  | BAS, Stats SA, Council for Medical Scheme data, DHIS, facility registers, patient records, Admission, expenditure, midnight census | <b>Numerator:</b> SUM([Expenditure - total])<br><b>Denominator:</b> Sum ([Inpatient days total x 1]) + ([Day patient total x   | Accurate reporting sum of daily usable beds       | Outcome           | Number (Rand)    | Quarterly       | No            | Lower rate indicating efficient use of financial resources.  | Hospital Services Manager |

## ANNUAL PERFORMANCE PLAN 2019/20

| Indicator name  | Short Definition  | Purpose /Importance  | Source              | Calculation Method   | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility                                   |
|---|---|--|---------------------|--|---|-------------------|------------------|-----------------|---------------|--|--|
| headcount total) * 0.333333333  | headcount total) * 0.333333333 and multiplied by 0.333333333 is the same as division by 3                         |  |                     | 0.5]+([OPD headcount not referred new x 0.33333333)+SUM([OPD headcount referred new x 0.33333333])+([OPD headcount follow-up x 0.33333333)+([Emergency headcount - total x 0.33333333])] |   |                   |                  |                 |               |  |  |
| Complaint resolution within 25 working days rate (District Hospitals) | Complaints resolved within 25 working days (including public holidays) as a proportion of all complaints resolved | Monitors the time frame in which the public health system responds to complaints | Complaints register | Numerator:<br>SUM([Complaint resolved within 25 working days])   | Accuracy of information is dependent on the accuracy of time stamp for each complaint | Quality           | Percentage       | Quarterly       | No            | Higher percentage suggest better management of complaints in Hospitals | Hospital Services and Quality Assurance Managers |

**ANNUAL PERFORMANCE PLAN 2019/20**

**HIV & AIDS, STI & TB (HAST) CONTROL**

| Indicator name                                | Short Definition /Importance   | Purpose /Importance  | Source                       | Calculation Method   | Data Limitations                   | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance   | Responsibility             |
|---|--|--|------------------------------|--|------------------------------------|-------------------|------------------|-----------------|---------------|---|----------------------------|
| Female condom distributed                     | Total number of female condoms supplied or distributed in the province   | Tracks the supply of female condoms in the Province                | Numerator: Stock/Bin card    | Numerator: Total number of Male condoms distributed in the province  | None                               | Process           | Number           | Quarterly       | No            | Higher number indicated better distribution (and indirectly better uptake) of condoms in the province | HIV/AIDS Cluster           |
| Improve TB cure rate                          | Percentage of TB clients who successfully cured for TB during the reporting period   | Monitors impact of TB treatment Programme                          | ETR.net report               | Numerator: TB client cured<br>Denominator: TB client start on treatment  | Depends on management of registers | Outcome           | Percentage       | Annually        | No            | Increase in number of TB client successfully treated  | TB Program                 |
| ART client remain on ART end of month - total | Total clients remaining on ART (TROA) are the sum of the following:<br>- Any client on treatment in the reporting month<br>- Any client without an outcome reported in the reporting month | Monitors the total clients remaining on life-long ART at the month | ART Register; TIER.Net; DHIS | <b>Numerator:</b> SUM([ART adult remain on ART end of period])+SUM([ART child under 15 years remain on ART end of period]) | None                               | Output            | Cumulative total | Quarterly       | no            | Higher total indicates a larger population on ART treatment   | HIV/AIDS Programme Manager |

DISEASE PREVENTION AND CONTROL (DPC)

| Indicator name               | Short Definition  | Purpose /Importance  | Source                      | Calculation Method  | Data Limitations   | Type of Indicator (Input etc) | Calculation Type | Reporting Cycle | New Indicator | Desired Performance                                       | Responsibility        |
|------------------------------|---|--|-----------------------------|---|--|-------------------------------|------------------|-----------------|---------------|---|-----------------------|
| Cataract Surgeries performed | Number of eyes on which cataract surgery was performed              | Accessibility of theatres. Availability of human resources and consumables | Numerator: Theatre Register | Numerator: SUM([Cataract surgery total])  | Accuracy dependent on quality of data from health facilities | Output                        | Number           | Quarterly       | Yes           | Higher number of cataract surgery indicated               | NCD Programme Manager |
| Malaria case fatality rate   | Deaths from malaria as a percentage of the number of cases reported | Monitor the number deaths caused by Malaria                                | Malaria Information System  | Numerator: Deaths from malaria<br>Denominator: Total number of Malaria cases reported | Accuracy dependant on quality of data from health facilities | Outcome                       | Percentage       | Quarterly       | No            | Lower percentage indicates a decreasing burden of malaria | Communicable Diseases |

**ANNUAL PERFORMANCE PLAN 2019/20**

**PROGRAMME 3: EMERGENCY MEDICAL SERVICES (EMS)**

| Indicator name   | Short Definition  | Purpose /Importance  | Source   | Calculation Method   | Data Limitations   | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance   | Responsibility |
|--|---|--|--|--|--|-------------------|------------------|-----------------|---------------|---|----------------|
| Improve response time by increasing the number of Operational Ambulances   | Number of ambulances both old and newly procured allocated to facilities for ambulance operational use                      | Increasing the number of Operational Ambulances  | Asset Register   | Number of Operational Ambulances   | Reliant on availability of Funds                                 | Input             | No               | Annual          | Yes           | Increasing the number of Operational Ambulances   | EMS Manager    |
| Improve the use of resources by integrating PPTS into EMS operations       | Number of Planned Patient Transport which were originally allocated in hospitals absorbed in the Emergency Medical Services | Monitor integration of PPTS to EMS   | Physical verification or Asset Register                                | Number of Planned Patient Transport integrated into Emergency Medical Services | No   | Input             | No               | Annual          | Yes           | Increasing the Number of Planned Patient Transport Integrated into Emergency Medical Services | EMS Manager    |
| Improve maternal outcomes by increasing the number of Obstetric ambulances | Total number of Ambulances designed and dedicated to provide obstetric services   | To monitor allocation of ambulances for Obstetric services   | Physical Verification or Asset Register                                | Numerator: Number of Obstetric ambulances                                      | None   | Input             | %                | Quarterly       | No            | Increase in Number of Obstetric ambulances  | EMS Manager    |
| EMS P1 urban response under 15 minutes rate                                | Emergency P1 responses in urban locations with response times under 15 minutes as a proportion of EMS P1 urban calls.       | Monitors compliance with the norm for critically ill or injured patients to receive EMS within 15 minutes in urban areas | DHIS, institutional EMS registers OR DHIS, patient and vehicle report. | Numerator: SUM([EMS P1 urban response under 15 minutes])                       | Accuracy dependent on quality of data from reporting EMS station | Output            | Percentage       | Quarterly       | No            | Higher percentage indicate better response times in the urban areas                           | EMS Manager    |

## ANNUAL PERFORMANCE PLAN 2019/20

| Indicator name   | Short Definition  | Purpose /Importance  | Source  | Calculation Method   | Data Limitations   | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility |
|--|---|--|---|--|--|-------------------|------------------|-----------------|---------------|--|----------------|
| EMS P1 rural response under 40 minutes rate arrives on scene | Emergency P1 responses in rural locations with response times under 40 minutes as a proportion of EMS P1 rural call                   | Monitors compliance with the norm for critically ill or injured patients to receive EMS within 40 minutes in rural areas | DHIS, institutional EMS registers Patient and vehicle report. | Numerator:<br>SUM([EMS P1 rural response under 40 minutes])<br>Denominator:<br>SUM([EMS P1 rural responses]) | Accuracy dependent on quality of data from reporting EMS station   | Output            | Percentage       | Quarterly       | No            | Higher percentage indicate better response times in the rural areas  | EMS Manager    |
| EMS inter-facility transfer rate                             | Inter-facility (from one facility to another facility) transfers as proportion of total EMS patients transported to a health facility | Monitors use of ambulances for inter-facility transfers as opposed to emergency responses                                | DHIS, institutional EMS registers Patient and vehicle report. | Numerator:<br>SUM([EMS inter-facility transfer])<br>Denominator:<br>SUM([EMS patients total])                | Accuracy dependent on the reliability of data recorded on the Efficiency Report at EMS stations and emergency headcount reported from hospitals. | Output            | Percentage       | Quarterly       | No            | Lower percentage desired. The target is the CSP target of 10% (8:2) of acute patient contacts and measures whether capacity exists at the appropriate level of care. | EMS Manager    |

**ANNUAL PERFORMANCE PLAN 2019/20**

**PROGRAMME 4 and 5: REGIONAL / TERTIARY / CENTRAL HOSPITALS**

| Indicator name   | Short Definition   | Purpose / Importance  | Source   | Calculation Method  | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance   | Responsibility                   |
|--|--|---|--|---|---|-------------------|------------------|-----------------|---------------|---|----------------------------------|
| Functional Adverse Events Committees   | Number of established committee that meet on frequent basis to discuss medical adverse events and implement strategies to prevents such events from occurring.                             | To develop and implement adverse events prevention strategies   | Minutes of meetings of the committee             | Number of Functional adverse events committee   | None  | Input             | No               | Quarterly       | Yes           | Increase number of Functional adverse events committee                  | Chief Director Hospital services |
| Improve access to TB services through effective movement TB patients rate for continuity of care | Percentage of movement of TB patients from TB hospital to Primary Health Care facility with a confirmation slip as acknowledgement by the receiving facility for continuation of treatment | To monitor the efficiency and effectiveness of the institution  | Acknowledgement slips (pink slips) movement book | Numerator: Number of confirmed TB patients movement<br>Denominator: total number of TB patients moved   | Accuracy dependant on quality of data and effective information systems | Output            | Percentage       | Quarterly       | No            | Increase effective movement of TB patients                              | Chief Director Hospital services |
| Hospital achieved 75% and more on National Core Standards self - assessment rate                 | Percentage of Hospitals that conducted self assessment on National core standards and achieved a performance of 75% scoring of National core standard results.                             | Monitors whether public hospitals establishments are measuring their own level of compliance with standards in order to close gaps in preparation for an external assessment by the Office of Health Standards Compliance | DHIS - National Core Standard review tools       | Numerator: Number of Hospitals that conducted National Core Standards self-assessment to date in the current financial year<br>Denominator: Total number of Hospitals conducted National Core Standards | Reliability of data provided  | Output            | Percentage       | Quarterly       | No            | Higher assessment indicates commitment of facilities to comply with NCS | Quality assurance                |

## ANNUAL PERFORMANCE PLAN 2019/20

| Indicator name   | Short Definition  | Purpose /Importance  | Source   | Calculation Method   | Data Limitations                                  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility            |
|--|---|--|--|--|---|-------------------|------------------|-----------------|---------------|--|---------------------------|
| Average Length of Stay (Regional / Tertiary / Central Hospitals)                       | The average number of client days an admitted client spends in hospital before separation. Inpatient separation is the total of day clients, Inpatient discharges, Inpatient deaths and Inpatient transfers out. Include all specialities | Monitors effectiveness and efficiency of Inpatient management. Proxy indicator because ideally it should only include Inpatient days for those clients separated during the reporting month. Use in all hospitals and CHCs with Inpatient beds | DHS, midnight census   | <u>Numerator</u> Sum ([Inpatient days total x 1]) + ([Day patient total x 0.5])<br><u>Denominator</u> SUM([Inpatient deaths-total]) + ([Inpatient discharges-total]) + ([Inpatient transfers out-total]) | High levels of efficiency could hide poor quality | Efficiency        | Days (number)    | Quarterly       | No            | A low average length of stay reflects high levels of efficiency. But these high efficiency levels might also compromise quality of hospital care. High ALOS might reflect inefficient quality of care        | District Health Services  |
| Inpatient Bed Utilisation Rate (Regional / Tertiary / Central Hospitals)               | Inpatient bed days used as proportion of maximum Inpatient bed days (inpatient beds x days in period) available. Include all specialities   | Monitors effectiveness and efficiency of inpatient management  | DHS, midnight census   | <u>Numerator:</u> Sum ([Inpatient days total x 1]) + ([Day patient total x 0.5])<br><u>Denominator:</u> Inpatient bed days (Inpatient beds * 30.42) available  | Accurate reporting sum of daily usable beds       | Efficiency        | Percentage       | Quarterly       | No            | Higher bed utilisation indicates efficient use of bed utilisation and/or higher burden of disease and/or better service levels. Lower bed utilization rate indicates inefficient utilization of the facility | Hospital Services Manager |
| Expenditure per patient day equivalent (PDE) (Regional / Tertiary / Central Hospitals) | Average cost per patient day equivalent (PDE). PDE is the Inpatient days total + Day Patients * 0.5 + (Emergency headcount + OPD headcount total) * 0.33333333  | Monitors effective and efficient management of inpatient facilities. Note that multiplied by 0.5 is the same as division by 2, and multiplied by 0.33333333 is the same as   | BAS, Stats SA, Council for Medical Scheme data, DHS, midnight census | <u>Numerator</u> SUM([Expenditure - total])<br><u>Denominator</u> Sum ([Inpatient days total x 1]) + ([Day patient total x 0.5]) + ([OPD headcount not   | Accurate reporting sum of daily usable beds       | Outcome           | Number (Rand)    | Quarterly       | No            | Lower rate indicating efficient use of financial resources.  | Hospital Services Manager |

**ANNUAL PERFORMANCE PLAN 2019/20**

| Indicator name  | Short Definition  | Purpose /Importance  | Source              | Calculation Method   | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility    |
|---|---|--|---------------------|--|---|-------------------|------------------|-----------------|---------------|--|-------------------|
|   | division by 3   |  |                     | referred new x 0.3333333]+<br>SUM([OPD headcount referred new x 0.3333333]+([OPD headcount follow-up x 0.3333333]+([Emergency headcount - total x 0.3333333])) |   |                   |                  |                 |               |  | Quality Assurance |
| Complaint resolution within 25 working days rate (Regional / Tertiary / Central /Specialized/Hospitals) | Complaints resolved within 25 working days (including public holidays) as a proportion of all complaints resolved | Monitors the time frame in which the public health system responds to complaints | complaints register | Numerator:<br>SUM([Complaint resolved within 25 working days])<br>Denominator:<br>SUM([Complaint resolved])  | Accuracy of information is dependent on the accuracy of time stamp for each complaint | Quality           | Percentage       | Quarterly       | No            | Higher percentage suggest better management of complaints in Hospitals | Quality Assurance |

**ANNUAL PERFORMANCE PLAN 2019/20**

**PROGRAMME 6: HEALTH SCIENCES AND TRAINING**

| <b>Indicator Name</b>   | <b>Short Definition</b>   | <b>Purpose /Importance</b>  | <b>Source</b>             | <b>Calculation Method</b>                              | <b>Data Limitations</b>  | <b>Type of Indicator</b> | <b>Calculation Type</b> | <b>Reporting Cycle</b> | <b>New Indicator</b> | <b>Desired Performance</b>   | <b>Responsibility</b>                         |
|---|---|---|---------------------------|--|--|--------------------------|-------------------------|------------------------|----------------------|--|---|
| Improve human resource efficiency by training health care professionals on critical clinical skills | Number of health care professional who are trained on critical skills as detailed in the Workplace skills Plan                              | Tracks the provisioning of training for health professionals  | Training Database         | Headcount of health professionals trained              | Data quality depends on good record keeping by Provincial DoH        | Input                    | Number                  | Quarterly              | No                   | Increase the number of health professionals trained on critical clinical skills  | Human Resources Development Programme Manager |
| Improve access to EMS training by increasing the number of accredited EMS colleges                  | Number of EMS colleges which received accreditation by the HPCSA and CHe to provide Higher Education programs                               | Tracking Number of EMS colleges accredited to offer Higher education programs   | Accreditation certificate | Count of EMS colleges accredited                       | Depends on accrediting institutions to process applications in time. | Input                    | Number                  | Annual                 | Yes                  | Increase Number of EMS colleges accredited to offer the Higher Education programs  | EMS college principal                         |
| Number of Bursaries awarded to first year medicine students   | Number of new medicine students provided with bursaries by the provincial department of health  | Tracks the numbers of medicine students sponsored by the Province to undergo training as future health care providers | Bursary contracts         | Count of first year medical students awarded bursaries | Data quality depends on good record keeping by the Provincial DoH    | Input                    | No.                     | Annual                 | No                   | Higher numbers of students provided with bursaries are desired, as this has the potential to increase future health care providers | Human Resources Development Programme Manager |
| Number of Bursaries awarded to first year nursing students  | Number of basic nursing students enrolled in nursing colleges and universities and offered bursaries by the provincial department of health | Tracks the numbers of medicine students sponsored by the Province to undergo training as future health care providers | Bursary contracts         | Count of first year nursing students awarded bursaries | Data quality depends on good record keeping by the Provincial DoH    | Input                    | No.                     | Annual                 | Yes                  | Higher numbers of students provided with bursaries are desired, as this has the potential to increase future health care providers | Director Nursing                              |

**ANNUAL PERFORMANCE PLAN 2019/20**

**PROGRAMME 8: INFRASTRUCTURE NORMS AND STANDARDS**

| Indicator Name  | Short Definition  | Purpose /Importance  | Source   | Calculation Method                       | Data Limitations   | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator                                     | Desired Performance                                     | Responsibility  |
|---|---|--|--|--|--|-------------------|------------------|-----------------|---|---|---|
| Improve access to healthcare by increasing number of PHC facilities maintained                    | Number of PHC facilities where Day to day maintenance of existing PHC facilities of existing PHC facilities was conducted Ideal Clinics       | Track overall maintenance of existing PHC facilities and equipment         | Maintenance Completion Certificate                   | Number of PHC facilities maintained      | Accuracy dependent on reliability of information captured on completion certificates | Number            | Annual           | No              | Increase lifespan of infrastructure and equipment | Chief Director: Infrastructure and Technical Management |   |
| Number of PHC facilities constructed (new/replacement)  | Number of new PHC facilities constructed to either set a new facility or replace an old facility  | To improve health care services  | Completion Certificate                               | Number of PHC Facilities constructed     | Accuracy dependent on reliability of information captured on completion certificates | Input             | Number           | Annual          | No  | Improve access to health care services                  | Chief Director: Infrastructure and Technical Management |
| Number of Hospitals under maintenance   | Number of hospitals identified with infrastructural defects and under maintenance   | Track overall maintenance of existing Hospitals and equipment              | Maintenance Completion Certificate                   | Number of Hospitals maintained           | Accuracy dependent on reliability of information captured on completion certificates | Process           | Number           | Annual          | No  | Increase lifespan of infrastructure and equipment       | Chief Director: Infrastructure and Technical Management |
| Enhance patient care & safety and improving medical care by constructing Modern hi-tech hospitals | Number of health modern Hi-tech Hospital constructed which is oriented to modern medical technology in operations for patient care and safety | To enhance patient care and improve health outcomes                        | Physical verification, planning design documentation | Number of health modern Hi-tech Hospital | Depends on availability of funds   | Input             | No               | Annual          | Yes   | Increase Number of health modern Hi-tech Hospital       | Chief Director: Infrastructure and Technical Management |
| Improve maintenance of health facilities by appointing cooperatives                               | Number of community cooperatives appointed to perform maintenance work in health facilities   | Improve conditions of facilities and increases access to health facilities | Signed contract/appointment letters                  | Number of cooperatives appointed         | None   | Input             | Number           | Annual          | No  | Increase lifespan of infrastructure                     | Chief Director: Infrastructure and Technical Management |

## ANNUAL PERFORMANCE PLAN 2019/20

| Indicator Name   | Short Definition  | Purpose /Importance  | Source   | Calculation Method   | Data Limitations  | Type of Indicator | Calculation Type | Reporting Cycle | New Indicator | Desired Performance  | Responsibility  |
|--|---|--|--|--|---|-------------------|------------------|-----------------|---------------|--|---|
| Number of health facilities that have undergone major and minor refurbishment in NHI Pilot District      | Number of existing health facilities in NHI Pilot District where Capital, Scheduled Maintenance, or Professional Day-to-day Maintenance projects (Management Contract projects only) have been completed (excluding new and replacement facilities).      | Tracks overall improvement and maintenance of existing facilities. | Practical Completion Certificate or equivalent,  | Number of health facilities in NHI Pilot District that have undergone major and minor refurbishment      | Accuracy dependent on reliability of information captured on project lists. | Input             | Number           | Annual          | No            | A higher number will indicate that more facilities were refurbished. | Chief Director: Infrastructure and Technical Management |
| Number of health facilities that have undergone major and minor refurbishment outside NHI Pilot District | Number of existing health facilities outside NHI Pilot District where Capital, Scheduled Maintenance, or Professional Day-to-day Maintenance projects (Management Contract projects only) have been completed (excluding new and replacement facilities). | Tracks overall improvement and maintenance of existing facilities. | Practical Completion Certificate or equivalent, Capital Infrastructure project list, Scheduled Maintenance project list, and Professional Day-to-day Maintenance project list (only Management Contract projects). | Number of health facilities outside NHI Pilot District that have undergone major and minor refurbishment | Accuracy dependent on reliability of information captured on project lists. | Input             | Number           | Annual          | No            | A higher number will indicate that more facilities were refurbished. | Chief Director: Infrastructure and Technical Management |
